

EY Global Tax Platform: Indirect Tax – Global Incentives Engine

EY Global Incentives Engine (GIE) is a searchable database of global tax credit and business incentive opportunities. EY incentives subject-matter professionals have collaborated to deploy an application on EY Global Tax Platform: Indirect Tax (GTP: IT) that assists clients with understanding the current Credits and Incentives (C&I) landscape in jurisdictions worldwide. GIE features a value calculation engine that quantifies potential benefits based upon inputs such as capital investment, headcount growth and retention, and R&D spend.

Project GIE

GIE Project Report

In this report, you'll find all the information, graphics and charts of the incentives that you saw on the GTP:IT platform. Your project matched these incentives because of the key project attributes you answered on the wizard, which impact incentive eligibility and opportunity valuation.

Relevant, global C&I content

EY global incentives subject-matter professionals update the GIE platform on a quarterly basis. With over 30 years of experience in the incentives industry, EY subject-matter professionals offer extensive knowledge of relevant incentive programs around the globe.

New Project Wizard

The value calculation engine in GIE allows users to input key project facts and receive a PDF output of potentially available incentive programs with estimated benefits. The New Project Wizard can scan for incentives for projects across various industries and investment types. Users can compare up to five locations with the same set of project facts.
