Foreword

Peru is one of the most important countries in Latin America. Its diverse characteristics include a variety of climates, a vast territorial expanse, significant natural resources, people with great skills and high academic standards, and a solid economic and industrial background. Today, Peru is considered a leading emerging market, with a solid recent history of economic stability based on an average annual GDP growth rate of 4.2%, measured from 2000 to 2023.

In response to the impact of the COVID-19 pandemic, Peru was one of the countries in the Latin American region, and indeed, in the world, to implement such a forceful response through economic stimulus packages equivalent to 20% of the GDP. Thus, Peru had a rapid recovery of economic growth of 13.6% in 2021, and a continued average growth of 3.0% is expected from 2024 to 2027.

This Business and Investment Guide is a tool for foreign and national investors, providing key information on the country's current economic situation and the main tax, legal, and labor issues, as well as on how to incorporate businesses in Peru, and general information on how to invest and do business in the country. It also contains a complete directory of Peruvian embassies and consulates abroad, as well as contacts of interest to investors.

A Word from the President of the Republic of Peru

Photograph by Raúl García / © PROMPERÚ

Dina Boluarte Zegarra

President of the Republic
of Peru

Welcome to Peru, a country offering investors from all over the world a broad spectrum of opportunities.

Over the past three decades, Peru has maintained a notable track record of growth and development, underpinned by solid governmental policies and effective economic management. This continuity has fostered stability, macroeconomic discipline, and a long-term vision, laying the groundwork for sustainable growth.

According to the OECD, Peru's solid macroeconomic institutions - including its tax laws, an independent central bank, and robust financial regulations have spurred significant economic growth and substantially reduced poverty in the past two decades. Despite our status as an upper-middle-income economy, we continue to face challenges in productivity, diversification, informality, connectivity, and institutional capacities.

In line with our commitment to boost the economy, we have launched programs like Emergencia-FEN (life-risk emergencies) and Compras MYPE (small business purchases) along with initiatives to promote tourism and agricultural exports to create more jobs and foster inclusive growth.

The initial data from the first two months of 2024 signal the onset of economic recovery, with an annual average GDP growth of 2.1%, driven by increased mining production and expansion in non-primary sectors. Inflation has remained controlled, positioned in the median value of the target range in May 2024 (2.0%) and significantly lower than the previous year's rate (7.9% in May 2023). Overall inflation will remain at the median value of the target range (2.0%) by 2025.

In this context, the Board of Directors of the Central Reserve Bank of Peru (BCRP) has opted to reduce the reference interest rate by 25 basis points on each occasion from April to May 2024, totaling a reduction of 200 basis points from September 2023 to May 2024. Currently, it stands at 5.75%, the lowest in the region.

Moreover, our reduced fiscal deficits have led to a lower public debt ratio than other countries in the region. By the end of the projection period, we expect the fiscal deficit to be within the budgetary rule limits of 2.0% and 1.5% of GDP in 2024 and 2025, respectively. This projection assumes controlled public expenditure (especially in 2024) to achieve the fiscal targets set for these years.

Furthermore, the Peruvian government is pursuing a strategy to integrate more companies into global value chains, leveraging free trade agreements and bilateral investment treaties with more than 20 countries. The imminent operation of the multimodal hub on Peru's central coast will position us as a significant player in the Asia-Pacific basin trade.

Thanks to our extensive trade and investment agreements network and participation in regional and global integration processes, Peru enjoys privileged access to the world's key markets, providing a legal framework that offers numerous benefits and guarantees to foreign investors.

In summary, Peru presents a favorable environment for sustainable and responsible investment, supported by solid legislation, efficient economic management, and proven macroeconomic stability.

We trust that you will consider Peru as your preferred investment destination. Together, we can contribute to mutual growth and development.

Welcome to Peru!

A Word from the Peruvian Minister of Foreign Affairs

Ministry of Foreign Affairs

Photograph by Gihan Tubbeh / © PROMPERÚ

Elmer Schialer Salcedo

Minister of Foreign Affairs

Amidst a global landscape fraught with polarization and challenges - from the aftermath of the pandemic to trade logistics, rising fuel, energy, and food prices, as well as governance issues - it is important to note Peru's economic adaptability and resilience. These characteristics inspire security and confidence in potential investors, assuring the commitment that Peru gives to macroeconomic stability and predictability.

Over the last 30 years, Peru has deployed an economic policy that ensures stability in exchange rates, responsible management of inflation, and robust regulations against unfair market practices. This fosters business competition, allows unrestricted investment, and facilitates free capital flow for both domestic and foreign investors.

According to the 2024-2027 Macroeconomic Projections Report by the Ministry of Economy and Finance (MEF), private investment and the recovery of private consumption are the key factors driving the rebound of the annual growth rate to 3.1% in 2024, surpassing the previous year's figure of -0.6%. In addition, inflation is expected to be 2% in 2025, influenced by a lower impact of climatic phenomena on food prices compared to recent months.

Photograph by Denise Tejada / © PROMPERÚ

Our 24 free trade agreements are a testimony to our dedication to developing a vibrant and competitive business ecosystem that promotes productive development, boosts business competitiveness, and spurs employment. Peruvian products in over 58 markets have secured preferential access, currently covering 92% of Peruvian exports.

The current government is promoting a new investment cycle that allows us to capitalize on the opportunities created by the energy and climate transition. Private investment will benefit from increased execution of mining projects such as the expansion of Toromocho and Antamina, as well as investments in transportation infrastructure, including Jorge Chávez International Airport, the Multipurpose Port Terminal of Chancay, and Line 2 of the Lima Metro.

It is also important to highlight that Peru envisions its future as an emerging regional power, positioning itself as the main logistics hub of the South American region, and as an important actor in the critical mineral and fresh food supply chains. With these objectives in mind, Peru focuses its efforts on invigorating the economy, promoting infrastructure projects, and implementing reforms for OECD membership, which will drive long-term economic growth.

Furthermore, this year, Peru is to preside over the Asia-Pacific Economic Cooperation (APEC) forum for the third time after eight years, making Peru the economy that has returned to lead the forum in the shortest interval. Peru's presidency of APEC is focused on the theme "Empower. Include. Grow", which encompasses three priorities: trade and investment for inclusive and interconnected growth; innovation and digitalization to promote the transition to a formal and global economy; and sustainable growth for resilient development.

A Word from the Peruvian Minister of Foreign Affairs

Photograph by Denise Tejada / © PROMPERÚ

These priorities aim to enhance trade, investment, and innovation opportunities to improve well-being and strengthen Peru's international image and economic influence on the global stage. Peru will present the roadmap for transitioning from an informal to a formal economy - a legacy to the inclusive growth agenda of this region - considering that APEC has not addressed this issue in its 35 years.

In this context, Peru is demonstrating a favorable environment for investment and business development, presenting an excellent opportunity for those seeking to expand their operations here.

Finally, it is with great enthusiasm that I present Peru's Business and Investment Guide 2024, produced within the framework of the successful Interinstitutional Cooperation Agreement between the Ministry of Foreign Affairs and EY Peru. This Guide represents a concerted effort to provide investors and entrepreneurs with a valuable tool for understanding

and capitalizing on the opportunities presented by the Peruvian market and its investment ecosystem. With the backing of the Ministry of Foreign Affairs and the well-known expertise of EY Peru, this Guide offers detailed insights into the business and investment landscape in our country.

I would like to express my most sincere gratitude to all those involved in preparing this Guide, whose commitment and dedication have been fundamental to its accomplishment. I hope this tool proves helpful to all those exploring business and investment opportunities in Peru.

Without any hesitation, the Ministry of Foreign Affairs invites you to discover and fully utilize all that our Guide has to offer.

A Word from the Director General of Economic Promotion

Ministry of Foreign Affairs

Photograph by Daniel Silva / © PROMPERÚ

Augusto Morelli Salgado

Director General of
Economic Promotion

From the Executive Office for Economic Promotion, we are pleased to present Peru's Business and Investment Guide 2024. This Guide is the result of a productive collaboration between the Ministry of Foreign Affairs (MRE) and EY Peru, underscoring the importance of coordinated efforts between the public and private sectors to highlight business and investment opportunities in Peru.

Over the years, the Peruvian economy has grown and emerged as a significant benchmark in the region. This success is the result of our continuous economic growth and the implementation of responsible macroeconomic policies. Peru's stability in the face of principal risk indicators is a testament to our belief in the principles of a free market with social responsibility as the path to our country's growth and development.

The national economy features several characteristics that are attractive to international investors. Since 2001, the country has maintained one of the lowest inflation rates in Latin America, stability supported by solid regulation, efficient resource management, and comparative advantages.

Peru's commitment to enhancing its competitiveness is unwavering, as demonstrated by the relaunch of the National Competitiveness and Productivity Plan (PNCP). This comprehensive plan is a vision and a reality, fostering inclusive, sustainable, diversified economic growth and creating an environment conducive to entrepreneurship and productive businesses nationally and globally.

The current National Competitiveness and Productivity Plan (PNCP) 2019-2030 encompasses 84 measures (with 434 milestones) in nine areas to be coordinated by the public and private sectors. The priority objective of infrastructure has progressed the most since 2019, with 62.3% of the planned advances achieved. Considering Peru's strategic geographic position, developing our internal and external connectivity is a state priority.

Peru is not just a country but a strategically positioned gateway to South America, a crucial link for trade between the region and the Asia-Pacific basin. The country is actively developing its logistics ecosystem, which, combined with its extensive network of free trade agreements, positions Peru as a critical player in the global organization sector and a potential coordinator of new shipping routes.

The concretion of the multimodal logistics hub on the central coast of Peru is a significant investment project that includes the expansion of Jorge Chávez International Airport and the Callao Port Terminal, as well as the creation of the Multipurpose Port Terminal of Chancay and the future Industrial Park of Ancón. This project will create significant jobs and position Peru as a promising destination for sustainable and resilient investments, fostering ample business opportunities and establishing us as a key player in international geopolitics.

This emblematic initiative represents a milestone on our path towards development. Its implementation lays the foundation to boost trade with the participation of national and foreign investors, aiming to create jobs and stimulate the local economy, all from a perspective of sustainable territorial development.

Peru's approach is to focus on sustainability, considering the importance of ESG (environmental, social, and governance) criteria in the current corporate and investment scenario. A Roadmap Towards a Circular Economy in the Industrial Sector is being adopted, an initiative developed by the Ministry of Industry and Fisheries (PRODUCE) and the Ministry of Environment (MINAM) to promote inclusive and sustainable economic growth and industrial development.

The circular economy, a key part of Peru's sustainability approach, ensures the sustainability of the planet's ecosystem by reducing deforestation and depletion of natural resources, and minimizing carbon emissions. The creation of green industries also increases employment using circular business models. Environmental sustainability is profitable in the long term, and Peru seeks to position itself as a significant participant in this field for future generations.

Thus, Peru's solid macroeconomic system, its integrative and sustainable policies, and favorable geographic location—which promotes commercial connections between the Asian region and South America and among countries in the area—are positioning the country as an important regional commercial development hub. This is characterized by more efficient processes, reduced operating costs and transportation schedules, greater flexibility and adaptability, and significant development in sustainable infrastructure and multimodal capacity.

A Word from the President of APEC Peru 2024 National Organizing Committee

Photograph by Daniel Silva / PROMPERÚ

Carlos Chávez-Taffur Schmidt

Ambassador

President of APEC Peru
2024 National Organizing
Committee

Assuming the chairmanship of the Asia-Pacific Economic Cooperation (APEC) for the third time is not only an honor for Peru, but also a strategic responsibility that transcends conventional diplomacy. It is a demonstration of the confidence placed in our ability to lead the global economic dialogue. Hosting more than 20 official events and more than 160 technical meetings have turned our country into the center of cultural and economic exchanges among the 21 member economies of the forum, positioning Peru as a capable and committed host.

The organization of APEC PERU 2024 is a monumental effort that reflects the high level of preparation and dedication of our country. The APEC PERU 2024 Organizing Committee has the great responsibility to ensure that every logistical aspect is executed with the highest standards and in keeping with the peruvian custom of welcoming visitors warmly. Collaboration with national suppliers of the various services to be provided is essential to ensure a smooth and safe operation.

Similarly, strategic alliances are essential to strengthen the logistics of the event, ensuring that the benefits of Convention Tourism are extended to the regions involved. Public entities, regional and local governments, private associations, academic entities and citizens in general play a fundamental role, not only in the preparations for the meetings, but also in the organization of academic, business, cultural and sports events, among others, that enhance our presidential year, through the "APEC For the People" initiative promoted by the Ministry of Foreign Affairs.

Photograph by Daniel Silva / © PROMPERÚ

APEC PERU 2024 strategy also includes cultural experiences for delegates, with our dances, handicrafts and gastronomy, and with a first-class service, supported by the legion of university volunteers. All of this is key to creating an atmosphere of hospitality and connection, leaving a lasting impression on international officials. These elements undoubtedly facilitate smoother interactions among delegates, contributing to positive results at the negotiating table and the consensus needed to approve the documents emanating from the various meetings.

The host cities, for the various meetings, have been selected taking into consideration criteria of infrastructure, services, air connectivity and hotel offerings, among other aspects. In addition, the topics of ministerial meetings have been linked to the socio-economic and production characteristics of Arequipa, Pucallpa, Trujillo and Urubamba, besides Lima, the capital city, where the Peruvian presidential year will conclude with the APEC Economic Leaders' Summit.

The legion of delegates and ministers attending the meetings requires a precise management of their mobilization, from their arrival at airports and their accommodation in

almost 40 hotels, to their participation in the selected venues, which boosts sectors such as transportation, trade, lodging and tourism. Security is a crucial element in the organization and is guaranteed thanks to the close coordination with the Peruvian National Police, whose impeccable work should be highlighted. Likewise, the support of the regional and local governments concerned should be acknowledged, as they contribute to provide a safe environment and a better image of our country before the international community.

APEC Peru 2024 is an excellent opportunity to project Peru as a modern, inclusive and resilient country, capable of facing global challenges with innovative and sustainable solutions and attractive investment possibilities. It is an opportunity to generate constructive dialogues and shared solutions that benefit the citizens of all member economies.

With a solid organization and a clear vision, we are prepared to make the most of this historic occasion, to position ourselves as a center for global events and consolidate Peru's position in the Asia-Pacific region, with the aim of ensuring growth that benefits all peruvians.

A Word from the APEC SOM CHAIR

Photograph by Gihan Tubbeh / © PROMPERÚ

Carlos Vásquez Corrales
APEC SOM Chair

For the third time, Peru is organizing the APEC year in 2024. Our country received an unanimous support by the other 20 member economies, to become again the "host economy" of this forum after eight years. Peru belongs to the "exclusive club" of APEC economies which have assumed the commitment of leading the forum three times. The other ones are Thailand and the United States.

Our willingness to engage with APEC's principles and goals represents firm evidence of the Peruvian commitment to promote the strengthening and relevance of the forum. This commitment is founded on the multiple benefits obtained by Peru since its incorporation into APEC in 1998. In the last 25 years, Peru has multiplied its trade with the APEC member economies at an annual rate of 12%. Only a little bit more of USD3.7 billion was exported to the APEC economies in 2000. Twenty-four years later, in 2022, our exports to the members of this forum increased to USD42.5 billion, representing almost 70% of our total exports.

In 1998, Peru didn't have a free trade agreement (FTA) with any of the APEC member economies. In 2024, our country counts on bilateral FTA with 10 out of our 20 APEC partners, and with four of them within the CPTPP. To enrich even more this magnificent bunch of FTA, Peru is currently negotiating two additional agreements with Indonesia and Hong Kong, China. In 2022, more than 5,200 Peruvian companies sold their products to the APEC markets; 3,700 of them were small and medium enterprises.

In terms of investments, the accumulated stock of the APEC member economies in Peru amounts to more than USD80 billion in diverse sectors such as mining, agribusiness, energy, telecommunications, and banking. The active and constant interaction among businessmen and companies within the successive meetings of the APEC Business Advisory Council (ABAC) in the last two decades, has significantly contributed to the dramatic rise of investments from APEC member economies to Peru.

Lastly, from 2006 to 2021, Peru was beneficiary of USD2.8 million from the APEC fund to finance 36 cooperation projects in fields as diverse as small and medium enterprises; science, technology, and innovation; fishing; food security; health; transport; illegal logging and associated trade; and economic empowerment of women. But only in 2023, the APEC fund financed in Peru 35 projects for a sum of USD4 million.

The advantages that Peru has obtained from its membership in APEC are evident. Under the theme "Empower, Include and Grow", our country is leading once more the APEC agenda in 2024. Based on said theme, Peru has proposed three priorities that were widely accepted by the other 20 APEC economies: trade and investment for an inclusive and interconnected growth; innovation and digitalization to promote the transition to formal and global economy; and sustainable growth for a resilient development. All these priorities can unleash new possibilities of investments in physical and digital connectivity; clean energies; sustainable food systems; and the massive insertion of Peruvian SMEs in new and resilient regional supply chains that can enable their formalization and the boost of

their productivity and competitiveness with the intensive use of innovative and promising digital tools.

APEC emerges as one of the most important diplomatic and economic platforms to reinforce and widen the growing links of Peru with the Asia Pacific region, which is the most important regional engine of global economic growth and development. To celebrate this fantastic opportunity, EY publishes a new Peru's Business and Investment Guide, with the support of the Ministry of Foreign Affairs of Peru, which is the main responsible and general coordinator of the APEC Year 2024's organization.

This new collaboration between EY and the Peruvian Ministry of Foreign Affairs consolidates an old partnership whose synergies have played a decisive role to promote business and investments in Peru.

The APEC year can contribute to reduce the infrastructure gap in Peru with the modernization of physical connectivity such as ports, airports, roads and associated projects like logistics and industrial parks. All these possibilities are epitomized by the port of Chancay that will be opened at the end of 2024 and will strengthen direct maritime links between the Pacific coast of South America and Asia.

I extend my warmest invitation to businessmen and investors, particularly those who will participate in the ABAC meetings and the 2024 APEC CEO Summit, to explore the multiple business opportunities offered by Peru for a formal, sustainable, and equitable development not only for my country but for the whole Asia Pacific community.

A Word from the APEC SOM Peru

Photograph by Renzo Giraldo / © PROMPERÚ

Renato Reyes Tagle
APEC SOM Peru

Importance of the APEC Forum for Peru

Peru's entry into APEC in 1998 has been one of the most visionary acts of the Peruvian foreign policy of the 20th century, because it has contributed to the country's economic growth, as well as to consolidate our international projection in the Asia-Pacific, which is the most innovative, dynamic, and fastest growing region in the world.

Being an APEC member has significantly strengthened our ties with the other 20 economies of this important forum, and has contributed to integrating Peruvian companies into regional and global value chains, as well as to the internationalization of SMEs.

According to ComexPeru, since 1998, the trade between Peru and APEC member economies has grown annually at a rate of 12%. In 2022, Peru exported over USD42.5 billion and imported more than USD40.0 billion within the APEC region, representing almost 70% of Peru's global trade.

Peru's membership in APEC has given it the opportunity to negotiate free trade agreements (FTA) with ten member economies, including Australia, Canada, Chile, China, South Korea, the United States, Japan, Mexico, Singapore and Thailand. Similarly, thanks to the CPTPP we are trading partners with four additional APEC economies: Brunei, Malaysia, New Zealand and Vietnam. Thanks to these FTAs, approximately 1,500 SMEs and 2,200 micro, small and medium-sized enterprises trade more efficiently with the Asia-Pacific region.

Currently, Peru is negotiating two FTAs with Indonesia and Hong Kong, China. In 2022, 49.1% of tourists arriving in Peru came from APEC economies. Furthermore, according to ProInversión, 3 out of every 10 dollars of foreign direct investment in the country comes from APEC economies.

APEC PERU 2024 Presidency¹

This forum constitutes a space to develop socio-economic diplomacy that helps address the main economic-social challenges of Peru, allowing the country to benefit from the economic and technical cooperation of APEC, especially for vulnerable sectors of the economies (women, youth, indigenous populations, SMEs, among others) and in the construction of institutional capacities that contribute to inclusive economic growth.

During the APEC 2024 presidency, Peru has proposed an agenda focused on empowering economic actors, with emphasis on the most vulnerable sectors such as women entrepreneurs, micro, small and medium-sized businesses, youth, among others. The thematic agenda also includes trade liberalization and facilitation, the transition to the formal economy, the empowerment of women, the development of human resources, small and medium-sized businesses, food security, the use of clean energy, among others.

Peru's proposal is to provide these actors with the necessary tools to participate in the global economy on competitive terms, enabling their inclusion. In this sense and under the motto "Empower. Include. Grow," the priorities we will promote in APEC are as follows:

- i. Trade and investment for inclusive and interconnected growth.
- ii. Innovation and digitalization to promote the transition to the formal and global economy.
- iii. Sustainable growth for resilient development.

Deliverables

Peru hopes that the above-mentioned priorities will result in work and negotiation with all APEC member economies, and the approval of the following deliverables, whose guidelines will guide the forum's work in the coming years:

- a. Roadmap to promote the transition to the formal and global economy.
- b. APEC policy guidance to develop and implement low-carbon hydrogen policy frameworks in the Asia-Pacific.
- c. APEC Principles for preventing and reducing food loss and waste in the Asia-Pacific.
- d. A new look at the "Free Trade Area of the Asia-Pacific (FTAAP)."

Meetings during the APEC Peru 2024 year

Peru plans to organize more than 160 meetings at different levels, headlines by the Economic Leaders' Summit, which is attended by most heads of state/government of the 21 APEC member economies. Additionally, ten sectorial ministerial meetings will be held, as well as the APEC CEO Summit.

"APEC Ciudadano (Citizen)/APEC for the People" initiative

"APEC for the People" is an initiative created by the Peruvian Ministry of Foreign Affairs that seeks to bring the benefits and opportunities of the forum to Peruvian civil society. It will consist of activities such as technological events, cultural events, musical concerts, presentations in schools/universities, and academic seminars in different regions of Peru.

The activities of "APEC for the People" will take place in addition to the official meetings of APEC 2024 in Peru. For this purpose, experts, officials and leaders participating in the over 160 meetings of APEC Peru 2024 will be invited to join this initiative.

¹ Cities hosting meetings this year - Arequipa, Urubamba (Cusco), Lima, Trujillo and Pucallpa (Ucayali).

Peru's Business and Investment Guide 2024
There are several reasons to invest in Peru. A significant favorable aspect is the country's macro-fiscal strength over the past decades. Both our fiscal deficit and public debt are half the Latin American average. As a result, the Peruvian economy is the second soundest in the region, only behind Chile.

Economic growth projections are promising. For 2024 and 2025, the Central Reserve Bank of Peru (BCRP) expects Peru to grow by 3.1% and 3.0% each year. This growth will be influenced by the recovery of private investment, particularly in mining, with investment commitments for 51 projects valued at USD54.6 billion collectively.

The main minerals to be extracted through these new mining projects will be copper and gold. Additionally, there are two lithium mines, crucial for the manufacture of batteries. The contribution to the Peruvian economy from these projects will be significant and will benefit regional development. It is estimated that the region receiving the most investments could see its mining GDP quadruple with the new projects coming into operation.

Photograph by Daniel Silva / © PROMPERÚ

Another highlight is the development of the Port of Chancay, which is set to become the main logistics hub in South America. This will significantly reduce transport times and costs to markets such as China, India, South Korea, Japan, and the United Arab Emirates. Together, these destinations represent about 95% of Peru's exports to Asia. It is estimated that the transport time from Chancay to Shanghai will decrease from approximately 40 days to 30 days.

Furthermore, the export development over the past decades is evident. The inclusion in the Asia-Pacific Economic Cooperation (APEC) forum in 1998 significantly contributed. Since that year, exports to the bloc already represented more than half of all the country's shipments. Last year, APEC received 66.0% of Peruvian exports valued at USD43.4 billion.

Between 1998 and 2023, exports to APEC have multiplied nearly 15 times. The mining sector represented 69.7% of last year's shipments, but the potential of other industries is evident. For example,

non-traditional agricultural exports, those involving higher added value, increased from USD124 million to USD5.4 billion since the agreement came into effect, multiplying more than 42 times.

Star products such as fresh grapes and blueberries only started being exported in recent years. Over 70% of their shipments are destined for APEC economies. This shows that the benefits of Peru's participation in the bloc have not yet been fully leveraged, and there are multiple products and sectors with export potential waiting to be developed.

The agro-export boom will continue with the execution of new irrigation projects already scheduled. Just the four most emblematic ones will generate 170,000 new hectares of irrigation. These will contribute more than USD4 billion in additional exports, which would mean an increase of over 25% in non-traditional exports, according to the Ministry of Economy and Finance (MEF). It is also estimated that the agricultural GDP could increase by up to 30% with these projects.

Photograph by Daniel Silva / © PROMPERÚ

The growth of the export sector has been significantly boosted by foreign trade policies, resulting in a network of 24 trade agreements that connect Peru with 58 countries, providing preferential market access and ensuring competitive import prices. Currently, the Peruvian government is negotiating new FTAs with Hong Kong, Indonesia, India, Thailand, and United Arab Emirates while also optimizing the existing FTA with China.

Currently, the government is promoting the development of our industries. In recent years, the state has managed to unlock and boost several irrigation projects. Additionally, the Digital Single Information Window for the mining sector (VUD minera) is being developed, which will simplify the estimated time for all procedures to start operations from 2 years to approximately 6 months starting in 2025, according to the Ministry of Energy and Mines.

Moreover, our country is aiming to consolidate a regional technological hub with the development of incubators, startups, and alliances with internationally recognized universities and institutes. Current collaboration between private companies and academia aims to transform the department of Arequipa into a technological hub for Latin America. It already has a considerable group of programmers and will host the 2024 Latin American Innovation and Technology Festival (FLIT).

EY Peru: Challenges to achieve sustained growth

EY Peru
Editor
paulo.pantigoso@pe.ey.com

Peru is one of the countries in Latin America that stands out for its macroeconomic stability, which is one of the nation's most important pillars of competitiveness. Almost uninterrupted economic growth over the past 24 years has consistently contributed to improvement of infrastructure, development of human capital, the adoption of new technologies and the standard of living of all Peruvian citizens. Additionally, a policy of being open to the international market through multiple commercial agreements complements legislation that is favorable to private domestic and foreign investment.

The recognition of Peru's solid economy is based on low inflation (at the close of 2023, there were 26 consecutive years of single-digit inflation), international reserves equivalent to 26.6% of GDP, a controlled fiscal deficit (an average of 2.4% of GDP over the past ten years, and 2.8% at the close of 2023), and public debt that does not exceed 32.9% of GDP at the end of 2023, well below the average of the rest of emerging countries in the world (67.0%) and in the region (68.1%). Additionally, 2023 closes with a trade surplus record of USD17.7 billion; and an estimated GDP growth of 3.1% for 2024, according to the Central Reserve Bank of Peru (BCRP).

Photograph by Leslie Searles / © PROMPERÚ

Thanks to Peru's macroeconomic solidity, it was able to mount the most robust response to COVID-19 in the region, with fiscal measures equivalent to 20% of its GDP. These steps allowed it to achieve a rapid GDP recovery of 13.6% in 2021 and nowadays, it is expected a GDP growth of 3.0%, in average, for the period 2024-2027.

We firmly believe that Peru offers great opportunities for favorable investment, as well as an ideal business climate for investment. Peru's economy is showing indicators of evident recovery within a challenging and constantly changing environment.

This new edition of the Peru's Business and Investment Guide provides the investor with current key information on Peru's economic, legal, tax, labor and financial issues, as well as other information that can be used as a consultation tool for developing activities and making business decisions.

Through this guide, we commit to supporting Peru in its growth by helping businesses get started, grow, and thrive. If you are a foreign investor interested in investing in Peru, you are also welcome to approach the Peruvian diplomatic or consular mission nearest you, listed at the end of this Guide.

At EY we reaffirm our commitment to Peru's development, as well as to the building of a better world for business. We invite you to read this Guide in the hope that it will be of use to discover new initiatives, and we are at your disposal for any assistance you may require.

APEC PERU 2024

APEC

The Asia-Pacific Economic Cooperation (APEC) forum, established in November 1989, is an economic forum composed of 21 Asia-Pacific economies considered the most dynamic region in the world.

The objective of APEC is to promote greater prosperity in the Asia-Pacific region through the implementation of the so-called "APEC Putrajaya Vision 2020-2040" which identifies three pillars: trade and investment; innovation and digitalization; strong, balanced, secure, sustainable, and inclusive growth.

APEC fosters quality economic growth among its members, through economic and technical cooperation, human security, trade, investment, the digital economy, economic inclusion, and support for initiatives to improve sectoral public policies, among other initiatives.

Photograph by Daniel Silva / © PROMPERÚ

Mission

The main objective of APEC is to support economic growth and prosperity in the Asia-Pacific region to build a dynamic and harmonious community, promoting free trade and investment, accelerating regional economic integration, fostering economic and technical cooperation, enhancing human security, and facilitating a favorable and sustainable business environment.

Vision

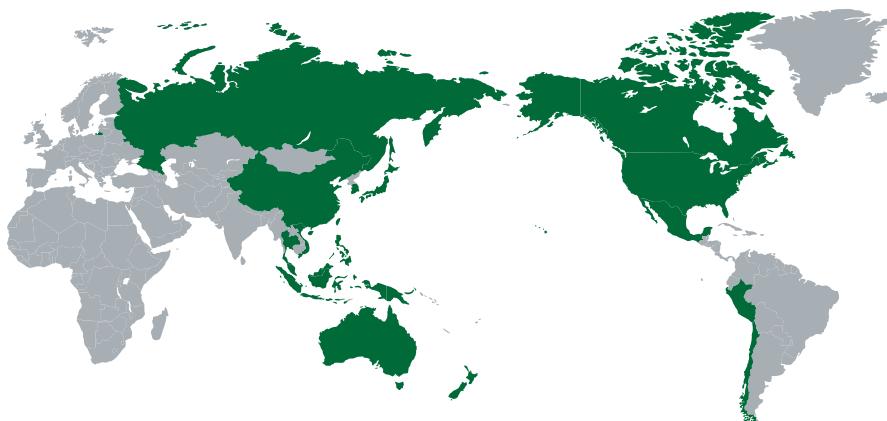

"To become an open, dynamic, resilient, and peaceful Asia-Pacific community by 2040, promoting prosperity for people and future generations."

Principles

APEC's basic principles are equality among its members and consensus decision-making. It is a cooperative space that makes progress based on the agreement and without its members entering into legally binding obligations.

Members

- Australia
- Brunei Darussalam
- Canada
- Chile
- People's Republic of China
- Hong Kong, China
- Indonesia
- Japan
- Republic of Korea
- Malaysia
- Mexico
- New Zealand
- Papua New Guinea
- Peru
- The Philippines
- Russia
- Singapore
- Chinese Taipei
- Thailand
- The United States
- Vietnam

The importance of APEC

APEC is a valuable space to strengthen ties with member economies as it allows Peruvian authorities, especially the President of the Republic and Ministers of State, to interact on equal terms with their counterparts from the other 20 economies.

It should be noted that for the global economy and for the region, the 21 APEC economies together accounted for 62% of the world GDP, 48% of global trade, and 38% of the planet's population in 2022. This forum promotes regional economic integration and competitiveness among its members as it serves as a catalyst for initiatives and an incubator of good practices for the improvement of public policies through cooperation projects.

APEC is constantly interacting with different regional economic integration processes such as the Association of Southeast Asian Nations (ASEAN); the World Trade Organization (WTO); the Regional Comprehensive Economic Partnership (RCEP); the Comprehensive and Progressive Agreement for Trans-Pacific Partnership (CPTPP); among others.

Operation of the APEC year

Each year, the economy that holds the APEC presidency organizes its meetings based on four large blocks of events, called SOM-Senior Officials' Meetings. At the end of the year prior to its APEC presidency, the economy hosts an informal kick-off meeting of the year called the Informal Senior Officials (ISOM). The ISOM officially represents the launch of the APEC year and is the moment in which the motto and priorities defined by the host economy are revealed.

In addition to the SOM, it should be noted that during an APEC year, more than 160 events of different levels are held, culminating with the Meeting of Economic Leaders that brings together the heads of state and/or government of the 21 member economies of the forum.

Other related APEC events include sectoral ministerial meetings; committees and subcommittees; working groups and experts; meetings of the APEC Business Advisory Council (ABAC) and the APEC Business Summit, as well as national and international seminars, symposiums, and workshops for institutional capacity building.

Photograph by Daniel Silva / © PROMPERÚ

APEC for Peru

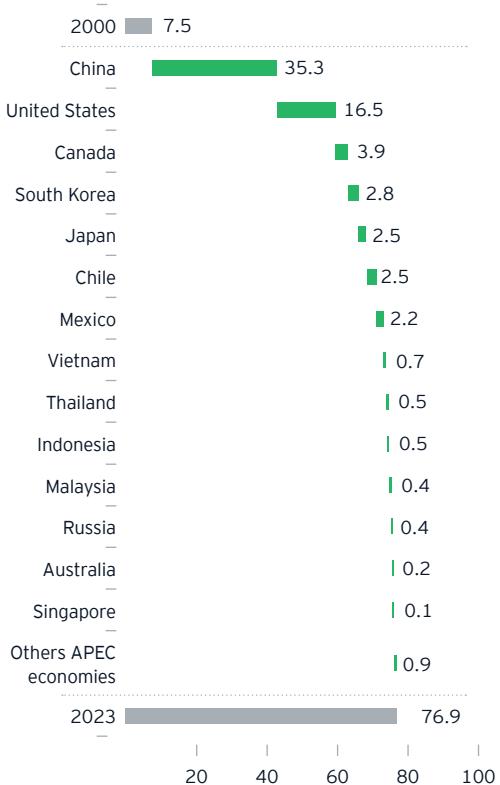

Peru has been part of APEC since 1998. Membership of this forum represents a relevant milestone for Peruvian foreign policy as it has allowed the economy to consolidate its international projection in the Asia-Pacific region, the most innovative, dynamic, and fastest growing in the world.

The more than 160 events planned for APEC 2024 will contribute to the post-pandemic economic reactivation and encourage income opportunities for sectors related to accommodation, transportation, food, and tourism, among others.

This forum has further opened the doors of the world to us, connecting us with the largest markets and fostering opportunities for more inclusive and sustainable development. In addition, it has contributed to inserting Peruvian companies in regional and global value chains and to the internationalization of SMEs.

In short, the APEC 2024 presidency represents the opportunity to favor the development of social diplomacy to face the great economic-social challenges of Peru, through economic and technical cooperation.

Peruvian terms of trade by APEC economies, 2000 - 2023 variation (in USD billion)

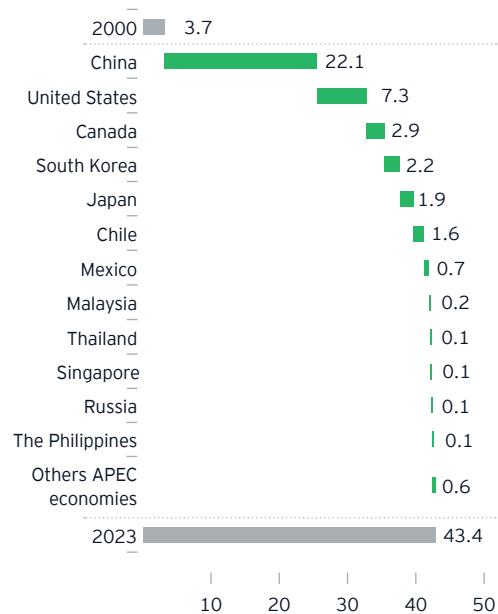

Source: National Superintendency of Customs and Tax Administration (SUNAT).

Results and impact of APEC

- ▶ According to ComexPerú, since we joined APEC in 1998, Peru's trade with member economies has grown, on average, 12% per year. 66% of Peru's trade in goods occurs with APEC economies.
- ▶ In 2022 around 5,200 Peruvian companies exported goods to the APEC zone for a total amount of USD42.5 billion, while imports from APEC reached USD40.0 billion.
- ▶ Likewise, bilateral free trade agreements have been negotiated with important APEC economies such as China, Singapore, Thailand, the United States, Canada, South Korea, Chile, Mexico, Japan and Australia. Based on FTAs with these economies, approximately 1,500 SMEs and 2,200 MSMEs trade more efficiently with the Asia Pacific.
- ▶ APEC has also been a platform to promote the Comprehensive and Progressive Agreement for Trans-Pacific Partnership (CPTPP), to which Peru has been a State Party since September 18, 2021.
- ▶ In addition, the realization of events in different regions of Peru, leads to improvements in infrastructure for international meetings.

- ▶ The APEC PERU 2016 presidency fostered the visit of more than 1,200 entrepreneurs from Asia-Pacific, which in turn generated investment opportunities for approximately USD9.4 billion.

Special Highlight

APEC's Impact on Citizens

During the APEC PERU 2024 presidency, the "APEC Citizen Peru 2024" initiative will be implemented, which will aim to bring the forum closer to civil society through the realization of technological, and cultural events, presentations in schools/universities or seminars with experts, officials, artists, and academics of APEC member economies.

Between 2016 and 2021, Peru received USD2.8 million as APEC funds allocated to finance 36 projects. In 2023, the APEC found were USD4 million, financing 35 projects.

The funds earmarked for Peru were mainly directed to finance projects presented to the Committee on Trade and Investment, as well as to the following Working Groups of the Committee on Economic and Technical Cooperation: Small and Medium-sized Enterprises; Science, Technology, and Innovation; Food safety; Public Health; Oceans and Fisheries; Transport; Group of Experts on Illegal Logging and Associated Trade; and Women and the Economy. This data reveals the importance of the economic and technical cooperation offered by APEC to Peru.

Peruvian - Chinese Business Council

On 28th June 2024, a Memorandum of Understanding (MOU) established the Peruvian - Chinese Business Council to promote bilateral trade and investment.

The founding member institutions of the Peruvian - Chinese Business Council are:

- ▶ Peruvian Association of Exporters (Asociación Peruana de Exportadores - ADEX)
- ▶ Lima Chamber of Commerce (Cámara de Comercio de Lima - CCL)
- ▶ Foreign Trade Society of Peru (Sociedad de Comercio Exterior Del Perú - ComexPeru)
- ▶ Peruvian-Chinese Chamber of Commerce (Cámara de Comercio Peruano China - CAPECHI)
- ▶ National Association of Industries (Sociedad Nacional de Industria - SNI)
- ▶ Chinese Council for the Promotion of International Trade (Consejo Chino para la Promoción del Comercio Internacional - CCPIT).

APEC Agenda 2024

During the APEC Peru 2024 presidency, Peru will promote an agenda that has a positive impact on its domestic policy, seeking to empower people, especially those in vulnerable situations such as women and youth, SMEs, and informal enterprises, among others; that is, to give them the tools to participate in the benefits of the global economy in conditions of competitiveness and promoting their economic and social inclusion.

Within this framework, the exchange of successful cases and good practices in the application of public policies on issues such as inclusive trade and investment will be encouraged; innovation to promote the transition to the formal and global economy; food security; the internationalization of SMEs; women's economic empowerment; the digital economy and financial inclusion; the use of renewable energies and green hydrogen.

Agenda 2024

Date	Event	City
December 4-6, 2023	Symposium on APEC Peru 2024 Priorities and Informal Senior Officials Meeting (ISOM)	Lima
February 21-24, 2024	Finance and Central Bank Deputies Meeting (FCBDM)	Arequipa
February 24 - March 8, 2024	Senior Officials' Meeting 1 (SOM1)	Lima
May 4-16, 2024	Second Senior Officials' Meeting and Related Meetings (SOM2)	Arequipa
May 16, 2024	High-Level Policy Dialogue on Women and the Economy (HLPDWE)	Arequipa
May 17, 2024	Joint Meeting of Ministers Responsible for Trade and Ministers for Women	Arequipa
May 17-18, 2024	Ministers Responsible for Trade (MRT) Meeting	Arequipa
May 27-30, 2024	Senior Finance Officials' Meeting (SFOM) and Related Meetings	Urubamba (Cusco)
June 5-9, 2024	Tourism Ministerial Meeting (TMM) and Related Meetings	Urubamba (Cusco)
June 24-25, 2024	AELW First Pre-Advance visit	Lima
August 12-18, 2024	Food Security Ministerial Meeting (FSMM) and Related Meetings	Trujillo
August 16, 2024	Energy Ministerial Meeting (EMM)	Lima
August 18, 2024	13 High-Level Meeting on Health and the Economy (HLMHE)	Lima
August 12-25, 2024	Senior Officials' Meeting 3 (SOM3)	Lima
August 22-23, 2024	Peru APEC Study Centers Consortium Conference 2024	Lima
September 9-13, 2024	Small and Medium Enterprises Ministerial Meeting (SMEMM)	Pucallpa (Ucayali)
September 10, 2024	APEC High-Level Dialogue on Mining - visit to Cerro Verde mining complex	Arequipa

Government

Peru is a constitutional democratic republic with a multi-party system. Under the current Constitution of 1993, the President is the Head of State and Government, elected for a five-year period, without the possibility of running for immediate re-election. The President designates the Prime Minister and the rest of the Cabinet. There is a 130-member unicameral Congress elected for a five-year term. Bills may be proposed either by the Executive or by the Legislative Branches, and they become law after being passed through Congress and enacted by the President of the Republic of Peru. The Judiciary and the National Electoral Board are independent institutions.

The Peruvian Government is directly elected and voting is compulsory for all citizens between the ages of 18 and 70.

Country overview

- **Type of Government**

Constitutional Republic

- **Legal System**

Constitutional State of Law based on laws and codes

- **Executive Branch**

- President of the Republic: Dina Boluarte Zegarra, Head of State and Government
- Elections: Every five years by popular vote (consecutive re-election is not permitted).
- Cabinet: The Cabinet is appointed by the President of the Republic

- **Legislative Branch**

- Unicameral Congress
- 130 seats
- Members are elected by popular vote for a period of five years

• **Judiciary Branch**

- Judges are appointed by the National Judge Selection

• **Main Autonomous Entities**

- Constitutional Court
- National Electoral Board
- Controller General's Office
- Central Reserve Bank of Peru (BCRP)
- Superintendency of Banking and Insurance and Private Pension Fund Management Companies (SBS)

• **Regional Governments**

25 Regional Governments (including the Constitutional Province of Callao)

• **Local Governments**

- 196 Provincial Municipalities
- 1,695 District Municipalities

• **International Relations**

- Member of the United Nations since 1945 and a member of the Security Council in 2006 and 2007.
- Member of the World Trade Organization (WTO) since 1995.
- Member of the Pacific Alliance since its creation in 2011; assuming currently the pro-tempore Presidency (2023-2024)
- In 1998, it became a member of the Asia Pacific Economic Cooperation (APEC)
- Peru hosted the APEC and EU-LAC summits in 2008 and the Arab-South American Summit (ASPA) in 2012. In 2013, Peru hosted the World Economic Forum on Latin America. Furthermore, it was the site of the COP 20 (Climate Summit organized by the UN) in 2014. It hosted the World Bank (WB) and International Monetary Fund (IMF) Annual Assembly in 2015. It also hosted the Asia Pacific Economic Cooperation (APEC) Summit in 2016. Likewise, it hosted the Summit of the Americas in 2018.
- Peru has entered into several economic cooperation and Free Trade Agreements (FTAs) with many countries.
- In 2024, it is the host of the Asia Pacific Economic Cooperation Forum (APEC) for the third time.

2

Geography

Peru is located on the west central coast of South America. It is bordered by the Pacific Ocean to the west, by Chile to the south, by Brazil and Bolivia to the east, and by Colombia and Ecuador to the north. With a total land area of 1,285,215.60 km², Peru is the third largest country in South America after Argentina and Brazil, and can be divided geographically into three natural regions:

- ▶ The Coast, a narrow strip measuring approximately 3,080 km long. Although it accounts for only 11.7% of Peru's territory, it is home to approximately 19.9 million inhabitants. Lima, the political and financial capital of the country, is located in this Region.
- ▶ The Highlands, or Sierra, is the site of the Andean Mountain Range, covering 27.9% of the national territory and serving as home to approximately 9.0 million inhabitants. This Region contains the country's major mineral deposits.
- ▶ The Amazon Rainforest or Selva is the largest region and occupies 60.4% of the country's territory, rich in petroleum and forest resources. There are approximately 4.8 million inhabitants in this area.

Overview

• Population

33.7 million (2023)

- ▶ Urban: 82.6%
- ▶ Rural: 17.4%

• Area

1,285,215.60 km²

• Main Languages

Spanish, Quechua and Aymara

• Climate

Ranges from tropical in the Amazon Region to dry along the Coast, and temperate to very cold in the Highlands

• Religion

Freedom of Religion, mainly Roman Catholic

• Time Zone

GMT - 5 (Greenwich Mean Time minus five hours). There is no daylight saving time, and there is only one time zone throughout the entire country

• Natural Resources

Gold, copper, silver, zinc, lead, hydrocarbons, fisheries, phosphates and agricultural products such as grapes, avocado, coffee, potato, rice, cotton, asparagus, cocoa and organic banana, artichokes, sugar, quinoa, blueberries and corn

Source: Central Reserve Bank of Peru (BCRP), National Institute of Statistics and Information (INEI).

3

Population, occupation and human development

The projected population of Peru for 2023 is approximately 33.7 million of which approximately 12.3 million reside in Lima (including the population of the Constitutional Province of Callao). The national workforce (total Economically Active Population - EAP) is estimated at around 18.2 million people.

The main religion is Roman Catholicism, and the principal official languages are Spanish and Quechua. The Aymara language is also spoken, mostly in the Southern Highland Region, along with various other native languages, particularly in the Amazon Jungle Region. The literacy rate is 94.9% in the population over 15 years of age.

Population summary (projection for 2023)

• **Population**

- 33.7 million
- 82.6% live in urban areas

• **Age Range**

- 0 - 14 years old: 24.1%
- 15 - 59 years old: 62.3%
- 60 years or older: 13.6%

• **Growth Rate**

- 0.99%

• **Birth Rate**

- 15.5 births / 1,000 people

• **Mortality Rate**

- 5.2 deaths / 1,000 people

• **Gender Ratio**

- 1.02 female / male

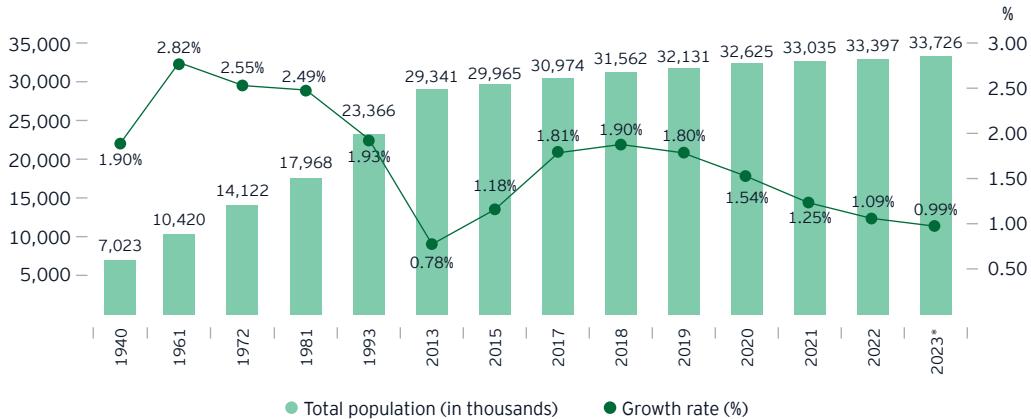

• **Life Expectancy at Birth**

- 77.2 years

Evolution of the population pyramid

*Projection.

Source: National Institute of Statistics and Information (INEI).

Of the total Peruvian population, 62.3% is between the ages of 15-59, while the Economically Active Population (EAP) as of 2023 was 53.6% of the total, giving Peru a "demographic bonus" effect, which may be simply explained as the structural benefit of its population being of an age to produce and consume. It is estimated that this high percentage of workforce will extend its maximum registration period for up to two

and a half more decades, and the power of this "demographic bonus" is that of fostering greater production, consumption, savings, and investment. Perhaps the most important issue of this demographic overview is that it will provide the country with the conditions to make the necessary public and private investments in order to cover the demands and opportunities that arise from the consumption of its

"demographic bonus" period. According to the information provided by the National Institute of Statistics and Information (INEI) and the Peruvian Association of Market Research Companies (APEIM) the distribution by levels of social structure of Peru has undergone significant changes, if its behavior in recent years is taken into account.

In 2023, there was an increase in socioeconomic levels (SELs) C and D, which account for 56% of the country's urban and rural population. In Metropolitan Lima, the social structure shows a stronger middle class with a higher purchasing power and equal conditions.

Projected population by regions in thousands (2023)

Coinciding with the population percentages by Region, the three most populous regions of Peru belong to the Coast Region: Lima, Piura, and La Libertad, followed by Arequipa, Cajamarca, Cusco, and Junín.

In 2023, the national illiteracy rate totaled 4.8% of the population aged 15 and over. Thus, considering the total national population aged 15 and over, the illiterate rural population represented 11.5%, while the percentage in urban areas came to 3.4%. These percentages keep decreasing year by year.

Poverty and Employment

The boost of economic growth together with the coverage of social programs have contributed to the relief and reduction of poverty.

According to the National Institute of Statistics and Information (INEI), in 2023, the poverty rate was 29.0% of the population, with 5.7% living in extreme poverty.

Total incidence of poverty (%)

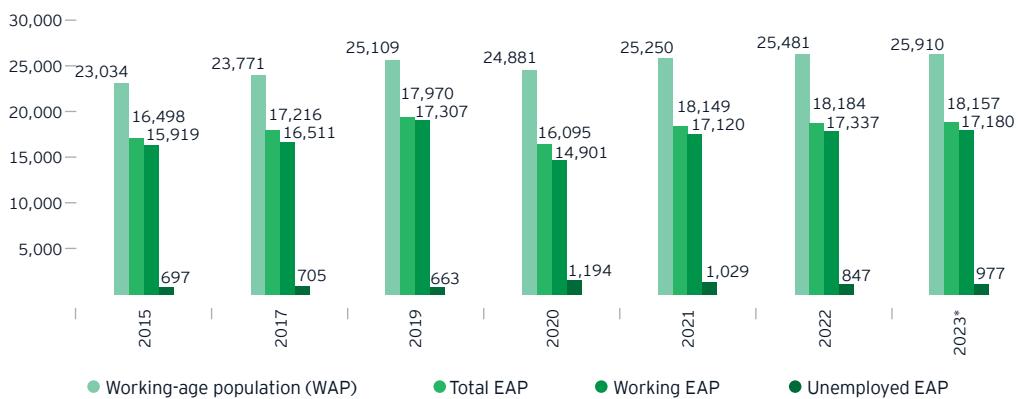

Source: National Institute of Statistics and Information (INEI), United Nations International Children's Emergency Fund (UNICEF).

In 2023, the country's Economically Active Population (EAP) increased to 18.2 million people, and the employed EAP totaled 17.2 million.

Gini Index

The Gini Index measures income inequality. This indicator is a number ranging from zero to one, where zero implies perfect equality in the distribution of income and one implies perfect inequality (in other words, as if there were a single person or household that concentrated all the income). This coefficient is calculated for Latin America as follows:

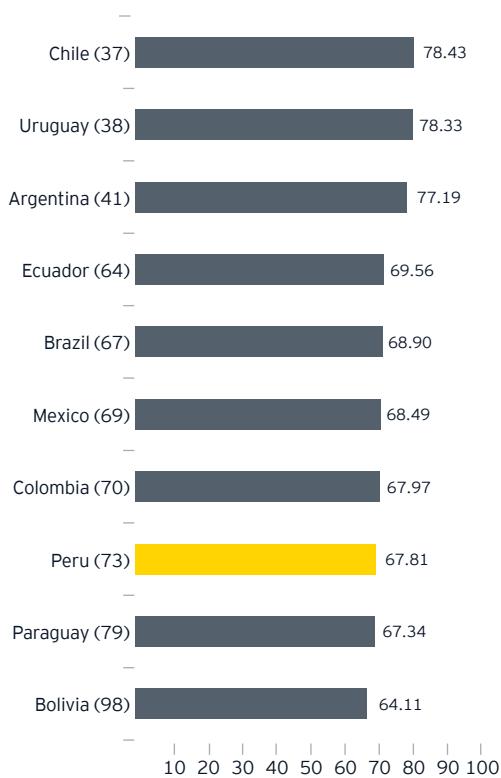

Latin America	Gini 2022
Argentina	0.378
Bolivia (2021)	0.418
Brazil	0.514
Chile	0.445
Colombia	0.563
Costa Rica	0.484
Ecuador	0.447
El Salvador	0.402
Guatemala (2014)	0.535
Honduras (2021)	0.535
Mexico	0.441
Nicaragua (2014)	0.495
Panama	0.496
Paraguay	0.471
Peru	0.414
Dominican Republic	0.381
Uruguay	0.401
Venezuela (2014)	0.378

Social Progress Index

The Social Progress Index, developed by Social Progress Imperative, integrates social and environmental indicators into three large groups: Basic Human Needs, Wellbeing and Opportunity. Peru is considered to be in the Upper Middle Social Progress tier, with a score of 67.81 points, ranking 73 out of the 169 countries analyzed.

Human Development

The Human Development Index (HDI) is a compound index that measures the average advances in three basic groups of human development: a long and healthy life; knowledge; decent standards of living, via the combination of indicators for life expectancy, educational achievements, and income. The HDI defines a minimum and maximum value for each group (called “objectives”) and then

shows the position of each country with regard to these objective values, expressed in the form of a value between 0 and 1. According to the 2022 Human Development Report issued by the United Nations Development Program (UNDP) the ranking and evolution of the six principal countries in Latin America are as follows:

Ranking	Classification by Country	2000	2011	2015	2020	2021	2022	Growth Rate 2022/2000
	World Total	0.639	0.692	0.717	0.737	0.732	0.739	16%
	Latin America and The Caribbean	0.683	0.739	0.751	0.766	0.754	0.763	12%
Very High Human Development								
44	► Chile	0.759	0.817	0.847	0.851	0.855	0.860	13%
48	► Argentina	0.755	0.81	0.827	0.845	0.842	0.849	12%
High Human Development								
77	► Mexico	0.723	0.773	0.762	0.779	0.758	0.781	8%
87	► Peru	0.679	0.738	0.74	0.777	0.762	0.762	12%

Currency and exchange rate

The official currency of Peru is the Sol (PEN - S/). The country has a free-floating exchange rate regime, with the government occasionally intervening for purposes of stabilization.

The Sol is one of the least volatile currencies in the world, exhibiting firmness in the face of international market and currency fluctuations. The Central Reserve Bank of Peru (BCRP) implements fiscal stimulus and liquidity control measures. There are no restrictions or limitations on the number of bank accounts in foreign currency or the remittance of funds abroad that an individual or legal entity may make.

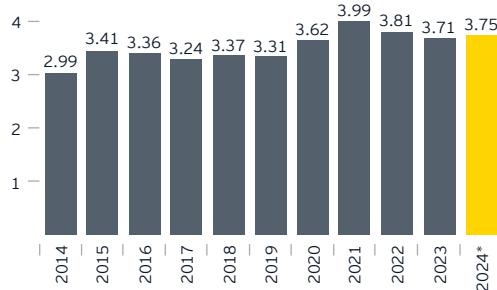

Appreciation / Depreciation and inflation

The annual depreciation rate of the Sol against the US Dollar for 2023 was 2.5%. As at May 31, 2023, banks were buying US Dollars at PEN3.744 and selling them at PEN3.753. The parallel market has very similar exchange rates.

Likewise, annual appreciation is expected to be 0.3% until the end of the year.

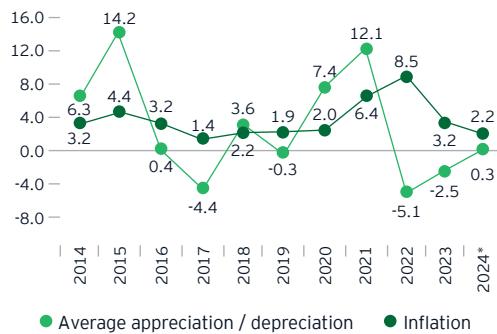

As of the end of 2023, the inflation rate in Peru was 3.2%. It is estimated that, for the end of 2024, inflation rate will be 2.2%, which will be below the target range proposed by the Central Reserve Bank of Peru (BCRP).

• **Principal Countries of Origin of Imports to Peru**

- ▶ China, United States, Brazil, Argentina, Mexico, Chile, Colombia, Canada, Ecuador and Germany.

• **Principal Imports**

- ▶ Petroleum and byproducts, electronic items, plastics, machinery, vehicles, iron and steel, wheat and paper.

Peru has rich deposits of copper, silver, gold, lead, zinc, natural gas, and petroleum. Due to climate variations in its regions, as well as its natural and cultural resources, it is internationally classified as a mega-diverse country.

Peru's economy reflects its varied geography. The abundance of resources is found mainly in mineral deposits in the mountainous regions, while its extensive maritime territory has always traditionally yielded excellent fishing resources. Despite the fluctuations of the world economy, the administration has used the savings generated by the high prices of commodities between 2006 and 2008 and 2011 and 2012 to invest in infrastructure and in social aid programs.

Sources: Central Reserve Bank of Peru (BCRP), Ministry of Economy and Finance (MEF), National Institute of Statistics and Information (INEI), International Monetary Fund (IMF).

The Peruvian economy has strong macroeconomic indicators thanks to the implementation of a countercyclical macroeconomic policy and a favorable external environment. Accordingly, following a drop in GDP of 11.0% in 2020, Peruvian economy had a rapid recovery of 13.6% in 2021. Additionally, the Peruvian economy would grow 3.0% annually on average between 2024 and 2027, according to estimates by the Ministry of Economy and Finance.

Peru also stands out for its controlled inflation, with anchored expectations with the target range set by the Central Reserve Bank of Peru (BCRP) (between 1% and 3%), thus reporting the lowest rates out of all the countries that follow this same system in Latin America. In fact, 2024 will mark 27 years of single-digit annual inflation rates.

The Peruvian economy is likewise notable for its gross public debt ratio, which is 32.9% of the GDP in 2023, significantly lower than that of emerging economies (67.0% of GDP) and Latin America (68.1% of GDP).

Peru is estimated to maintain a comfortable level of international reserves. As at December 31, 2023, these reserves total USD71.0 billion, equivalent to 26.6% of the GDP.

As a result of the estimated evolution over the coming years of its public finances and its economy in general, Peruvian long term debt has maintained its credit S&P: BBB- / Fitch Rating: BBB / Moody's: Baa1), with a stable outlook.

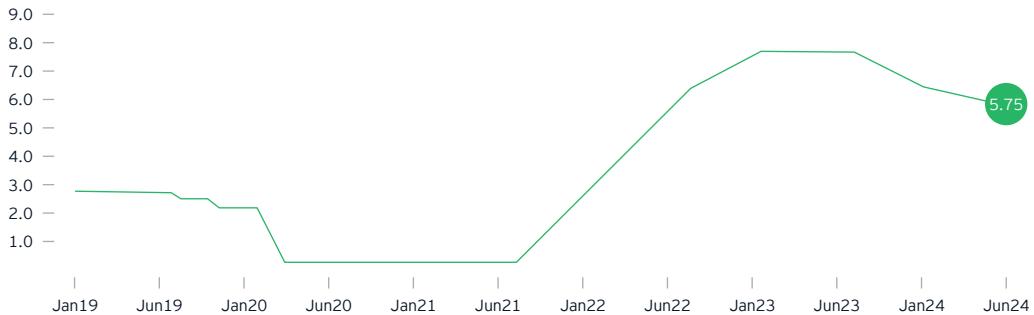

It should be noted that Peru is a member country of the Pacific Alliance, an entity that seeks to free up the commercial exchange of goods and services, the free circulation of people and capital, and promote cooperation mechanisms between the member countries, i.e. Chile, Mexico, and Colombia. Peru is also following a Country Program executed with the Organization for Economic Cooperation and Development (OECD) to strengthen its public policies.

Peru's response to the economic impact of COVID-19 has been one of the most notable in the world, especially in its efforts to counteract the effects of the economic emergency. The macroeconomic soundness achieved through years of tax prudence and a well thought out monetary policy have allowed Peru to maintain stability and provided it with sufficient resources to tackle the crisis.

Monetary policy has been expansive, with an interbank interest rate among the lowest in the region with a view to ensuring the liquidity of the economy.

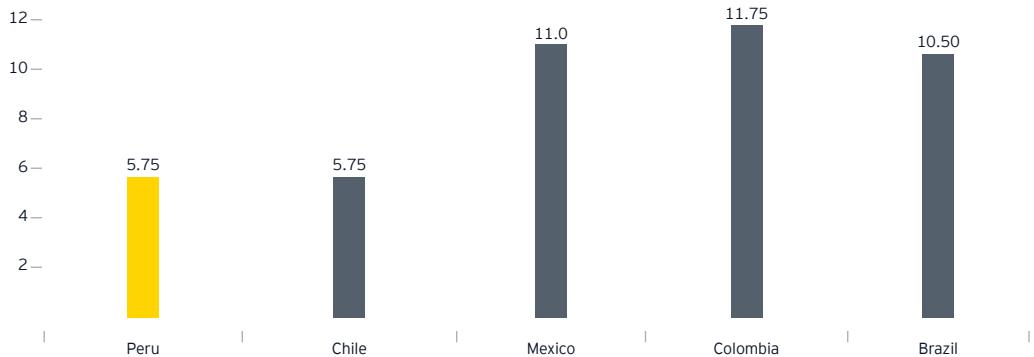

Monetary policy interest rate (%)

Source: Central Bank of Peru (BCRP).

Monetary policy interest rates in emerging economies - June 2024 (%)

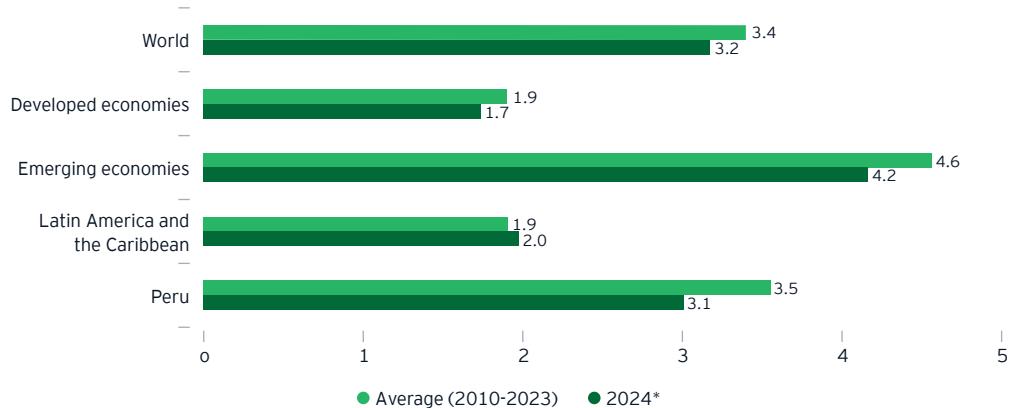

Source: Central Banks of each country.

With the referred measures Peru was able to attain one of the highest growth and recovery rates in 2021 (13.6%) well above those of the emerging economies (6.7%) and the remaining countries of Latin America and the Caribbean

(6.8%) according of the International Monetary Fund (IMF). Thus, Peru has resumed the positive growth path in 2022 (2.7%) and is projected to maintain it in 2024 (3.1%).

6

Country risk and investment grade

Peru has one of the highest investment grade ratings in the region. The factor that support this rating is the solid economic prospect reflected in growth projections of 3.1% and 3.0% of the Gross Domestic Product (GDP) for the years 2024 and 2025. These economic forecast are backed by the drop in tax and external vulnerabilities, thus attaining growth with low inflation rates and strong macroeconomic policies. As a result Peru has obtained the investment grade and attracted international attention.

Recently, an increasing number of multinational corporations have been looking at Peru with greater interest. The subsequent increase in jobs and decrease in poverty will predictably help improve social welfare.

The progress made in watching out for the tax results, the promotion of investment in important job creation sources (such as infrastructure, mining, hydrocarbons and telecommunications) the implementation of tenders as a specific “countercyclical” measure in response to the economic slowdown, as well as the measures taken to modify the tax system included in Sections 5 and 6 of this Guide (Taxes and Labor and Employment Law, respectively) allow us to observe how Peru channels its development towards improving its investment grade.

Country risk (EMBIG)

As of May 31, 2024, Peru had a country risk of 156 base points, positioning itself as one of the countries with the lowest risk in Latin America. This score is less than half of the regional average (382 points).

As may be seen in the following charts, Peru's level of inflation is one of the lowest in Latin America, with a rate of 3.2% in 2023, well below the regional average (16.6%). In addition, over the past decade, the Peruvian economy had the lowest average annual inflation rate among the largest economies in Latin America, at 3.6%, below that of Chile (4.5%) Colombia (4.9%) and Brazil (6.0%).

Business environment

1

Investment promotion conditions

Legislation and trends in foreign investment in Peru

Peru seeks to attract both domestic and foreign investment in all sectors of the economy. To achieve this, it has taken the necessary steps to establish a consistent investment policy that eliminates any barriers that foreign investors may face. As a result, Peru is considered a country with one of the most open investment systems in the world.

Peru has adopted a legal framework for investments that requires no previous authorization for foreign investment. In this regard, foreign investments are allowed without restrictions in the large majority of economic activities. Activities with restrictions are very specific, such as air transportation, sea transportation, private safety and surveillance and the manufacture of war weaponry.

Additionally, Peru has a legal framework to protect the economic stability of investors and to reduce government interference in economic activities. The Peruvian Government may guarantee legal stability to national and foreign investors with regard to the legislation governing income tax and specifically, distribution of dividends. Foreign investors with the right to request the execution of a legal stability agreement are those willing to invest in Peru for a period of no less than two years and for a minimum amount of USD10 million in the Mining and/or Hydrocarbons sectors, or USD5 million in any other economic activity.

Peru's legal provisions, regulations, and practices do not discriminate between domestic and foreign corporations. There are no restrictions on repatriation of profits, international transfers of capital, or foreign exchange practices. The remittance of interest and royalties is also not restricted in any way. Foreign currency may be allocated to acquire goods or cover financial obligations, provided the operator complies with Peruvian tax laws.

Favorable legal framework for foreign investors

Peru offers a legal framework¹ that protects foreign investors' interests by offering them:

- ▶ An equal and non-discriminatory treatment
- ▶ Unrestricted access to the majority of economic sectors
- ▶ Free capital transfer

Additionally, Peruvian and foreign investors are provided with:

- ▶ Right to free competition
- ▶ Guarantee of private property (no expropriations or nationalizations)
- ▶ Freedom to acquire shares in Peruvian corporations
- ▶ Freedom to access internal and external credit

- ▶ Freedom to transfer royalties and profits from their investment
- ▶ Simplicity for most operations, whether in local currency (Sol) or U.S. Dollars, without foreign exchange controls.
- ▶ A country with a vast network of investment agreements and membership in the Investment Committee of the Organization for Economic Co-operation and Development (OECD)

Direct foreign investments must be registered with the Private Investment Promotion Agency (ProInversión).

Foreign investors may remit abroad the net profits (without any restriction whatsoever) from their registered investments, as well as transferring their shares, ownership interests, or participatory rights, perform capital reductions, and dissolve or wind-up their companies.

¹ Constitutional provisions; "Foreign Investment Act," Legislative Order (Decreto Legislativo) 662; "Framework Law for the Growth of Private Investment," Legislative Order 757; as amended, and Regulations thereof. Taken from ProInversión.

Recognition of favorable investment climate

According to the latest Global Competitiveness Index ranking published in 2019, Peru is among the top countries in Latin America in terms of macroeconomic framework, health, market size, goods market, and financial system.

	2018		2019

Business Climate Index of Latin America

The Business Climate Index (BCI) is the result of the Latin American Business Survey, carried out by the IFO Institute of Germany and the Getúlio Vargas Foundation of Brazil. This survey is prepared every three months and serves for the monitoring and anticipation of the financial trends of the countries and financial blocs.

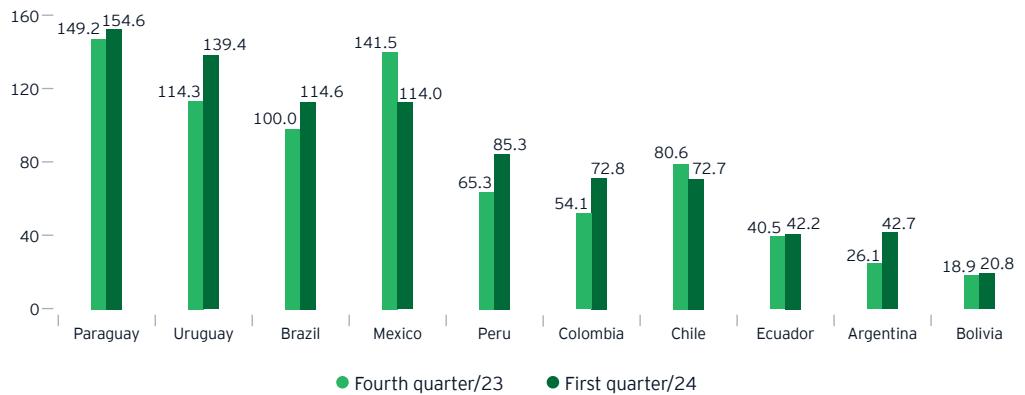

As of the first quarter of 2024, Peru reached 85.3 points, ranking fifth.

Business Climate Index (BCI) in the following country (Q1, 2024)

Position	Country	ICE
1	Paraguay	154.6
2	Uruguay	139.4
3	Brazil	114.6
4	Mexico	114.0
5	Peru	85.3
6	Colombia	72.8
7	Chile	72.7
8	Ecuador	42.2
9	Argentina	42.7
10	Bolivia	20.8
Latin America		105.7

Index of Economic Freedom

According to the Index of Economic Freedom prepared by The Heritage Foundation, which includes an analysis of the environment and economic freedom of each country based on ten indicators covering issues such as compliance with the law, the level of government intervention, market openness, and efficient State regulations, the overall results obtained confirm that promoting economic freedom in terms of the rule of law, government, regulations, and open markets generates a broad economic dynamism. Thus, boosting these levels will prove significant in order to sustain the wealth of nations, as well as being the most effective way to eradicate poverty in a progressive manner.

Promotion mechanisms for investment in infrastructure and utilities

1. Promotion for Private Investment

Since 1993, the Peruvian Government has been striving to promote national and foreign private investment. This journey begins with the Peruvian Constitution (1993), the backbone to incentivize and guarantee private investment through one of the most attractive legal frameworks in the region.

One of the fundamental principles of investment promotion under Peruvian law is the principle of non-discrimination of foreign and local (Peruvian) investors.

Peru seeks to attract both domestic and foreign investment in all sectors of the economy. To achieve this, it has taken the necessary steps to establish a consistent investment policy that eliminates any barriers that foreign investors may face. As a result, Peru is considered a country with one of the most open investment systems in the world.

Peru has adopted a legal framework that requires no previous authorization for foreign investment. In this regard, foreign investments are allowed with certain restrictions in most economic activities. Those activities subject to restrictions are very specific. Furthermore,

For further details, EY, the Ministry of Foreign Affairs (MRE) and ProInversion have compiled the Guide to Investing in Infrastructure Projects in Peru.

You can download this Guide for free in: https://www.ey.com/es_pe/infrastructure/guide-to-investing-in-infrastructure-projects-in-peru

Peru has a legal framework designed to protect the economic stability of investors and to reduce government interference in economic activities.

a. The Peruvian Constitution

The Peruvian Constitution establishes the principles to incentivize private investment through the following key provisions:

- Peruvian and foreign investments are subject to the same conditions. As a result of this constitutional provision, none of the laws, regulations, and practices in force in Peru discriminate between Peruvian and foreign corporations.
- Property rights are guaranteed by the Peruvian Government. No one may be deprived of their property, except for reasons of national security or public necessity established by law, and with a prior cash payment to the owner of the property in accordance with the appraised value, which shall include compensation for potential damages.

All foreign persons and/or entities shall receive the same treatment as Peruvians. However, within a radius of fifty (50) kilometers from all national borders, foreigners may not acquire or possess, under any title, either directly or indirectly, mines, land, forests, water, fuel or energy sources, whether individually or as part of a partnership, under penalty of losing such possessions to the Peruvian Government. The sole exception to this provision are cases of public necessity, expressly established by Executive Order.

- ▶ The Peruvian Government guarantees the free possession and disposal of foreign currencies. As such, there are no restrictions on the remittance of profits, international capital transfers, or foreign exchange practices.
- ▶ Private economic initiative is free.
- ▶ Freedom of contract guarantees that the parties can negotiate in accordance with the rules in force at the time they enter into the contract. The terms and conditions of the contract cannot be amended by laws or any other provision.

b. Regulations and Standards that Incentivize Private Investment

The Peruvian Constitution is not the only body of law that incentivizes private investment. Peru offers a favorable and attractive legal framework that protects the interests of foreign investors by offering them:

- ▶ Equal, non-discriminatory treatment
- ▶ Unrestricted access to most economic sectors
- ▶ Free capital transfer

Additionally, Peruvian and foreign investors have:

- ▶ The right to free competition
- ▶ Guarantee of private property (as a rule, no expropriations or nationalizations)
- ▶ Freedom to acquire shares of stock in Peruvian corporations
- ▶ Freedom to gain access to internal and external credit
- ▶ Freedom to transfer profits from their investments in Peru abroad and to pay royalties to non-domiciled entities
- ▶ Simplicity of most transactions, whether in local currency (Sol) or United States dollars, without exchange controls.

The main laws and regulations regarding the promotion of foreign private investment are:

- ▶ Legislative Order (Decreto Legislativo) 662—the Legal Stability Regime for Foreign Investments:

Under this law, the Peruvian Government incentivizes and provides guarantees to foreign investors in all sectors of economic activity and any of the commercial or contractual forms permitted by national law.

- ▶ Legislative Order (Decreto Legislativo) 757—Legal Framework for the Growth of Private Investment:

This law seeks to guarantee free initiative and private investments, whether already made or to be made in the future, in all sectors of economic activity. It establishes rights, guarantees, and obligations applicable to all individuals or entities, whether Peruvian or foreign, who invest in Peru.

2. Public-Private Partnerships (PPP)

A Public-Private Partnership (PPP) is a form of participation in private investment that involves experience, knowledge, equipment, technology, and the distribution of risks and resources, preferably private, for the purpose of creating, developing, upgrading, operating, or maintaining public infrastructure; providing public utilities and/or providing services related to those required by the government, as well as developing applied research and/or technological innovation projects.

a. Legal Framework

Public-Private Partnerships (PPP) are mainly governed by the provisions of:

- (i) Legislative Order (*Decreto Legislativo*) 1362 (hereinafter, the "PPP Act")
- (ii) The Regulations on the PPP Act approved by Executive Order (*Decreto Supremo*) 240- 2018-EF (hereinafter, the "Regulations on the PPP Act").
- (iii) Legislative Order (*Decreto Legislativo*) 1543, which provides for measures to improve project management and private investment promotion processes and amends the Regulations on the PPP Act.
- (iv) Regulations on Legislative Order (*Decreto Legislativo*) 1543, as approved by Executive Order (*Decreto Supremo*) 211-2022-EF.

This legal framework is applicable to all entities in the non-financial public sector, at all levels of government.

PPPs allow the private sector to contribute experience, knowledge, equipment, and technology to the financing, construction, operation, and maintenance of public infrastructure and/or the provision of a service. For its part, the government retains the property rights over the project's infrastructure, including the new facilities built by the private investor. Generally, after the contract expires, the property is transferred to the government.

b. PPP Phases

PPPs are carried out in five phases, as described below:

1. Planning and Programming

Takes the form of the Multiannual PPP Investment Report (IMIAPP).

2. Drafting

Project design and/or evaluation.
Drafting of the Evaluation Report.

3. Structuring

Approval of the Promotion Plan, inquiries with institutions, and design of the PPP agreement.

4. Transaction

Public tender or comprehensive project bidding process or other competitive process. This phase concludes with the execution of the PPP agreement.

5. Contractual Performance

Project investment, operation, and maintenance phase. It includes monitoring and supervision of contractual obligations.

c. PPP Types

PPPs may be self-financed or co-financed.

► **Self-financed:** PPP project with the ability to generate its own revenue that does not require government co-financing.

► **Co-financed:** APP project that requires government co-financing or the granting or taking out of financial or non-financial guarantees with a significant likelihood of co-financing requirements, where:

	Guarantees	Self-Financed	Co-Financed
Financial Guarantee	Those guarantees that do not exceed 5% of the total capital expenditure or the total project cost (if there are no expenditure activities).	The likelihood of a request for use of public resources is minimal or nonexistent, which means that the likelihood of using public resources does not exceed 10% for any of the first five years of the project guarantee period.	The referred likelihood exceeds the limit of 10% for any of the first five years of the project guarantee period.
Non-Financial Guarantee		PPPs may also be categorized based on their basis in government initiatives and private initiatives (PIs).	

- ▶ Government initiatives: The government (through one of its different levels) identifies, formulates and launches a project.
- ▶ Private initiatives (unsolicited proposals): The private sector identifies and proposes the project to the government.

In private initiatives, the government evaluates the proposal submitted by the private sector. First, the government checks whether the proposal has been drafted in accordance with the private initiative regulations. Then, if the private initiative is admitted by the government, it will issue an opinion on whether said private initiative is relevant and consistent with the agency's plans.

Lastly, the agency may declare the project submitted through a private initiative to be of interest. In such case, the agency gives other companies 90 days to participate in a tender process with the company that submitted the private initiative. If 90 days pass and no other investors submit their bids, the company that submitted the private initiative shall be awarded the project.

In addition to the competitive advantage that a private initiative gives to the company that submits a private initiative, there are other benefits granted under the PPP Act and its Regulations.

As such, if the promoter takes part in the selection process and complies with the requirements of the Bidding Rules and submit a valid technical and economic offer, it will have the right to match the offer that would have come in first place.

If this right is exercised, a final tiebreaker is held between the promoter and the bidder who came out on top, each submitting a new bid.

Likewise, the promoter will have the right to reimbursement of expenses, in the event that the project submitted is not awarded in its favor.

In these cases, if the promoter takes part in the selection process with a valid economic bid and the project is awarded to third party, the costs of the private initiative can be reimbursed to the promoter for up to 2% of the project's total cost or the total investment.

d. PPP Advantages

- ▶ The risks are assigned based on which party is in a better position to manage them.
- ▶ The provision of utilities to the public benefits from the experience of the private sector.
- ▶ By integrating the infrastructure operation and maintenance under a long-term agreement, the private sector will have sufficient incentives to design, and build said infrastructure efficiently.
- ▶ Public infrastructure can be provided without using government resources (in the case of self-financed PPPs), or, in the case of co-financed PPPs, the government's payments to the private sector for the construction of the infrastructure are distributed over the long-term, given that the private sector will finance the project thus providing financial relief to the State.

e. Role of the Authorities

Private Investment Promotion Body (OPIP)

The public agency responsible for the operation, management, and allocation of a PPP project is the Private Investment Promotion Body (OPIP). Depending on the scope, the OPIP may be:

OPIP	Scope
ProInversión	<ul style="list-style-type: none"> ▶ Multisector PPP projects under national jurisdiction originated by government initiative. ▶ PPP projects under national jurisdiction originated by government initiative with a capital expenditure or a total project cost (in case of projects without an expenditure component) of more than forty thousand (40,000) Tax Units (UITs)¹ (PEN206 million). ▶ PPP projects under national jurisdiction originated by self-financed private initiative. ▶ PPP projects under the jurisdiction of public entities authorized by express law, originated by self-financed private initiative. ▶ Projects at any level of government and projects under the jurisdiction of public entities authorized by express law, originated by self-financed private initiative. ▶ Projects developed through the Competitive Dialogue mechanism. ▶ Projects assigned to ProInversión by express legal provision.
OPIP of the respective Ministry	Projects not assigned specifically to ProInversión.
OPIP of the respective regional government	Projects under its own jurisdiction involving more than one province.
OPIP of the respective local government	Projects under its own jurisdiction.

Ministry of Economy and Finance (MEF)

The Ministry of Economy and Finance (MEF) is the governing body and highest technical and regulatory authority of the PPP system. It is responsible for safeguarding and coordinating compliance with the National Policy for the Promotion of Private Investment in PPPs.

Other Authorities

Ministries (for projects within their specific sectors), Regulatory Agencies, and the Comptroller General's Office of the Republic also have specific roles in the PPP system.

¹A Tax Unit (UIT) is equivalent to PEN5,150 for 2024.

3. Projects in Assets (PA)

This mechanism is used for the development of those cases in which the private investor seeks to perform a project on an asset property of the government, whether as owner, holder, lessor, or any other status permitted by law. However, these projects shall be carried out without any commitment of government resources.

Private investment in assets property of the Peruvian state are promoted through the respective OPIP (which may belong to ministries, regional or local governments), based on the following scenarios:

- Sale of assets, including total or partial transfer
- Use, lease, usufruct, or any other form permitted by Peruvian law

The Peruvian legal framework on PAs is the same as that applicable to PPPs.

The main difference between a PPP and PAs is that while in the former, the government may use its own resources and there is an assignment of risks between the private sector and the government, in the latter the private sector assumes all the risks tied to the project and state resources will not be used.

4. Works for taxes

The Works for taxes regime is an effective corporate social responsibility tool that allows for the application as a credit for the payment of any tax that constitute income from the Public Treasury and is administered by the Tax Authority (SUNAT) - including corporate income tax - of the amount of any projects invested by private companies to the benefit of regional governments, local governments, public universities, and the national government in a range of sectors (such as education, health, safety, tourism, agriculture, irrigation, culture, sanitation, athletics, and the environment, defense, national security, fisheries, transportation, among others).

This regime is a win-win, since the government wins with the construction or performance of the projects, the public's quality of life improves, and private companies directly improve their brand image as socially responsible enterprises through their involvement therein.

Works for taxes regime consists of a private company's participation, together with a government entity, in the implementation and/or finance of (i) investment projects, or (ii) optimization, expansion, rehabilitation and replacement investments (IOARR), and, (iii) emergency IOARRs within the framework of the National Multiannual Investment Programming System (Invierte.pe).

With the execution of a public investment agreement, the private company undertakes to implement a public investment project in exchange for the recognition of its investment as an income tax credit. For such purpose, an investment certificate is issued, depending on whether the agreement is entered

into with regional and local governments, public universities (Regional and Local Public Investment Certificate - CIPRL), or agreements with a national government entity (National Government Public Investment Certificate - CIPGN).

Usually, the private investor finances and/or performs the work. However, the applicable laws also permit the financing of its maintenance. In fact, the performance of investment projects in sanitation can include the operation of said projects for a maximum period of one (1) year.

Public Investment Agreement

This is an agreement signed by the private company and the government entity, by virtue of which the private company undertakes to perform or finance a given public investment project.

The private company can perform the project directly, or it can simply finance the performance thereof, in which case a construction agreement shall be signed with a construction company to perform the project.

a. Legal Framework

- ▶ Consolidated Text (TUO) of Law 29230 - Act on Regional and Local Public Investment with Private Sector Participation, as approved by Executive Order (Decreto Supremo) 081-2022-EF.
- ▶ Regulations on Law 29230 and Legislative Order (Decreto Legislativo) 1534, as approved by Executive Order (Decreto Supremo) 210-2022-EF.
- ▶ Legislative Order (Decreto Legislativo) 1292 permitting Petroperú, on an exceptional basis, to finance projects under Law 29230.
- ▶ Consolidated Text (TUO) of Law 30556 - Act approving extraordinary provisions for National Government interventions in the event of disasters, and authorizing and expanding the scope of Law 29230, as approved by Executive Order (Decreto Supremo) 094-2018-PCM.
- ▶ Regulations on Law 30556, as approved by Executive Order (Decreto Supremo) 003-2019-PCM.
- ▶ Law 30608-Act for the promotion of macro-regional microeconomic coordination via the potential participation of municipal savings and loan banks in the financing and/or performance of public investment projects, as part of an agreement with regional and local governments.
- ▶ Legislative Order (Decreto Legislativo) 1534, which amends Law 29230 with respect to the promotion of works for taxes.

- ▶ Legislative Order (Decreto Legislativo) 1250, which amends Law 29230 and Law 30264, Act establishing measures to promote economic growth.
- ▶ Law 31735, which amends Law 29230.
- ▶ Law 31912, which approves supplementary credits for the financing of greater expenses associated with economic reactivation, emergency response and the imminent danger due to the occurrence of the El Niño phenomenon for the year 2023 and dictates other measures, including including the modification of the Law 29230.
- ▶ SBS Resolution 1706-2018–Regulations on the participation of municipal savings and loan banks in the act promoting regional and local public investment with private sector participation.

b. Public Investment Project Types

- ▶ Government Initiative: Upon identifying a need, the government entity drafts a Public Investment Project to address the emerging need.
- ▶ Private Initiative: The private sector submits a proposal for a Public Investment Project, which shall be evaluated by the government entity.

c. Advantages of the Works for taxes Regime

This regime offers a number of benefits, such as the following:

- ▶ From a private-sector perspective: It strengthens the development of social responsibility programs, improving companies' reputation and thus their relationship with the community and different stakeholders in its areas of influence.
- ▶ For the community: This regime reduces the infrastructure gap and creates more jobs. It also increases the coverage of utilities and public services and satisfies priority needs for the population in a short period of time, generating well-being and a better quality of life.
- ▶ From the government's perspective: This regime contributes to the acceleration of project performance, boosting the efficiency of public spending.

d. Annual Capacity Limit

For 2023¹, regional governments have a joint annual capacity limit for investment in the Works for taxes regime equal to PEN7,094 million (approximately USD1,876,719,576.72). The annual capacity limit of each regional government can be found at the website: https://www.mef.gob.pe/contenidos/inv_privada/obras_imuestos/anexo_topes_maximos_capacidad_anual_2023_GR_GL_UP.pdf.

For 2023², local governments have a joint annual capacity limit for investment in the Works for taxes regime equal to PEN16,744 million (approximately USD4,429,629,629.63). The annual capacity of each local government can be found at the website: https://www.mef.gob.pe/contenidos/inv_privada/obras_imuestos/anexo_topes_maximos_capacidad_anual_2023_GR_GL_UP.pdf.

For 2023³, public universities have a joint annual capacity limit for investment in the Works for taxes regime equal to PEN1,775 million (approximately USD469,576,719.58). The annual capacity limit of each university can be found at the website: https://www.mef.gob.pe/contenidos/inv_privada/obras_imuestos/anexo_topes_maximos_capacidad_anual_2023_GR_GL_UP.pdf.

Usually, according to Legislative Order 1275, entities must meet certain mandatory tax provisions.

e. Regional and Local Public Investment Certificate (CIPRL) and National Government Public Investment Certificate (CIPGN)

Issuance of Certificates (CIPRL and CIPGN)

Approval of reception and quality is required to issue a CIPRL or a CIPGN.

If the performance of the project takes more than five months, the private company may ask the public entity to issue quarterly certificates.

CIPRLs are financed from the following funding sources:

- ▶ Determined Resources from mining canon and/or surplus canon, royalties, customs revenue and shares and the Regional Compensation Fund (FONCOR) received by the respective regional and/or local government.
- ▶ Determined Resources from funds received by the respective local or regional government (Municipal Compensation Fund - FONCOMUN and Camisea Socioeconomic Development Fund - FOCAM, among others indicated in express legal norms).
- ▶ Determined Resources from taxes collected by the respective local government.

^{1, 2, 3} To date, the annual capacity limit to invest in the Tax-Deductible Works for taxes regime for 2024 has not been published.

- ▶ Directly collected resources.
- ▶ Ordinary resources, only for the execution of investment projects and IOARR under the responsibility of the regional and local governments.

The financing of investments and activities for Public Universities is charged to the resources from mining canon and/or surplus canon and royalties.

The CIPGNs are subject to the provisions established for the CIPRL, as applicable.

The CIPGNs can be financed from:

- ▶ Ordinary Resources provided for in the institutional budget approved by the corresponding entity, without requiring additional resources from the Public Treasury.
- ▶ Determined Resources from the special fund for citizen security, and intended for the financing of investments, in accordance with the purposes established in said fund.
- ▶ Resources directly collected for investments projects in the areas of environment, culture, rural electrification, industry, fisheries, tourism, defense and national security and planning, management and contingency reserve, provided they are deposited in the single account of the Public Treasury.

▶ Determined resources from the Fund for the Armed Forces and the Peruvian Police Force for investments in public order and security matters.

▶ Determined Resources from funds authorized by express law, including resources for the financing of the National Rural Housing Program and for rural electrification projects.

The canon is the share of local and regional governments in the total revenues received by the Peruvian Government for the economic exploitation of natural resources. Currently, Peruvian law regulates the concepts of mining canon, hydropower canon, gas canon, fishing canon, forestry canon, and oil canon.

It should be noted that the canon is the basis for determining the annual capacity limit for investments under the Works for taxes regime for regional and local governments and public universities.

Certificate Characteristics (CIPRL and CIPGN)

These certificates have the following characteristics:

- ▶ CIPRLs and CIPGNs requested by government entities are issued electronically via the document security printing platform found at the following internet address: CIPRL-Ministry of Economy (mineco.gob.pe).
- ▶ CIPRLs and CIPGNs can be used against any tax that constitutes income from the Public Treasury and is administered by the Tax Authority (SUNAT) - including corporate annual income tax.
- ▶ CIPRLs and CIPGNs can be used with a limit of 80% of the corporate income tax determined in the previous fiscal year.
- ▶ If CIPRLs or CIPGNs are not used by the end of the year, the private company may request a new certificate that will include as an additional to such amount, the accumulated inflation rate of the last 12 months.
- ▶ If the certificate is not used within ten years, the private company may request a reimbursement from the Tax Administration

Certificates are negotiable, which means they can be transferred to third parties.

5. Government-to-Government (G2G) Agreements

Under G2G agreements, one government hires the supply of goods and services (including construction) through a direct agreement with another government. The latter government may perform the agreement through its own bodies or agencies, government-owned companies, national privately-owned companies, and/or foreign privately-owned companies.

The most representative of these agreements, in terms of investment and the closing of social gaps, was the Agreement for Reconstruction with Changes (RCC) entered into with the United Kingdom. Through this G2G, Peru is receiving technical assistance, supervision, and Project Managers Officer (PMO) services from the Government of the United Kingdom⁴, which will act through its "performance team": privately-owned companies from the United Kingdom with extensive experience in the field.

Peru has also signed many agreements under the government-to-government (G2G) regime with countries with extensive, proven experience in the infrastructure sector such as (i) the Government-to-Government Agreement with France to obtain the necessary technical advice to carry out the Nueva Carretera Central; and, (ii) the Government-to-Government Agreement entered into with South Korea to provide technical assistance, through a Project Management Office (PMO), during the design, construction, and start-up stages of Chincheró International Airport in Cusco.

⁴ In 2017, there was a flood in northern Peru (a Coastal El Niño) that caused serious harm to the local population and infrastructure. The government created the Authority for Reconstruction with Changes (ARCC) to supervise and perform public works, which include important preventive measures.

a. New Engineering Contract (NEC)

For the Lima 2019 Pan American and Parapan American Games, use was made of New Engineering Contracts (NECs), specifically NEC3s. NECs are highly flexible standard contracts created by the United Kingdom Institution of Civil Engineers (ICE) in England, similar to other standard contracts such as FIDICs, ICCs, and AIAs, among others.

In particular, NEC3s have been used for the provision of goods, services, and works, considering all phases in a project's cycle, from project planning, design, and management to facility construction, maintenance, and management.

Additionally, NEC3s promote the delivery of projects:

- (i) On time
- (ii) Within budget; and,
- (iii) With the highest standards⁵.

According to Peruvian experience with NEC3s, the main characteristics of this type of contract are its straightforward language, appropriate risk allocation, and collaborative work.

⁵ <https://www.neccontract.com/About-NEC/How-NEC-Contracts-Works>

Infrastructure investment (in USD billions)

*Projection. Multiannual Macroeconomic Framework 2024-2027.

Source: Ministry of Economy and Finance (MEF).

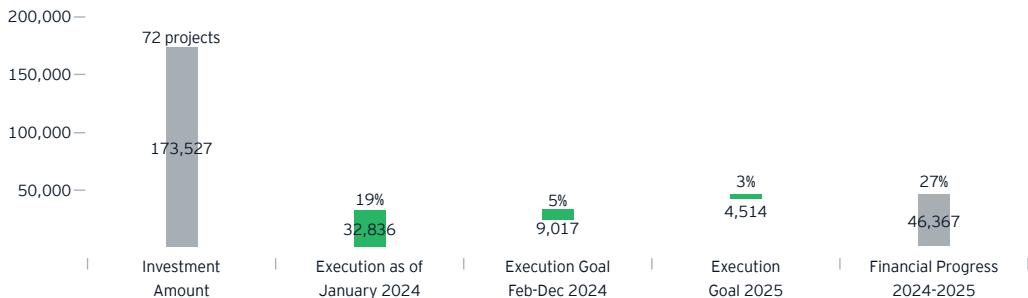

On July 20, 2023, the Government enacted the law that creates the National Authority of Infrastructure (ANIN), public body that will execute, in a decentralized manner, the big projects more efficiently and effective, with the aim of reducing gaps in infrastructure, especially in vulnerable sectors of Peru. The creation of ANIN is part of the reactivation economic axes, and more infrastructure and services for a better quality of life, recorded in the General Government Policy.

The government continues to promote and prioritize the implementation of the National Sustainable Infrastructure Plan for Competitiveness (PNISC), with a view to closing basic infrastructure gaps and

leveraging the country's economic growth. In October 2022, the 2022-2025 PNISC was relaunched. This document updates the approach to the prioritization of infrastructure projects to drive economic growth, improve competitiveness, help close gaps, and reduce bottlenecks affecting long-term infrastructure projects.

The plan prioritizes a portfolio of 72 projects for an investment amount of PEN173.5 billion in health (22), transportation (18), water and sanitation (12), communications (9), and others. As of January 2024, the execution reaches PEN32.8 billion (19% of the goal) and progress is expected to reach PEN46.4 billion (27% of the goal) in 2025.

EY CEO Outlook - January 2024

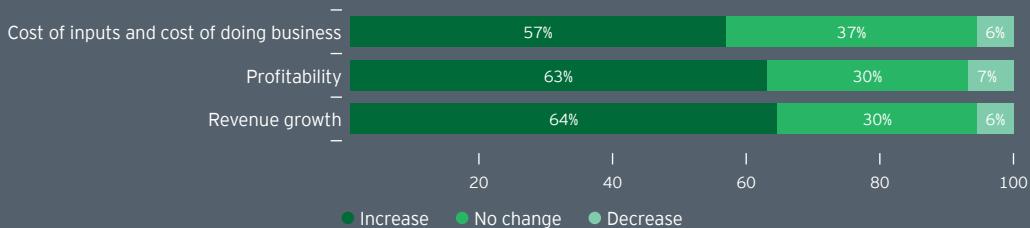

The EY CEO Outlook January 2024 is the result of a survey of over 1,200 CEOs in 21 countries around the world. The goal is to provide valuable information on the primary

trends and developments affecting the world's largest companies, as well as business leaders' expectations for future growth and the creation of long-term value.

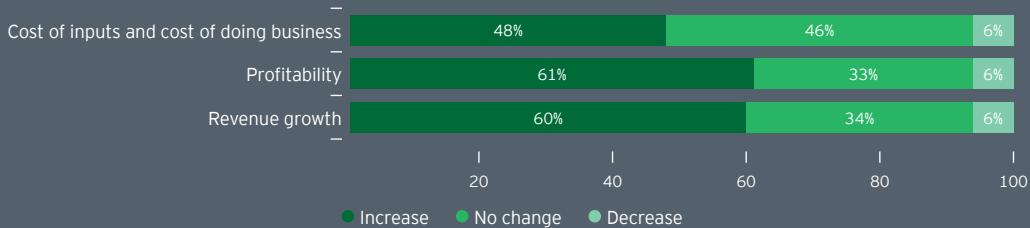

How do you expect your organization's revenue growth and profitability will change in 2024 compared with 2023?

(The CEO respondents were allowed to select one option for each statement)

Global

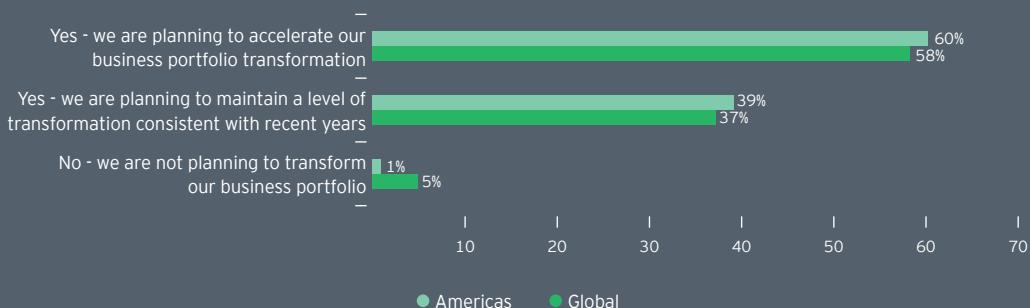

Americas

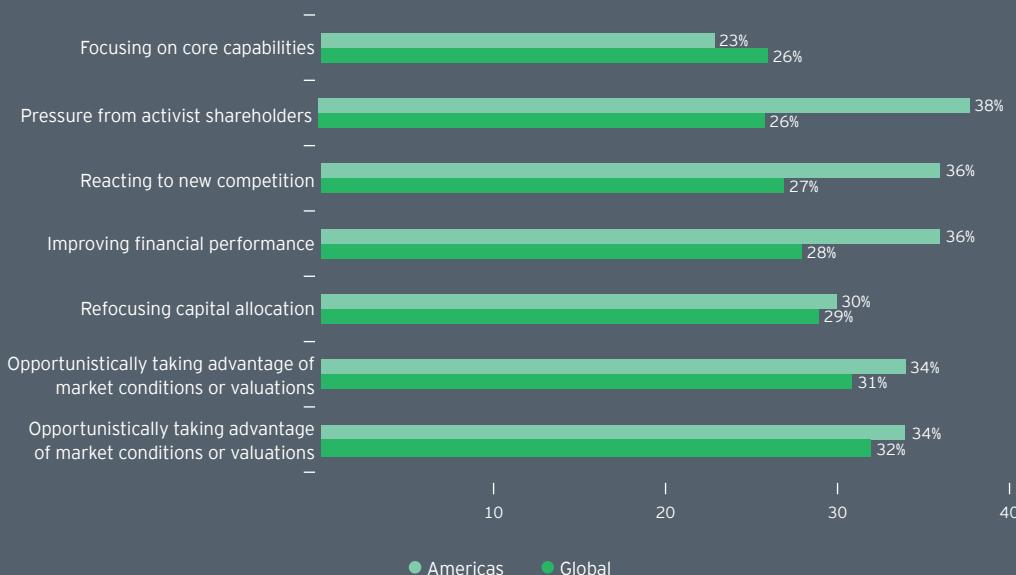

Are you planning to transform your business portfolio over the next 12 months?

(The CEO respondents were allowed to select one option for each statement)

You have indicated you are planning to transform your business portfolio – what are the main drivers that are causing you to rethink the composition and shape of your business portfolio?
 (Only asked of those CEOs who plan to transform their business portfolio. The respondents were allowed to select up to two responses)

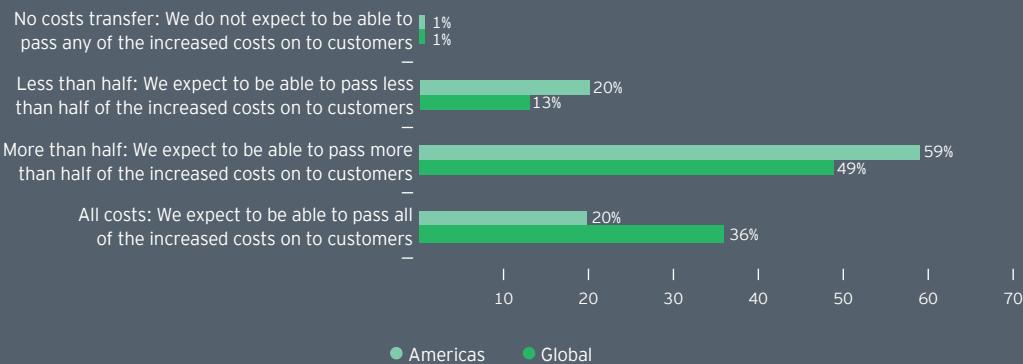

What business strategies, for you as CEO or at your portfolio companies, are likely to be a priority in the next 12 months?

(The respondents were allowed to select up to two responses)

You have indicated that the costs of doing business are expected to increase in 2024. Which of the following statements best describes your approach to passing on costs to customers?
 (Only asked of those CEOs who expect for the cost of inputs and cost of doing business to increase in 2024. The respondents were allowed to select one option)

As a result of geopolitical challenges, and based on your current outlook for 2024, are you making any of the following alterations to your strategic investment plans?
 (Respondents were allowed to select multiple responses)

4

Trade agreements

Peru's development strategy is based on an economy opened to the world and competitive in its export offer. It has been a successful strategy that has permitted the country to consolidate its foreign trade of goods and services as an economic development and poverty reduction pool.

International trade negotiations, which have benefited from rigorous macroeconomic management and its consequent stability, have allowed the Peruvian economy to gradually tackle and reduce its external vulnerability in times of crisis such as in the current international and local economic recovery context.

Trade agreements are a valuable tool to attract foreign direct investment and increase entrepreneurial productivity, as well as technology transfer thanks to the lower cost of importing capital goods and high-quality inputs, and employment generation. These agreements foster the compliance of international standards, thus enabling more Peruvian companies to improve their management and logistic practices.

Peru has been a member of the World Trade Organization (WTO) since 1995, and in 1998 it became a member of the Asia-Pacific Economic Cooperation Forum (APEC). In 2011, it formed the Pacific Alliance with Chile,

Colombia, and Mexico. It is also a member country of the Latin American Integration Association (ALADI) and a member-state of the Southern Common Market (MERCOSUR). On January 25, 2022, Peru was invited by the Secretary General of the Organization for Economic Cooperation and Development (OECD) to begin the process of accession to the organization. This process will require a path of public management and policy reforms based on OECD standards and best practice. This will help forge a state with stronger, more efficient institutions that promotes inclusive, sustainable, and resilient development and provides quality services to its population. Adaptation to these standards and subsequent admission as an OECD member act as a "seal of quality" to attract more foreign direct investment, given that we share the organization's core values of democracy, an open economy, rule of law, the fight against corruption, and the protection of human rights and the environment.

Peru has signed 32 Bilateral Investment Treaties (BITs) with Argentina, Australia, Bolivia, Canada, Chile, China, Colombia, Cuba, the Czech Republic, Denmark, Ecuador, El Salvador, Finland, France, Germany, Italy, Japan, Malaysia, the Netherlands, Norway, Paraguay, Portugal, Romania, Singapore, South Korea, Spain, Sweden, Switzerland, Thailand, the Belgium-Luxembourg Economic Union, the United Kingdom, and Venezuela.

Additionally, Peru has a total of 24 free trade agreements and economic integration agreements (TLCs & EIAs) with the Andean Community (CAN), MERCOSUR, WTO, APEC, the Pacific Alliance, the European Free Trade Association (EFTA), Australia, Canada, Chile, China, South Korea, Costa Rica, Cuba, United States, Honduras, Japan, Mexico, Panama, United Kingdom, Singapore, Thailand,

the European Union, Venezuela and the Comprehensive and Progressive Agreement for Trans-Pacific Partnership (CPTPP). The CPTPP has given Peru access to four countries with which it previously had no trade agreements: New Zealand, Vietnam, Brunei, and Malaysia.

Likewise, in 2012 Peru has executed a Framework Agreement for Economic, Commercial, Technical and Investment Cooperation with the Member States of the Gulf Cooperation Council, which groups Saudi Arabia, Bahrain, Kuwait, Qatar, Oman and United Arab Emirates. This is the first agreement signed with a South American country.

Peru is currently in the midst of negotiations with Turkey, India, El Salvador, and Nicaragua, and it is currently negotiating the optimization of its trade agreement with China.

Foreign investors are protected against inconvertibility, expropriation, political violence, and other non-business risks via access to multilateral and bilateral agreements. Peru has signed an agreement with the Overseas Private Investment Corporation (OPIC) and the Convention Establishing the Multilateral Investment Guarantee Agency (MIGA). Peru has also entered into the World Bank's International Convention on the Settlement of Investment Differences (ICSID) as an alternative for the settlement of any disputes that may arise between investors covered by the ICSID and the Peruvian Government.

Nine double taxation avoidance agreements

have been signed with Chile, Canada, the Andean Community (CAN), Brazil, Mexico, South Korea, Switzerland, Portugal and Japan.

Additionally, an agreement was signed with Spain and is currently pending ratification. Likewise, the negotiation with the United Kingdom have been successfully concluded, and the agreement is expected to be signed in the next months. There are also negotiations underway with Qatar, the United Arab Emirates, The Netherlands, Italy, France and Sweden.

In Force

1. Peru - China Free Trade Agreement (FTA)

In economic terms, China has been the fastest growing economy worldwide over the past two decades (around 10% per year of sustained growth). The entry into force of this Agreement in March 2010 has opened up a market of 1.4 billion inhabitants, of which 350 million are consumers with high purchasing power.

Exports in 2023 totaled USD20.4 billion, with China being our main trading partner. Peru's principal exports to China are copper, fishmeal, and iron ore, lead and zinc. Among the main Peruvian products benefitting from the trade agreement are giant squid, cuttlefish and squid, fresh grapes, avocado, mango, barley, paprika, tara powder, and fine wool yarn, etc. In exchange, China ships machinery, mobile telephones, laptops, and high technology products to Peru.

EY and the Ministry of Foreign Affairs (MRE) prepared the Chinese version of this Peru's Business and Investment Guide 2023. It can be downloaded for free in: https://www.ey.com/es_pe/entrepreneurship/peru-business-investment-guide-in-chinese

The FTA establishes clear rules of the game, within a transparent and predictable framework through which it will not only contribute to increasing bilateral trade, but also boost Chinese investment in Peru, principally in the industries of mining, agriculture, electricity, wind power, oil and gas, and fisheries.

2. Peru - United States Trade Promotion Agreement

Peru had access to certain unilateral preferential customs duties with the United States starting in 1991, granted by the U.S. Congress to Andean Countries through the Andean Trade Preference Act (ATPA), which remained in force until 2001. These preferential duties were renewed in 2002 with the enactment of the Andean Trade Promotion and Drug Eradication Act (ATPDEA) under which they remained in force until 2010.

In 2004, Peru initiated negotiations for a Free Trade Agreement (FTA) with the United States, and in 2009 the Peru - United States Free Trade Act entered into force. Just two years after entering into force, 418 new products were exported, of which 96% were non-traditional products, most notably in the areas of Metal-Mechanical (32%), Chemicals (20%), and Textiles (11%).

The main products exported to the United States are minerals, metals, textiles, fish products, crude oil, coffee, cocoa, handcrafts, paprika, artichokes, grapes, mangoes,

tangerines and asparagus. In 2023, exports reached USD 9.6 billion, of which gold, asparagus, fresh grapes, and avocado were the most notable.

3. Peru - European Union (EU) Trade Agreement

The Trade Agreement with the European Union (EU) is part of a business strategy to expand and develop the export supply of Peru. It became effective on March 2013. The European Union constitutes a market of great opportunities with over 448 million inhabitants and per capita income levels, which are among the highest in the world.

The European Union is one of the main destinations for Peruvian exports, with a share of 12% of the total exports in 2023. Furthermore, this Region registered a direct foreign investment in Peru with a share of 38% of the capital stock from Spain and the United Kingdom.

With the entry into force of the Peru - European Union (EU) FTA, custom duties were removed in 99.3% of Peru's exports, benefiting 95% of custom duty lines for agricultural products, such as asparagus, avocados, coffee, fruits of the genus capsicum (for example, paprika and chili peppers), artichokes, among others.

The execution of the agreement between the Republic of Peru and the European Union on visa exemptions for short-term stays, signed on March 14, 2016 in the city of Brussels, in the Kingdom of Belgium, was a major achievement that will facilitate business investment contacts by Peruvian businesspeople in Europe. Under this agreement, Peruvian citizens can enter the

following 30 countries without a short-term visa: Germany, Austria, Belgium, Bulgaria, Cyprus, Croatia, Denmark, Slovakia, Slovenia, Spain, Estonia, Finland, France, Greece, Hungary, Iceland, Italy, Latvia, Lithuania, Liechtenstein, Luxembourg, Malta, Norway, The Netherlands, Poland, Portugal, Czech Republic, Romania, Sweden and Switzerland. This decision came about as a result of increased economic relations with the European Union, a decline in irregular migration flows, and the opportunities offered by the economic growth registered in Peru.

4. Peru - Japan Economic Partnership Agreement

The Economic Partnership Agreement between Peru and Japan was entered into on May 31, 2011. As from its entry into force in March 2012, Peruvian products such as coffee, asparagus, sacha inchi, giant squid, fish oil, copper, lead, zinc, purple corn, giant corn from Cusco, swordfish, among others, may enter the Japanese market with preferential access.

In 2023, Japan was the sixth largest destination for Peruvian exports, accounting for USD2.0 billion, consisting mainly of minerals and agricultural products.

5. Peru - South Korea Free Trade Agreement

The Free Trade Agreement between Peru and South Korea was signed on March 21, 2011, in Seoul, South Korea, and it became effective on August 1, 2011. With this trade agreement, Peru gains access to a market of 51.8 million inhabitants, with a GDP per capita

of USD31,489. For Peruvian exports, this represents a significant number of potential consumers and a major opportunity for Peru's export supply.

Peruvian non-traditional exports reap the most benefit from this Agreement, since, according to the Peruvian Ministry of Foreign Trade and Tourism (MINCETUR), the Korean market has a preference for high quality fresh products, such as agricultural and fisheries products from Peru.

South Korea was the fifth largest destination for Peruvian exports during 2023, with a total of USD2.2 billion. Fisheries and agricultural products were the most benefited by this trade agreement.

6. Peru - Singapore Free Trade Agreement and the Peru - Thailand Protocol to Accelerate the Liberalization of the Trade of Goods and Facilitation of Commerce

In the context of the policy of rapprochement with the Asian market, Peru executed in Lima the Peru - Singapore Free Trade Agreement (FTA) on May 29, 2008. Unlike Thailand and most Asian countries, which import mainly minerals from Peru, Singapore is a very important non-traditional Peruvian exports destination. The main products exported to Singapore, which are already benefiting from this Agreement, which entered into force on August 1, 2009, are cocoa, grapes, t-shirts, shirts, asparagus, shellfish, and other marine products. Singapore is one of the main ports of entry into East Asia; thus, the Agreement will enable Peruvian products to be admitted under better conditions throughout the

Region, boost greater investments, and consolidate the Peruvian strategy of becoming the center of Asian operations in South America.

In the case of Thailand, the Protocol to Accelerate the Liberalization of the Trade of Goods and Facilitation of Commerce was signed in the city of Busan, South Korea, on November 19, 2005, and entered into force on December 31, 2011. The main products exported to Thailand include zinc and copper ore; fishmeal, fish powder, and fish pellets; cuttlefish; and fresh grapes. The tariff liberalization agreed to with Thailand encompasses approximately 75% of both countries' tariff subheadings.

7. Peru - MERCOSUR Economic Complementation Agreement (ACE)

Economic Complementation Agreement 58 (ACE 58) was signed between Peru and the MERCOSUR countries (Argentina, Brazil, Paraguay and Uruguay) on November 30, 2005 and became effective on January 2006. Subsequently, in 2006 the Protocol for Venezuela's Accession to the MERCOSUR was signed, and there has been a trade agreement with this country since 2012.

The purpose of this Agreement was to establish a legal framework for integration, to facilitate business trade between member countries, through the elimination of tariff and non-tariff measures affecting trade in goods and services.

Therefore, since January 1, 2012, products exported to Argentina and Brazil enter these countries with a rate of 0% in customs duties.

The main products exported to MERCOSUR are minerals and copper products, zinc ores, silver, olives, varnishes, calcium phosphates,

cotton shirts, tara and dyes. The Peru - MERCOSUR trade reached USD1.9 billion in 2023, which accounts for 3.2% of exports to the trading blocs.

8. Peru - Mexico Trade Integration Agreement

The Trade Integration Agreement was entered into by and between Peru and Mexico on April 6, 2011, and became effective on February 1, 2012. This Agreement opened up a 131.1 million people market, allowing our exports preferential access to over 12,000 products, such as canned fish, cookies, paprika, timber, shrimp, and other products. On the other hand, the importation from Mexico of consumer goods and household appliances and technological products will allow Peruvian consumers access to a wider variety and quality of products, at lower prices. Additionally, rules are being consolidated to promote the already strong Mexican investment existing in Peru, as well as the Peruvian investments in said country.

9. Andean Community of Nations (CAN)

Peru, together with other three South American countries (Bolivia, Colombia and Ecuador) is a member of the Andean Community of Nations (CAN) since 1997. Within this framework, there are agreements related to lower customs duties for goods, sub-regional liberalization of service markets, community regulations regarding intellectual property, land, air and water transport, telecommunications, etc.

An important part of Peruvian trade regulations is governed by the commitments made under this forum. However, in its policy of trade liberalization with other countries

and blocs, Peru deepened the liberalization of trade and the opening of its market to much higher levels, and with commitments that are broader in scope than those arising from the CAN.

10. Peru - Canada Free Trade Agreement

The Free Trade Agreement between Peru and Canada was signed in Lima on May 29, 2008 and entered into full force and effect on August 1, 2009. This agreement is a major commercial treaty that incorporates chapters on the National Treatment and Access to Markets, the Facilitation of Trade, Investment, Trans Border Trading of Services, Telecommunications, Financial Services, Competition Policies, Public Contracting, E-Commerce, Labor and Environmental issues, among others. It must be noted that the main products exported to Canada are gold, silver, copper, lead, fish oil, fishmeal, handcrafts, and textiles.

11. Peru - Chile Free Trade Agreement (FTA)

This Agreement is effective as from March 1, 2009. It extends the Economic Complementation Agreement (ACE No. 38) signed by Peru and Chile in 1998, together with its annexes, protocols, and other regulatory tools.

In 2016, there was a total exemption in the trading of goods between the two countries. Exports to Chile totaled USD1.7 billion in 2023.

12. Asia Pacific Economic Cooperation (APEC) Forum

The Asia Pacific Economic Cooperation (APEC) is an informal consultation forum to promote economic cooperation, economic growth, and the expansion of trade among its members. Unlike the World Trade Organization (WTO) and other multilateral forums, APEC does not comprise a trade treaty or agreement involving binding obligations. On the contrary, it is based on non-binding individual action plans on trade and investment liberalization and facilitation; a collective action plan to closely coordinate the adoption of modern and efficient processes aimed at simplifying requirements and procedures for the various productive transactions; and the economic and technical cooperation among its members. Peru is active in the work of this forum, and it participates in the definition of the lines of action and its organization. As it was in 2008, 2016, and now in 2024, Peru is once again the host of the APEC forum, the ministerial meetings, and the summit of leaders of the 21 economies making up the forum.

APEC countries account for approximately 62% of the global Gross Domestic Product (GDP), 48% of world trade, and around 38% of the world population.

13. World Trade Organization (WTO)

The WTO is the world's largest forum on the administration of the multilateral legal framework that regulates world trade and certain other aspects, such as intellectual property, investment measures, or the environment in those areas related to trade. It is also a dispute resolution mechanism for differences on trade policies, as well as the most important negotiation forum in matters of world trade. It is made up of 164 members (as of March 2024). Peru has been a member

of the WTO since its creation in 1995, and all commercial agreements reached at the WTO have been ratified by and incorporated into its domestic law.

14. Pacific Alliance

The Pacific Alliance is a trade bloc consisting of four Latin American countries: Chile, Colombia, Mexico, and Peru. This proposal was unveiled in Peru, on April 28, 2011, through the Declaration of Lima. The aim of this partnership is to encourage regional integration and further growth, development, and competitiveness of its member countries' economies, and to progressively move closer to the goal of achieving the free movement of goods, services, capital, and people. Among these agreements to form part of the Pacific Alliance, an essential requirement set forth is that all new members of the alliance must have in place the rule of law, democracy, and constitutional order in the country.

The countries members of the Pacific Alliance represent 41% of Latin America's Gross Domestic Product (GDP) and 2.7% of the global GDP. Together, they would be the eighth largest economy in the world. Trade represents 41% of Latin America and the Caribbean. Additionally, they were able to obtain 38% of the Direct Foreign Investment (DFI) in Latin America.

The four member countries of the Pacific Alliance have agreed to the elimination of visas between them. Under this commitment, Mexico's Department of Foreign Affairs (SRE) announced - on November 9, 2012 - the abolition of visas for Peruvian citizens. Furthermore, the Integrated Latin American Stock Market known as MILA is currently in operation. This initiative aims at achieving

the stock market integration of Colombia, Peru, Chile and Mexico, which were formally incorporated in June 2014. In addition, in February of 2014, Chile, Colombia, Mexico, and Peru signed an agreement that immediately liberalized 92% of trade from the payment of custom duty tariffs and a uniform customs system has been established, which entered into force on May 1, 2016. Finally, the standardization of the technical and health provisions, as well as the elimination of health barriers on exports shall be carried out after the entry into effect of the Agreement.

The Pacific Alliance has 61 Observer Members, and the Associated State figure was created in order to negotiate trade agreements with countries interested in having a more profound relationship with the Pacific Alliance.

EY and the Ministry of Foreign Affairs (MFR) prepared the Pacific Alliance Business & Investment Guide 2018-2019. It can be downloaded for free here: https://www.ey.com/es_pe/entrepreneurship/guia-de-la-alianza-del-pacifico-2018-2019

15. Comprehensive and Progressive Agreement for Trans-Pacific Partnership (CPTPP)

On March 8, 2018, the ministers of foreign trade of 12 countries from the Asia-Pacific region signed the text of the Comprehensive and Progressive Agreement for Trans-Pacific Partnership (CPTPP).

In addition to Peru, the CPTPP was signed by Australia, Brunei Darussalam, Canada, Chile, Japan, Malaysia, Mexico, New Zealand, Singapore, and Vietnam. Together, these

countries constitute a market of 500 million people with a GDP of USD10.2 billion, accounting for over 13% of the global economy, and an average GDP per capita of approximately USD28,000.

The Agreement has entered the stage of internal improvement which, in many cases, implies prior approval of the respective Parliaments of each country that has signed it. Among the items included in the Agreement, there are issues related to regional integration, regulatory coherence, economic development, access of SMEs to the markets, competitiveness and transparency, as well as commitments to liberalize the trade of goods and services of the latest generation of Free Trade Agreements.

Peru has become one of the three nations in Latin America to be part of the largest free trade zone in the world, which includes countries on three continents (the Americas, Asia, and Oceania). It is the area with the greatest economic projection in the immediate future, due to the growth of its middle class. For Peru, the CPTPP represents a major commercial platform to diversify the destinations of its exports in ten countries, improving the conditions of the free trade agreements currently in force with some of them.

It should be noted that the potential market for fruits and vegetables, Andean grains, fishery products, and cotton and alpaca textile products is valued at over USD2.5 billion. In this sense, growth opportunities for non-traditional exports will also increase within the CPTPP bloc. Furthermore, the CPTPP will contribute to convert Peru into a hub, attracting South American investment to

export with preferences to the other countries of the CPTPP, and investment from the Asia-Pacific to export to the rest of South America through the trade agreements that Peru has signed with the countries of the region.

16. Peru-Australia Free Trade Agreement

The Peru-Australia Free Trade Agreement was signed on February 12, 2018, and entered into force on February 11, 2020. The FTA with Australia is one of the most ambitious bilateral trade agreements that Peru has entered into with any of its trading partners, containing commitments regarding tariffs, health measures, technical barriers to trade, customs matters, trade in services, investments, movement of individuals, e-commerce, and more. It is also the first bilateral trade agreement in which Peru has included a chapter on Small and Medium-Sized Enterprises (SMEs), Development; and Facilitation of Business, in an effort to promote the use of benefits derived from the FTA. Thus, the broad scope of the FTA with Australia seeks to contribute to the country's economic growth and development.

This agreement will allow 96% of all Peruvian exports to Australia to enter the country without paying tariffs as soon as the FTA enters into force. Special note should be made of products with great potential as exports that will enter tariff-free, such as avocados, blueberries, mandarin oranges, frozen shrimp and prawns, cuttlefish, and preparations used for animal feed, cotton polo shirts and t-shirts, dress shirts, chemical inputs, construction equipment, iron and steel manufacture, zinc

manufacture, and others. Additionally, the agreement establishes a framework intended to guarantee the transparency and efficiency of health and phytosanitary procedures, thus facilitating trade in agricultural products.

Likewise, the trade agreement seeks to eliminate or reduce any existing barriers to trade in services. In particular, it benefits all internet- and cloud-based services and guarantees that software, applications, games for cell phones and tablets, and digital products in general can all be sold without restrictions.

17. Peru's Upcoming Trade Agreements

As part of efforts deployed to expand and strengthen the market for Peruvian products worldwide, Peru and Turkey began negotiations for a Free Trade Agreement (FTA) between the two countries on January 20, 2014. An important fact is that it has been decided for the negotiations to include liberalization of trade in services, which is something that Turkey had never negotiated in earlier agreements from the start. The products enjoying a greater interest on the part of Turkey include mining, fisheries, livestock, leather, and fur.

Central America and the Caribbean are other regions where a significant business and investment potential for Peruvian companies has been identified. Likewise, negotiations have been initiated with El Salvador and Nicaragua, which are expected to be concluded in a short period.

Peru is also taking the initiative to promote the start of trade negotiations with India. One of the interests in future negotiations with India is to strengthen openness and

trade preferences for Peru in a market that concentrates one sixth (1/6th) of the world's population. In an initial MINCETUR study, 61 Peruvian products have been identified (52 belonging to the Non-traditional Sector) in which Peru has significant comparative advantages and where India would have a relatively high purchasing power.

Additionally, on June 28, a series of agreements were signed to strengthen the comprehensive, strategic partnership between Peru and the People's Republic of China:

- ▶ Protocol defining the phytosanitary requirements for exporting fresh grapes from Peru to China.
- ▶ Protocol establishing the inspection, quarantine, and veterinary health requirements for donkey meat and its byproducts exported from Peru to China.
- ▶ Protocol determining the inspection, quarantine, and veterinary health requirements for donkey/horse hides destined for processing, which will be exported from Peru to China.
- ▶ Memorandum of Understanding to establish the Joint Action Plan 2024-2029.
- ▶ Memorandum establishing the mechanism for strategic dialogue on economic cooperation between both governments.
- ▶ Memorandum for strengthening digital economics between the National Office of Statistics of the People's Republic of China and the Office of the Prime Minister and the Ministry of Industries and Fisheries of Peru.
- ▶ Memorandum of Understanding for the establishment of a cooperation mechanism in the field of commercial defense between

the National Institute for the Defense of Competition and the Protection of Intellectual Property (INDECOPI) and the Ministry of Trade of the People's Republic of China.

- ▶ Memorandum of Understanding for cooperation in the field of consumer rights protection between INDECOPI and the State Administration for Market Regulation of the People's Republic of China.
- ▶ Memorandum of Understanding between the China Media Group of the People's Republic of China and the National Institute of Radio and Television of the Republic of Peru.
- ▶ First Addendum to the Memorandum of Understanding for cooperation in science, technology, and innovation between the National Council for Science, Technology and Technological Innovation of the Republic of Peru and the Ministry of Science and Technology of the People's Republic of China.
- ▶ Memorandum of Understanding establishing the China-Peru Business Council.

Finally, exploratory work will soon begin with a view to initiating negotiations for future Free Trade Agreements (FTA) of Peru with Indonesia and Hong Kong, China.

Peru's entry to the Schengen area

Until December 2024, Peruvians will not require a Schengen visa, thanks to notable improvements in the economic, social and political sphere, which have laid the foundations for the elimination of restrictions and have led to greater integration between Peru and European trading partners.

Peruvians can travel to the 27 countries of the European Union, as well as Iceland, Liechtenstein, Norway and Switzerland, without a visa, for a period of up to 90 days of each 180-day period for tourism purposes.

With regard to the integration between the European continent and Peru, it must be noted that this approach has been operated at three levels: an initial macro level based on the cooperation and integration actions taken between the EU and the Community of American and Caribbean States (CELAC) an intermediate level within the context of the agreement between the EU and the Andean Community of Nations (CAN), and a third level that includes the bilateral relations between Peru and Europe.

Since 2025, the European Travel Information and Authorization System (ETIAS) will come into force, which allows, previous payment, the processing of an electronic identification document used to enter the countries of the Schengen area, as well as Bulgaria, Cyprus and Romania.

This system, designed to enhance security and better manage the flow of visa-exempt visitors, will identify and mitigate security risks, irregular migration and epidemics. The authorization will be valid for three years or until the expiration of the passport, allowing stays of up to 90 days in a 180 day period.

For further information on Peruvian trade agreements, visit
<https://www.acuerdoscomerciales.gob.pe/>

5

Peru and the organization for economic co-operation and development (OECD)

Peru aspires to become a member country of the Organization for Economic Co-operation and Development (OECD). To date, it has made great strides towards the achievement of this goal, since the incorporation of Peru in July 2008 as a signatory of the Declaration on International Investment and Multinational Enterprises of the OECD. As a member, Peru, through ProInversión implemented the National Contact Point in order to diffuse the directives of the OECD for multinational enterprises, taking part in activities and meeting of the OECD Investment Committee. Its participation in the OECD Competence Committee and its entry to the Development Center in 2014 must also be mentioned.

The purpose of the OECD is to analyze, share and disseminate better practices of public policies among its more than 200 committees and work groups, located in countries that represent 80% of all global trade and investments. Similarly, the countries of the OECD and a growing number of emerging and developing economies, share and discuss their governance experiences to improve the services provided to their citizens.

At present, the OECD is comprised by 38 countries: Germany, Australia, Austria, Belgium, Canada, Chile, Colombia, South Korea, Costa Rica, Denmark, Spain, United States, Slovenia, Estonia, Finland, France, Greece, Hungary, Ireland, Iceland, Israel, Italy, Japan, Latvia, Lithuania, Luxembourg, Mexico, Norway, New Zealand, Netherlands, Poland, Portugal, United Kingdom, Czech Republic, Slovakia, Sweden, Switzerland and Turkey.

In view of Peru's great potential for economic consolidation, in December of 2014, Peru signed the "Country Program" agreement, aimed at working on strengthening the five required axes that would pave the way to form part of the OECD:

1. Identification of barriers to national growth and development
2. Public governance and improvement of institutional issues
3. Anti-corruption and transparency of the State
4. Improvements in human capital and productivity
5. Progress made in environmental matters

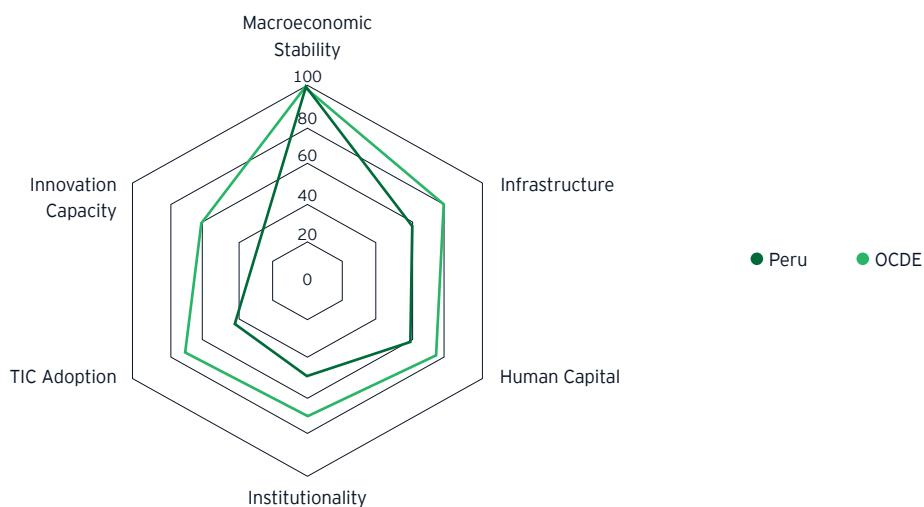

Peru has resorted to the experience, practices, and legal instruments of the OECD to support its reform program. For example, in 2018, Peru took a significant leap in fighting corruption and fostering transparency and the exchange of information by completing the necessary steps to become a Party to the OECD Convention on Combating Bribery of Foreign Public Officials in International Business Transactions (Anti-Bribery Convention) and the Multilateral Convention on Mutual Administrative Assistance in Tax Matters.

Peru also passed 29 legislative orders (decretos legislativos) that implement the recommendations of the OECD and other political regulations in areas such as the environment, waste management, transparency, the exchange of information on tax matters, regulatory policy, cross-border bribery, integrity, and rural and urban development.

In January 2022, Peru was invited to become a member of the OECD. However, the accession process may take from three to five years, since the OECD will first conduct a rigorous, detailed evaluation of Peru and its compliance with international standards, as expressed in the decisions, recommendations, declarations, and international agreements promoted by the organization.

In 2023, Peru has created a permanent Multisectoral Commission in charge of following up on Peru's OECD accession actions, as well as incorporating the figure of Peru's High Representative in charge of coordinating with the Multisectoral Commission.

Gaps for Peru as a percentage of the OECD

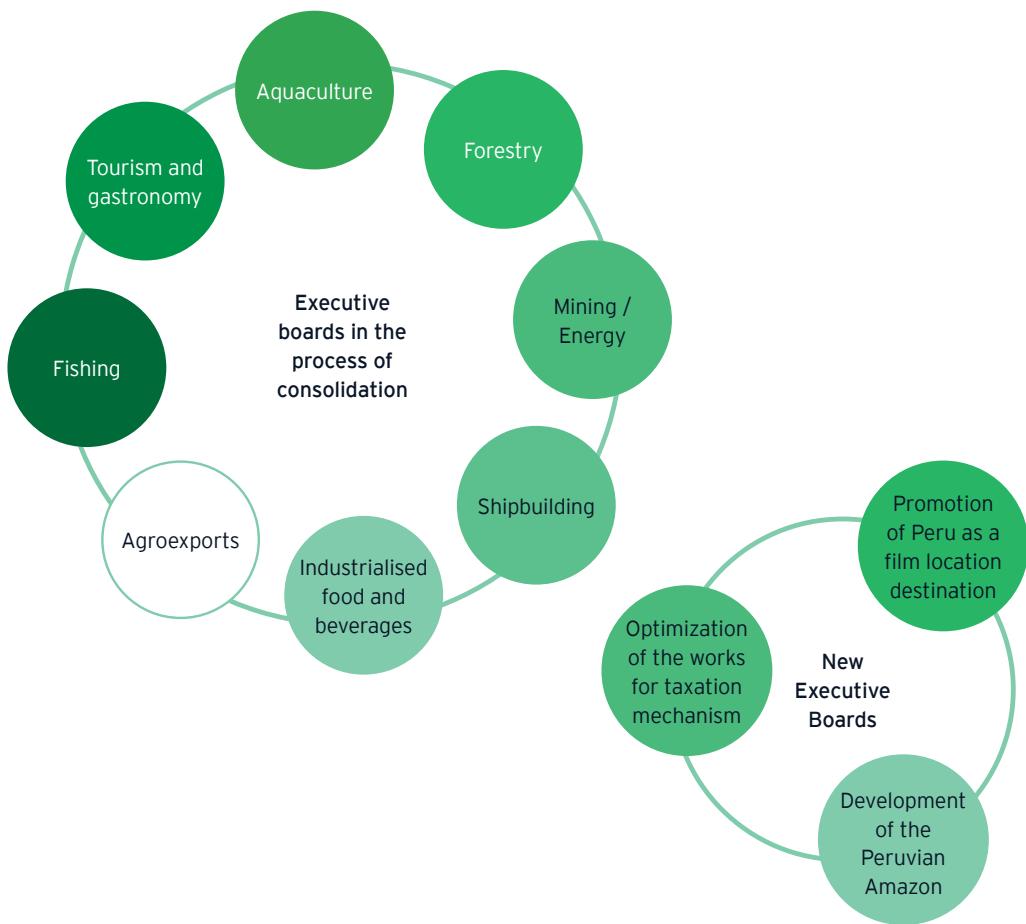

Source: Multiannual Macroeconomic Framework 2024-2027. Ministry of Economy and Finance (MEF).

In June 2023, Peru submitted the Initial Memorandum to the OECD, which is currently under assessment by the OECD's 24 committees, including the Economic and Development Review, Investment, Education Policy, Digital Economic Policy, Health, Public Governance, among others.

The assessment process includes information gathering, evaluations and delivery of recommendations, and can take between three and five years. Once all countries have agreed, Peru would be invited to become an official member of the OECD.

Sector analysis

1

Mining

The Mining Sector has been and is of great importance to the Peruvian economy. The country's mining tradition has been around since pre-Inca times, ranking to this day as one of the main activities related to the development of Peru. Thus, over the years, mining has contributed approximately one half of the country's revenues, as a result of its exports.

In 2023, the mining and metals GDP grew 9.5%; in 2024, mining and metals sector is expected to grow by 2.0% thanks to higher production among mining companies, as well as the start-up of new projects.

As of 2023, mining exports reached USD35.4 billion.

Peru is one of the countries with the greatest variety of minerals in the world. It currently has some of the world's largest precious metal and base metal mines. Many of the most important mining companies around the world have operations in the country.

This is how Peru finds itself among the six countries with the highest mineral wealth in the world. In 2023, Peru is the second largest producer of zinc, third in copper and silver, and fourth in tin worldwide. It is the biggest producer of zinc, tin, mercury and selenium in Latin America.

The mining industry is one of the main sources of tax revenue in Peru. Furthermore, the Mining Sector is important for its contribution to job creation. As of December 2023, 226,432 people worked directly in mining activities, and several million people in indirect activities.

Monthly evolution of mining employment (in thousands)

Source: Ministry of Energy and Mines (MINEM).

Although Peru has large deposits of various mineral resources, it is estimated that only a small percentage of Peru's mineral reserves are being exploited, since 20.4% of the territory is subject to mining concessions and only 1.52% of the territory is developed for formal mining exploration and exploitation. According to recent statistics, Peruvian production ranges are minimal considering the country's mineral potential. However, using modern techniques and equipment, it is developing the commercial potential of various minerals from regions previously considered inaccessible.

Peru has many regions engaged in mining, a wide variety of world-class mineral deposits, and a very dynamic mining community. It also boasts of an excellent geographical location in the center of South America, with easy access to the Asian and North American markets. Even within Latin America, Peru enjoys one of the largest potentials for mining exploration and production. Moreover, its clear and simple mining laws, and excellent geological potential, have contributed to Peru attracting one of the largest projects for mineral exploration and development in the world. Therefore, it is believed that Peru has the ability to double or triple production, especially in the area of basic metals.

Currently, there is a growing number of exploration projects in Peru, which come mainly from junior Canadian companies. However, medium and large companies in the United States, Australia, China, and Brazil are also becoming important investors in exploration. Although there is a great variety in the scale of exploration programs of large, medium and junior companies, it is believed that most large and medium sized companies are concentrating on advanced projects that will lead to production; or in some cases, that

will make them more attractive for acquisition, while the emphasis of junior companies remains at the early exploration stage. Simultaneously, total expenditure on mineral exploration has increased in recent years with some fluctuations, since producers see it as a more economical and less risky means to replace and add mineral reserves. Today, the level and the success of exploration have a direct influence on the future competitiveness of mineral production in Peru.

The following table shows a list of estimated reserves of major minerals in the country.

Metal reserves

Ore	Metric Tons
Copper (in thousands)	120,000
Gold	2,300
Zinc (in thousands)	21,000
Silver	110,000
Molybdenum (in thousands)	1,500
Tin	130,000
Lead (in thousands)	5,000

Mine construction project portfolio is shown herein below:

Portfolio of mining projects

According to the Ministry of Energy and Mines (MINEM), investment in mining construction projects during 2024-2027 is estimated to be equivalent to USD54.6 billion; 73% will be invested in copper projects and the majority of the remaining percentage shall be used in gold and iron projects.

The following graph and table show the 51 portfolio projects, which comprise those that involve the construction of new mines (greenfield), the expansion or restructuring of existing ones (brownfield) as well as those involving the reuse of tailings (greenfield).

Investment in mining construction projects according to their stage of progress

Estimated portfolio as of February, 2024. Projects are shown in random positions.

Source: Ministry of Energy and Mines (MINEM).

Out of the 51 projects, six are currently in the mining construction phase, with an investment of USD4.5 billion. Likewise, four projects are in the detailed engineering phase with an investment of USD4.6 billion; 17 projects are in the feasibility phase with an

investment of USD16.3 billion; 14 projects are in the pre-feasibility phase with an investment of USD18.5 billion and the remaining 10 projects are in conceptual phase with a USD10.7 billion investment.

Source: Ministry of Energy and Mines (MINEM).

The role of government with respect to mining is that of a regulator, promoter, and observer. Currently, government has privatized much of its property and assets in the Mining Sector; thus, large mining operations are in the hands of private domestic and foreign mining companies. Mining companies are not obliged to satisfy the domestic market before exporting their products, and they are not conditioned to sell on official terms or prices. In addition, Peru offers significant

business advantages to the mining investors and abundant freedom to import the machinery and equipment needed to carry out their activities at a lower cost and with less bureaucratic requirements.

The measures introduced by Peru regarding the development of the Mining Sector are yielding favorable results. The major international mining companies perceive the country as an attractive area for investment.

Mining investment (in USD billions)

Source: Ministry of Energy and Mines (MINEM).

Mining exploration according to type of investment - 2023 (percentage participation)

- Smelting plant 26%
- Infrastructure 22%
- Development and preparation 19%
- Mining equipment 17%
- Exploration 9%
- Others 6%

Investment in mining activities reached USD4.7 billion in 2023, where 48% of the investment was in smelting plant and infrastructure. Also, the growth of exports and global positioning are explained by a larger volume of production of the principal minerals.

Financial system, securities market, and pension system

1. Financial System

As of December 31, 2023, the Peruvian Financial System consisted of a total of 51 companies, divided into six groups: Banking Institutions (17), Financial Institutions (9), Non-Banking Micro-Finance Institutions (23), Banco de la Nación (1) and Banco Agropecuario (1). In this structure, Banks had the highest share in terms of assets, with 82.1% of the total, followed by Banco de la Nación, with 7.4%, and Municipal Thrifts, with 6.7%.

It is worth pointing out that the default rate of the Peruvian Financial Sector has remained at a rate of 4.6% in December 2023. Furthermore, the Level of Access to Banking Services (Bancarization) (measured as gross loans on Gross Domestic Product - GDP) increased from 22.1% in 2007 to 73.7% in December 2023. This is largely explained by the greater number of branches across the country, which has tripled in the last five years, as well as loans granted as part of the measures aimed at mitigating the impact of the pandemic.

There is a Deposit Insurance Fund (FSD) that aims to protect depositors in the case that a financial institution member of FSD, where they keep deposits, should become bankrupt. This insurance covers all registered and insured deposits that depositors hold in the same financial entity for up to PEN121,500 (approximately USD32,400) for the period of June 2024 - August 2024.

Microfinance Sector

The Global Microscope is a global microfinance study that assesses the environment for financial inclusion across five categories and 55 countries. In the 2020 edition, the Economist Intelligence Unit (EIU) examines how countries are promoting financial inclusion for both women and men.

The Microscope was originally developed for countries in the Latin America and Caribbean regions in 2007 and was expanded into a global study in 2009.

The five domains evaluated are as follows:

- Government and policy support
- Stability and integrity
- Products and outlets
- Consumer protection
- Infrastructure.

These five domains are assessed using eleven indicators:

1. Government collection of sex-disaggregated financial inclusion data
2. Inclusion of a gender approach in national financial inclusion strategies
3. Inclusion of a gender approach in financial literacy strategies and programs
4. Inclusion of a gender approach in digital literacy strategies and programs
5. Women's participation in decision-making at financial regulators

6. Non-discrimination in account opening
7. Diversity programs for non-banking or correspondent agents
8. Gender gap in access to national identification (ID)
9. Non-discrimination in access to national ID
10. Gender gap in internet access
11. Gender gap in access to a mobile telephone

Peru together with another country in the region rank first overall in the Global Microscope 2020. Compared to its scores in the previous edition of the Microscope, Peru demonstrated the greatest improvement in the domain of products and points of sale, specifically, for facilitating the use of financial inclusion services like basic accounts and electronic money. The Ministry of Development and Social Inclusion (MDS) has implemented a transfer program of emergency funds called Bono Familiar Universal. Payment can be made by direct deposit to a bank or mobile account at Banco de la Nación, or in cash at a designated agent.

2. Securities Market

The Peruvian Securities Market consists of the primary market, in which public and private institutions issue fixed-income and equity instruments, and the secondary market, where financial intermediaries place such

instruments in the securities market through trading mechanisms and platforms, such as the Lima Stock Exchange (BVL). The Lima Stock Exchange General Index (S&P / BVL Peru General) consists of not less than 29 and not more than 41 most traded shares in the market.

During 2023, the market capitalization reached USD177.7 billion; additionally, the daily average total traded on the BVL was USD8.96 million.

The Lima Stock Exchange (BVL) is a member of the Latin American Integrated Market (MILA) an entity responsible for integrating the multi-national stock exchange through the use of technological tools and standardization of regulations on the capital market trading. Regarding authorized stock market brokers, there are 20 brokerage firms (SAB) in the country, responsible for marketing, custody, management, and advice with respect to securities trading.

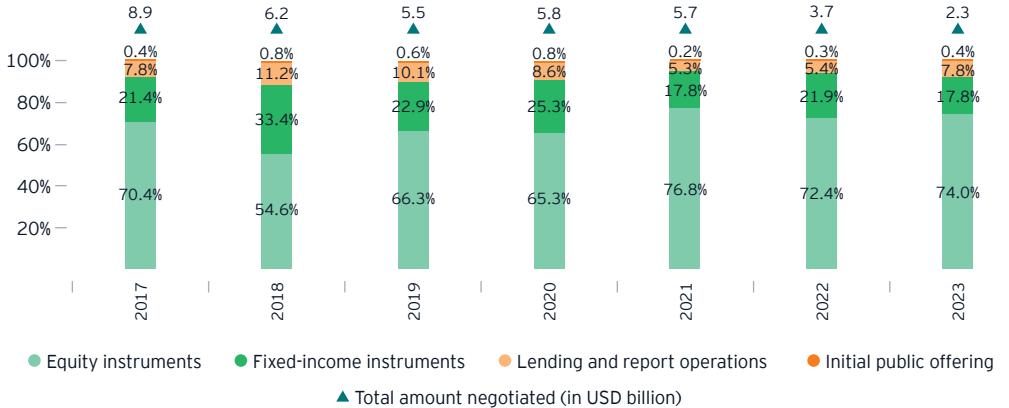

Market capitalization in the BVL (in USD billion)

Year	Total
2023	177.7
2022	141.7
2021	148.5
2020	165.5
2019	162.0
2018	142.4
2017	162.4
2016	124.0

3. Private Pension System

The Private Pension System consists of four financial institutions responsible for the management of pension funds in the form of Individual Capitalization Accounts (CIC). The role of the Private Pension Fund Management Companies (AFPs) is to receive input from their affiliates, investing in a manner permitted by law, to provide benefits relating to retirement, disability, survivorship, and funeral expenses.

In mid-2012, the Superintendency of Banking, Insurance, and Private Pension Fund Management Companies (SBS) passed Law 29903 - Reform of the Private Pension System (SPP) whereby it seeks to increase the coverage of pension security, encourage competition between Private Pension Fund Management Companies (AFPs) and increase net returns of pension funds commissions to improve contributors' pensions.

Pension system statistics as of december 2023

Nº of Active AFP Affiliates	9,285,783
Portfolio administrated by the Private Pension Fund	USD33.160 billion

Source: Superintendence of Banking, Insurance, and Private Pension Fund Management Companies (SBS).

Peru has four types of funds to invest in: Fund 0 invests in instruments with very low volatility in order to protect the accumulated capital, and was launched in April 2016. Fund 1 represents investments of low volatility and thereby lower risk, basically fixed income investment. Fund 2 consists of investments of average volatility with a moderate risk, a mix between fixed and variable income. Fund 3 consists of highly volatile investments that imply greater risks.

3

Energy

Energy demand is one of the main indicators of a growing economy. The benefits of investing in the energy sector increase growth potential and the population's wellbeing. Peru has projects involving a diverse range of energy sources, such as hydroelectric and thermal power plants, as well as a project for the mass use of natural gas for central and southern Peru, representing a capital expenditure of approximately USD900 million, with an influence in the zones of Ica, Arequipa, Ayacucho, Apurimac, Puno and Lima.

Additionally, according to the Renewable Energy Country Attractiveness Index (RECAI), Peru is the fifth most attractive country to invest in renewable energies in Latin America, positioning it among the main markets with potential for the development of projects in this sector.

Capacity for power generation with renewable energy to be exploited

As shown below, Peru is one of the countries in Latin America with one of the highest ratios of energy reserves measured as total power / capacity. This ensures relatively cheaper costs of power generation and sustainable reserves within the region.

Energy Type	Total Power (MW)	Country's Installed Capacity (MW)	Country's Effective Potency (MW)	Total Power / Capacity (Times)
Hydraulic	29,744	5,514	5,493	5
Thermal Power	27,216	9,420	8,659	3
Wind	821	287	285	3
Solar	1,932	539	539	4

Electricity and water

The electricity and water sectors grew by 3.7% in 2023 and is expected to grow 3.3% for 2024, driven by investment projects in the industry, as well as the strengthening of the reactivation of the other sectors of the economy.

Drinking water and sewer system coverage

Service coverage consists of the percentage of the population with access to drinking water or sewer system services. With the support of providers, sanitation service has experienced sustained growth in recent years.

In the case of drinking water, the average coverage nationwide went from 87% in 2014 to 90% in 2022, while sewer system services went from 81% to 84% during the same period.

Hydrocarbons

The Hydrocarbons Sector grew by 0.7% in 2023 and is expected to grow by 1.5% in 2024. In 2023, oil and natural gas exploration and exploitation investments totaled USD270 million, USD268 million of which were invested in exploitation and USD2 million in exploration. Taking the official figures published by the Ministry of Energy and Mines (MINEM) in the Annual Book of Hydrocarbon Reserves of December 2022, proven reserves are estimated in 242 million barrels of crude oil, 330 million barrels of natural gas liquids,

and 8 trillion cubic feet of natural gas, which combined are equivalent to 2.1 billion barrels of oil. The same Annual Book informs that the hydrocarbon resources of the country are estimated in 12.4 billion barrels of crude oil, 972 million barrels of natural gas liquids, and 34 trillion cubic feet of natural gas. If we compare the estimated hydrocarbon resources with the estimated hydrocarbon reserves, there are major opportunities for exploration in Peru, to discover new proven hydrocarbon reserves.

6

Construction

The construction sector is one of the most important and dynamic sectors of the Peruvian economy, as it directly contributes to the creation of basic infrastructure.

Growth in this sector has been driven by higher income being earned in households, public and private investments, and improved financing terms for housing acquisition.

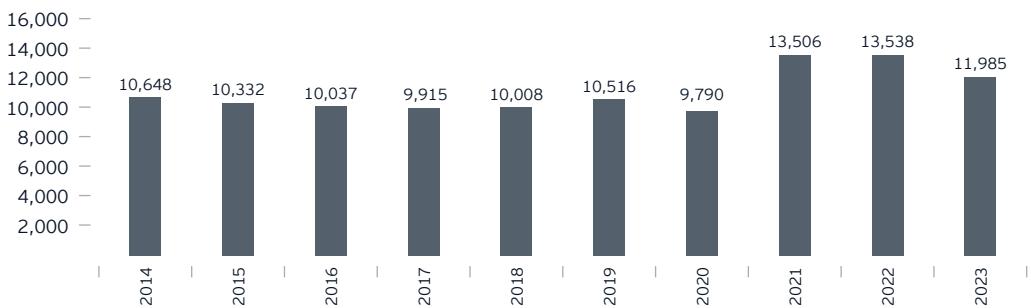

The construction sector had a decrease of 7.9% in 2023, however, an increase of 3.2% is estimated for 2024.

Manufacturing

The manufacturing sector has been one of the hardest hit by the quarantine imposed in an attempt to halt the spread of COVID-19. In 2023, primary manufacturing decreased 1.8% and non-primary manufacturing in 8.2%. In 2024, a growth of 4.5% and 2.7% is estimated for primary and non-primary manufacturing.

8

Trade and domestic consumption

According to the Ministry of Economy and Finance (MEF) in recent years, the country's economic growth has developed largely due to private spending, which is in turn broken down into private consumption and private investment. The recovered dynamism of economic activity can be seen in the growth of the trade sector by 2.4% in 2023. This sector is expected to grow by 3.2% in 2024.

The modern retail channel has undergone significant growth, making it a country with potential for investment in the sector. In 2022, the Global Retail Development Index ranked Peru fifth in Latin America and twenty-four worldwide, as a country with a developing retail consumer market.

The years following the pandemic (2021-2022) were marked by a recovery of the shopping center industry, with sales reaching pre-pandemic levels. Segments such as supermarkets, electronics, and home décor all reported notable growth.

E-commerce growth (electronic commerce)

E-commerce has grown significantly over the last ten years. In 2009, Peru accounted for just 1.7% of all e-commerce

in the region, while in 2023 it grew by 5.6%, reaching a total of USD6.6 billion in sales, ranking Peru sixth in online sales in Latin America. By 2028, e-commerce sales are projected to reach USD10.9 billion.

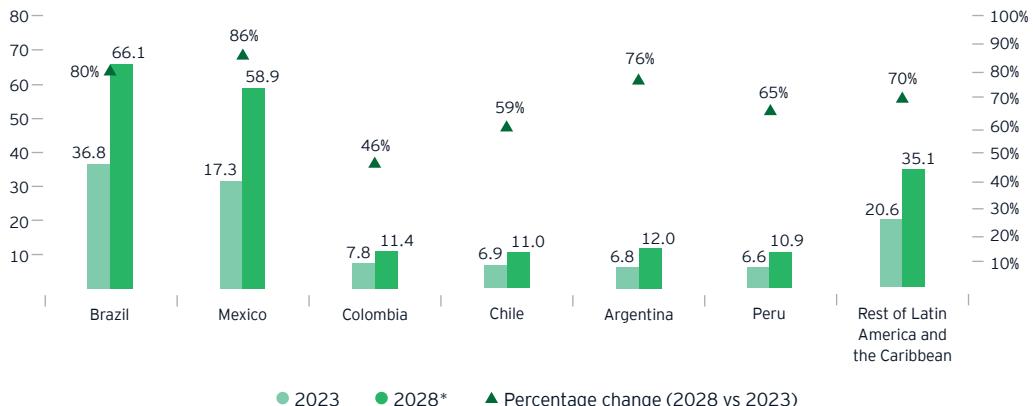

According to the Peruvian Association of Shopping Centers (ACCEP), sales reported by member shipping centers totaled PEN31 billion in 2023 (approximately USD8.2 billion), which is 2% higher than in 2022.

Agribusiness

Peru's immense biodiversity allows for the farming of many interesting endemic agricultural crops for the international market, many of which have already succeeded in positioning themselves, offering niches for potential investments.

Peru, and especially its Andean territory, produces a variety of grains, such as kiwicha, quinoa, tarwi, and cañihua, among others,

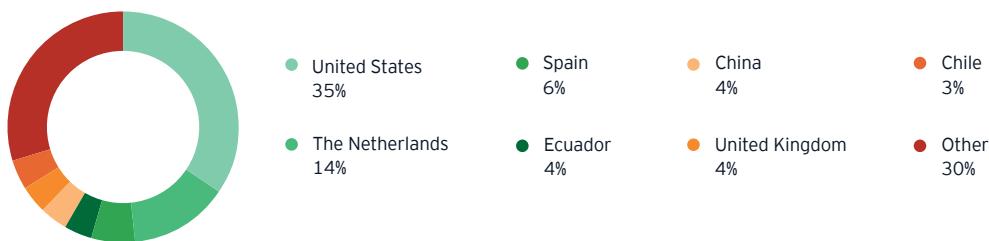

which are highly desirable due to their high protein content and their nutritional qualities. There is also a potential market for legumes such as fava beans and different kinds of corn, not to mention potatoes, which are grown in over 2,000 varieties in Peru, the vast majority of which are unknown outside Peru. The Amazon jungle, for its part, is home to exotic fruits such as cocona, guanabana or soursop, aguaje, and camu camu, all of which are increasingly consumed in Asian countries.

Peruvian fruits and vegetables are gaining ground in international markets, with exports growing at a solid pace. Peru is now the number one producer of blueberries, quinoa, fresh asparagus, and fresh grapes worldwide. For the eighth consecutive year, Peru is the world's leading exporter of quinoa. These exports mainly go to the United States and Canadian markets.

Likewise, the export of cranberries went from zero in 2007 to USD16.9 million in 2013, and then took off steadily and reached USD1.676 billion in 2023. This product ranked first in the world export ranking for the fifth consecutive year in a row in 2023, displacing major competitors such as Spain, The Netherlands, Chile and Mexico.

According to the Macroeconomic Projections Report 2024- 2027 of the Ministry of Economy and Finance (MEF), non-traditional exports are supported by the growth of agro-export shipments, mainly fruits, and fishery products for direct human consumption; in addition to the improvement in external demand from our main trading partners, which allows Peru to continue being one of the main agro-exporters in the world.

10

Fisheries

Peru has a wide range of hydrobiological resources and is the world's top producer of fishmeal and fish oil.

In 2023, the fishing sector decreased by 19.7%. Activity in the sector is expected to increase 20.2% in 2024 as a result of a normalization in sea temperature towards the second quarter of the year, which will allow the opening of a first anchovy season.

It should be noted that in July 2023, Peru became the first Latin American country to formally accept the Agreement on Fisheries Subsidies of the World Trade Organization (WTO), which represents an important advance for the sustainability of the oceans to the extent in which it prohibits harmful fishing subsidies, which are a key factor in the general depletion of populations of fish in the world.

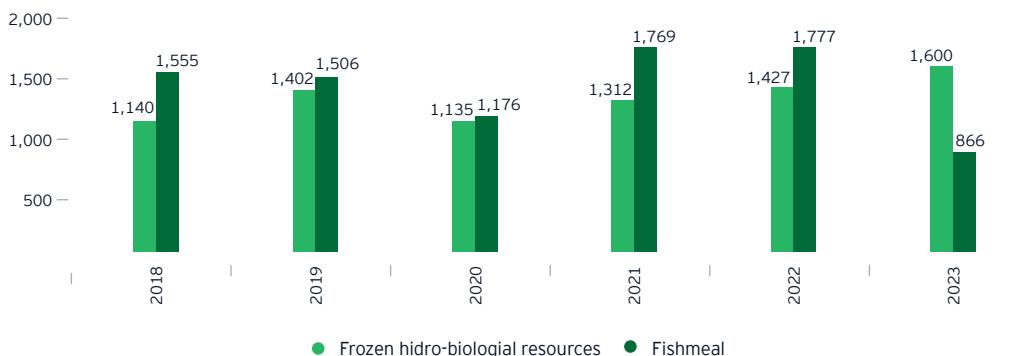

Peru, being a fishing country, and the third most important of the world in terms of marine species capture, according to a report by the Organization of the United Nations for Food and Agriculture (FAO), the country assumes a great responsibility with the Peruvian fishermen artisans and their families, affected by marine predation.

11

Transportation and communications

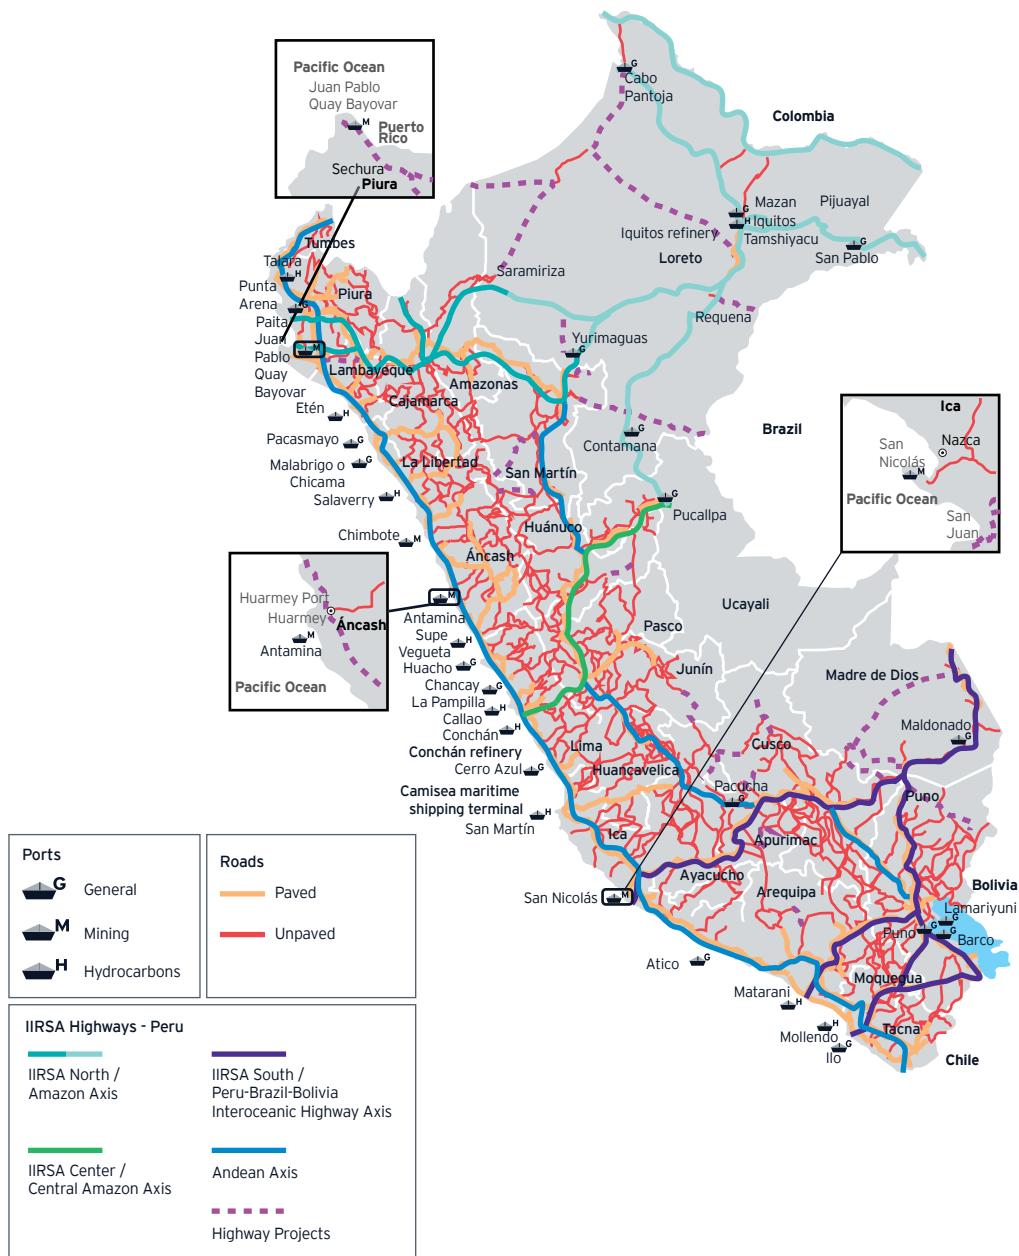

It is estimated that Peru's economic growth is closely linked to the progressive reduction of its shortcomings in terms of infrastructure. Peru has recently begun to take the necessary steps to improve this sector, focusing mainly on transport, electricity, water, and communications infrastructure, with the intention of promoting new investments. Therefore, the development of transportation and communications will impact positively and directly on the development of other sectors such as mining. In addition, investment in infrastructure reduces the effect of the distance between regions, resulting in the full integration of the domestic market, connecting at a lower cost with markets in other countries and regions.

Together with the Ministry of Foreign Affairs (MRE) and ProInversión, EY has developed the Guide to Investing in Infrastructure Projects in Peru, with details on the projects scheduled for the coming years. It can be downloaded for free here:
https://www.ey.com/es_pe/infrastructure-guide-to-investing-in-infrastructure-projects-in-peru

Peru has given priority to the development of transport infrastructure (road, railway, port, and airport) to increase competitiveness and set a logistics hub that will integrate Latin America with the Asia-Pacific Economic Region. These investments aim to modernize the country's infrastructure, reducing logistics costs and enhancing the use of Free Trade Agreements (FTAs) signed by the country to increase Peru's integration with world markets.

In July 2024, Proinversion plans to award the modernization of the Huancayo - Huancavelica Railroad for USD394 million. The project will benefit 1.2 million inhabitants of Junín and Huancavelica.

Through the Telecommunications Investment Fund (FTEL), actions are being developed aimed at bridging the digital gap in essential public telecommunications services in rural communities and preferential places of social interest.

July 2012 saw the enactment of Law 29904 - Act for the Promotion of Broadband and Construction of Optical Fiber Backbone. The National Optical Fiber Backbone includes the installation, operation, and maintenance of approximately 13,400 km of optical fiber, to connect 180 provincial capitals in the country.

12

Tourism, cuisine, and hotel management

Tourism

Peru is a privileged tourist destination worldwide, ranked among the top preferred places in the world for its authenticity, art and culture, history and natural beauty, in addition to the famous tourist attractions of Machu Picchu and the Amazon Jungle, declared World Heritage Sites. Tourism is extremely important to the country's development, given that it focuses on a range of economic sectors, such as passenger transportation, lodging, food and beverage services, production, travel agencies, trade, and more.

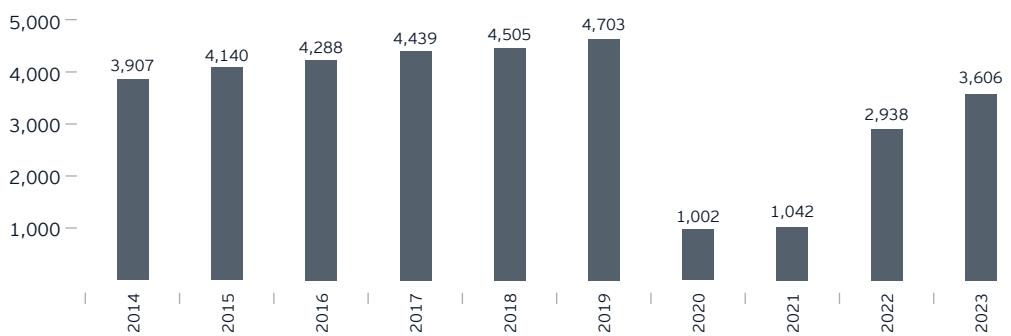

While the quarantine imposed to stop the spread of COVID-19 brought the sector to a halt, tourism activities restarted in October 2021 while complying with the health protocols defined for the sector. With the goal of boosting the recommencement of activities, the government has created a Business Support Fund (FAE) with PEN7.5 billion (approximately USD2.14 billion) which was in force during 2021 and 2022. These efforts reversed the decline in inbound tourism and the inflow of foreign currency. From 2022 onwards, the growth path of both indicators will resume.

In 2023, Peru won two categories at the World Travel Awards. It was named World's Leading Culinary Destination for the eleventh time and World's Leading Cultural Destination for the second time. Likewise, in 2024, Peru won four additional categories: South America's Leading Cultural Destination, South America's Leading Culinary Destination and South America's Leading Destination, while Machu Picchu was chosen as South America's main tourist attraction.

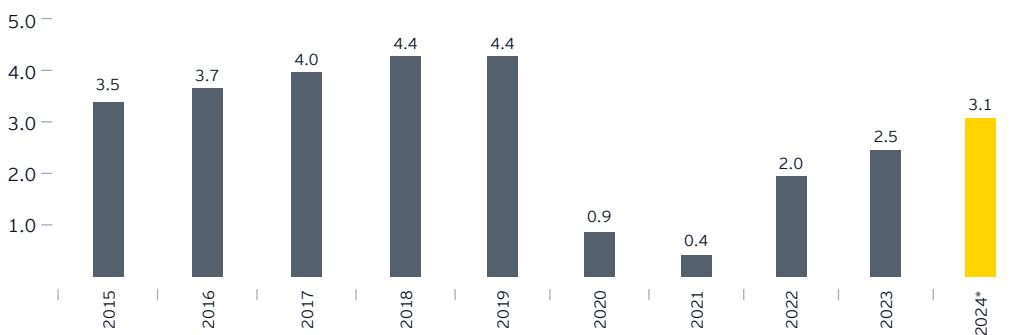

Regarding visits to the main tourist sites, in 2023, the Machu Picchu Historic Sanctuary received more than 0.9 million visitors, more than double the figure recorded in 2021. However, the figure achieved is 39.7% below the figures reported in 2019. Visits to the Moray Archaeological Complex and the Paracas National Reserve also stood out, totaling 460,156 and 434,935 visitors, respectively.

Inflow of currency generated by inbound tourism (in USD millions)

Source: Ministry of Foreign Trade and Tourism (MINCETUR).

Arrival of international tourist (in millions)

*Projection.

Source: Ministry of Foreign Trade and Tourism (MINCETUR).

According to the Ministry of Foreign Trade and Tourism (MINCETUR) a total of 2.5 million international tourists visited Peru in 2023.

Among international tourists visiting Peru, the main issuing countries were: Chile with a 23.5% share, followed by The United States (19.4%), Ecuador (9.5%), Colombia (5.8%), Bolivia (5.3%), Brazil (5.2%), Spain (4.0%) and Argentina (3.9%).

In 2023, the Jorge Chavez International Airport has been considered the best air terminal of South America by the World Airport Awards. One of the main reasons for receiving this distinction is the high level of satisfaction of the passengers and users, according to the evaluations. This qualification allowed it to be ranked eighty-nine in the world.

Main origin of tourist visiting Peru 2023 (in thousands of arrivals)

Source: Ministry of Foreign Trade and Tourism (MINCETUR).

During the January-April 2024 period, the Jorge Chavez International Airport handled 8.2 million passengers, an increase of 19.4% over the previous year. 56.1% of passengers went to domestic destinations and 43.9% to international destinations.

Each year, since 1987, the Peruvian Government, represented by the Peruvian Commission for the Promotion of Exports and Tourism (PromPerú) and the private sector, represented by the National Chamber of Tourism (CANATUR), organize the Peru Travel Mart (PTM) an event that is the meeting point in which tourism promoters of the country meet with the international tourism businessmen of the world. The purpose of this event is to gather the wholesalers of the main tourism markets in the world to take part in a meeting with the most important producers of tourist services of the country.

The first travel culture campaign "What are your plans?" was launched in 2012 with the aim of promoting domestic travel. It is estimated that the campaign produced a growth of 15% in the sales of the participating regional companies that add up to a total of around 450 companies. In 2014, this travel culture campaign was recognized by the World Tourism Organization (WTO) awarding Peru the Ulysses Prize for Excellence and Innovation in Tourism.

The most visited tourist destinations in Peru are shown below:

- ▶ **Arequipa and the Colca Valley:** The city of Arequipa is also known as the "White City". Its historical center has been recognized as a Cultural Heritage of Humanity due to the architecture of its Colonial buildings in white stone ashlar. The Colca Valley is one of the protected natural areas with beautiful landscapes. Arequipa has one of the best cuisines in Peru.
- ▶ **Chiclayo:** The city of Chiclayo is the gateway for the most recent and spectacular archaeological discoveries such as the Lord of Sipán in the Huaca Rajada, the Lord of Sicán in Batán Grande - the Pomac Forest

Historical Sanctuary, the Valley of the Pyramids of Túcume, besides owning the Museum of Royal Tombs of Sipán. Thanks to all of the foregoing features, Chiclayo has become the second favorite destination after Cusco due to its archaeological and historical interest.

▶ **Cusco - Machu Picchu - Inca Trail:** "The archeological capital of America", is the main tourist attraction in Peru. Cusco was the largest city and capital of the Inca Empire. Today, it has an architecture that blends both the Inca and the Spanish styles. Its people proudly preserve their customs and traditions. A must-see place is the mystical and enigmatic Machu Picchu (one of the Seven Wonders of the Modern World): the sacred city of the Incas that was officially unveiled to the western culture in 1911. Due to their historical value and their beauty, both Cusco and Machu Picchu have been considered a Cultural Heritage of Humanity.

▶ **Iquitos and the Amazon River:** The Amazon Jungle is an ideal place for nature and biodiversity tourism lovers, who wish to come into direct contact with nature. From Iquitos, tourists can take a cruise along the Amazon River, exploring the protected natural areas such as the Pacaya Samiria and Alpahuayo Mishana, with exuberant flora and fauna, ideal for bird watching.

▶ **Lake Titicaca and Puno:** Puno is located high up in the Andes, on the banks of Lake Titicaca, the highest navigable lake in the world, inhabited by the Uros and with wonderful landscapes. In the Amantani and Taquile Islands, the tourist can share life with its natives and experience firsthand their habits and customs. Puno is the folkloric capital of Peru.

- **Lima:** Capital of Peru. It is the gastronomic capital and gateway to Peru. It has a historical center with beautiful colonial buildings, which have been declared the Cultural Heritage of Humanity by the UNESCO, and it has the best museums in Peru. Lima offers a large variety of cultural, folkloric shows, nighttime recreational centers, luxurious casinos and different restaurants famous for their Peruvian cuisine.
- **Nazca - Nazca Lines:** The only place in the world in the desert sands full of mysticism and mystery with jaw-dropping shapes of immense figures and spectacularly perfect lines produced by an ancient civilization, having been declared the Cultural Heritage of Humanity by the UNESCO.
- **Paracas:** On the coast of the Pacific Ocean, the National Reserve of Paracas and the Ballestas Islands are ecological destinations for nature and bird lovers. It also has historical-cultural attractions with the archaeological ruins of the Paracas culture.
- **Trujillo:** The "City of eternal spring" is close to Chan-Chan (capital of the Chimu nation - 13th Century), one of the largest cities of the world built with mud and declared the Cultural Heritage of Humanity. Equally important are the archaeological ruins of the Huaca del Sol y de la Luna (Sun and Moon), El Brujo complex and the Lady of Cao. An excellent destination for historical archaeological tourism.

Cuisine

Peruvian cuisine is considered one of the most important worldwide. Over the years, it has become a "flagship product" due to its quality and increasing international competitiveness, in addition to being a cuisine that is rich in tradition and history. Peru is currently experiencing a gastronomic boom, and 42% of tourists visiting Peru say that the food is one of the aspects that influence their decision for choosing Peru as a tourist destination. The expansion of the Peruvian cuisine reflects on the possibility of doing business, whether exporting the supplies, know-how, and skills in its preparation, or representing Peruvian food franchises in a growing number of countries.

In 2023, Peru was recognized as the World's Leading Culinary Destination, according to the World Travel Awards (WTA).

In 2023, a Peruvian restaurant was recognized as the best restaurant in Latin America according to the ranking of Latin America's 50 Best Restaurants. It should be noted that two Peruvian restaurants rank among the Top 10 Restaurants. It should also be noted that Peru offers the most affordable prices in comparison to other restaurants included in said ranking.

Throughout the year, Peru has a wide range of different activities to promote cuisine, such as Pachamanca Day, National Potato Day, Ceviche Day, Peruvian Pork Chicharron Day, Charcoal-Fired Rotisserie Chicken Day, International Chocolate Day, Peruvian Cooking and Cuisine Day, Peruvian Cacao and Chocolate Day, National Cuy Day, Picarón Day, Anticucho Day, Salchipapa Day, and Peruvian Barbecue Day.

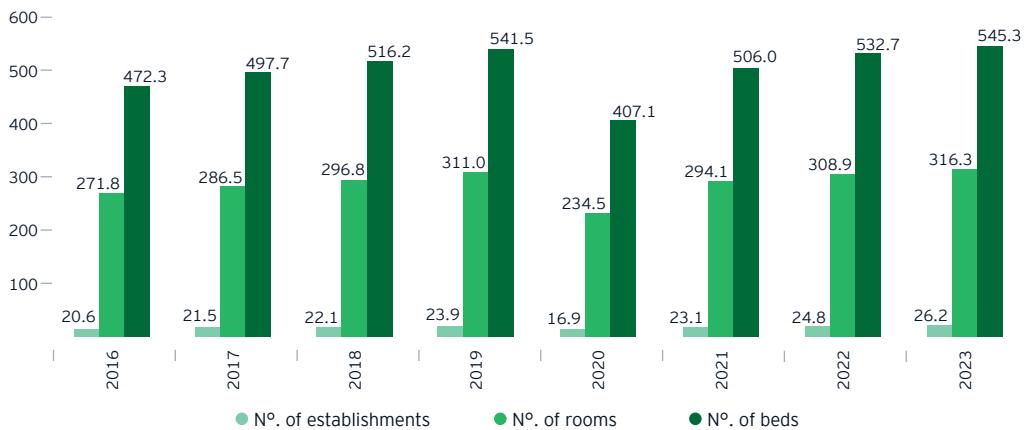

Hotels

In 2023, the hotel and hospitality sector began to recover after the lockdown imposed due to COVID-19. Last year, the number of available lodging establishments rose by 6%, and the number of rooms grew by 2%.

Incorporating a
company in Peru

1

Joint Stock Companies

A minimum of 2 shareholders is required to incorporate a joint stock company. The number of shareholders shall not exceed 750. Non-domiciled shareholders must appoint an attorney-in-fact in Peru to sign the Deed of Incorporation on their behalf. Funds for the initial capital contribution must be deposited in a local bank. There is no minimum amount required by the Business Corporations Act (LGS), but financial institutions generally require a minimum initial capital of PEN1,000 (approximately USD270). The capital stock is represented by shares, which are in turn represented by certificates or book entries.

- **Features:**

- ▶ **Name:** Trade Name must include the indication "Sociedad Anónima" or the abbreviation "S.A."
- ▶ **Limited liability:** Shareholders' liability is limited to the par value of the shares they hold. Shareholders are not personally liable for corporate debts. The guarantee given to the company's creditors consists of the assets themselves. If these are insufficient, the partners are not liable for such fact.
- ▶ **Management:** Shareholders' Meetings, Board of Directors, and General Manager. The company's bodies may hold remote meetings provided this possibility is allowed for in the bylaws.
- ▶ **Legal Reserve:** Minimum of 10% of the distributable profit for each fiscal year, after income tax, until reaching an amount equal to one-fifth of the capital stock.
- ▶ **Stock transfer:** The shares are freely transferable, unless otherwise established in the bylaws.
- ▶ **Existence:** Death, illness, bankruptcy, retirement or resignation of any shareholder does not cause the winding up or dissolution of the corporation.

2

Closely Held Corporations

Closely held corporations (*sociedades anónimas cerradas*) resemble limited liability companies and must have a minimum of 2 and a maximum of 20 shareholders. Shares cannot be listed on the Public Stock Exchange Registry (RPMV) of the Peruvian Securities and Exchange Superintendency (SMV).

- **Features:**

- ▶ **Name:** Must include the indication “Sociedad Anónima Cerrada” or the abbreviation S.A.C.
- ▶ **Limited liability:** Shareholders' liability is limited to the par value of the shares they hold. Shareholders are not personally liable for corporate debts. The guarantee given to the company's creditors consists of the assets themselves. If these are insufficient, the partners are not liable for such fact.
- ▶ **Management:** Shareholders' Meeting and the General Manager. A Board of Directors is optional.
- ▶ **Legal Reserve:** Minimum of 10% of the distributable profit for each fiscal year, after income tax, until reaching an amount equal to one-fifth of the capital stock.
- ▶ **Stock transfer:** Limitation on the free transfer of shares. Shareholders have the right of first refusal in the event that shares are proposed for transfer to another shareholder or to a third party. This right may be eliminated in the bylaws. A right of first refusal may be established in favor of the corporation itself in the bylaws.

3

Publicly Held Corporations

Publicly-held corporations (*sociedades anónimas abiertas*) are a kind of joint stock companies. Publicly held corporations are basically intended for companies with a large number of shareholders (more than 750) or for which an Initial Public Offering of its shares or of obligations convertible into its shares has been made, or in which more than 35% of the capital stock belongs to 175 or more shareholders or if it is incorporated as such or its shareholders unanimously decide to adapt its bylaws to that corporate structure. The shares must be listed on the Public Stock Exchange Registry (RPMV) of the Peruvian Securities and Exchange Superintendence (SMV).

- **Features:**

- ▶ **Name:** Must include the indication "Sociedad Anónima Abierta" or the abbreviation S.A.A.
- ▶ **Limited liability:** Shareholders' liability is limited to the par value of the shares they hold. Shareholders are not personally liable for corporate debts. The guarantee given to the company's creditors consists of the assets themselves. If these are insufficient, the partners are not liable for such fact.
- ▶ **Management:** Shareholders' Meetings, Board of Directors, and General Manager. The company's bodies may hold remote meetings provided this possibility is allowed for in the bylaws.
- ▶ **Legal Reserve:** Minimum of 10% of the distributable profit for each fiscal year, after income tax, until reaching an amount equal to one-fifth of the capital stock.
- ▶ **Supervision:** Publicly held corporations are subject to the supervision of the Peruvian Securities and Exchange Superintendence (SMV).
- ▶ **Stock transfer:** Shares are freely transferable. No restrictions or limitations are permitted. It is prohibited to incorporate clauses into the bylaws that impose restrictions on the transfer of shares.

4

Limited Liability Companies

Limited liability companies may be established with a minimum of two (2) and a maximum of twenty (20) members. The incorporation requirements are the same as those for all other types of corporations. Its capital stock is divided into ownership interests, which are accumulative and indivisible.

• Features:

- ▶ **Name:** Must include the indication "Sociedad Comercial de Responsabilidad Limitada" or the abbreviation "S.R.L."
- ▶ **Limited Liability:** Members are not personally liable for corporate obligations.
- ▶ **Management:** Members' Meeting and the General Manager.
- ▶ **Legal Reserve:** There is no obligation to make the legal reserve.
- ▶ **Transfer of Ownership Interests:** Transfer of interests in favor of third parties is subject to a right of first refusal, it is carried out by means of a notarially recorded instrument and must be registered with the Public Records Office. Unless otherwise established in the corporate bylaws, if the thirty (30)-day term established by the Business Corporations Act (LGS) expires and none of the members has exercised their right of first refusal, the corporation itself may acquire the ownership interests that have been offered. If the Members' Meeting decides not to buy, the offering member shall be free to transfer its interests to third parties.

5

Branches

Branches are secondary establishments via which a corporation, either national or foreign, carries out activities in a location other than its principal place of business. Branches lack their own independent legal standing. The parent company is liable for the branch's obligations.

Branches must have a permanent legal representative who shall have sufficient powers to perform the necessary legal dealings for the performance of its activities.

In the case of branches established by foreign corporations, the agreement for the establishment of a branch adopted by the parent company shall be notarized by the Peruvian consulate and certified by the Ministry of Foreign Affairs (MRE) in Peru, or, failing that, apostilled in its country of origin, so that it can be put into the form of a notarially recorded instrument and registered in the Public Records Office. The registration of the branch requires, among other things, a certificate of good standing of the parent company, duly notarized or apostilled, as applicable. According to the LGS, branches of foreign companies may be transformed so as to be incorporated in Peru under any corporation type regulated by the LGS.

5 Taxes

Tax System

The Tax System in Peru is governed by the principles of legal confidentiality and those of equality and respect for the basic rights of the person. The Constitution enshrines the principle of the non-confiscatory nature of taxes, as well as guaranteeing the right to tax confidentiality.

In Peru, the main taxes are levied on income, production and consumption, the circulation of money and equity. There are also other contributions to the Public Healthcare Service and the National Pension System.

The management and collection of taxes is the responsibility of the National Superintendence of Customs and Tax Administration (SUNAT) and, in some cases, the Municipalities or regulatory institutions.

SUNAT has the power to use all the methods of interpretation permitted by law, as well as to object to the economic purpose of taxpayers' acts, prioritizing content over the form of the acts. Analogy in tax matters is prohibited.

Starting on July 19, 2012, anti-evasion rules were established in the Tax Code regarding SUNAT's powers in situations considered to be tax evasion or simulated transactions.

In effect, in case of situations of tax evasion, SUNAT shall have the faculty to request the enforced payment of the tax debt, reduction of tax credits, tax losses, or the elimination of tax benefits (including the restitution of taxes unduly refunded). In order to implement this power, the Tax Administration shall prove that the taxpayer meets the following conditions:

- a) The taxpayer—whether individually or jointly and severally with other taxpayers—has engaged in illegal or deceptive acts to obtain a specific tax result; and
- b) The use of said deceptive or illegal act causes legal or economic effects other than tax savings or advantages equal or similar to those that would have been obtained through usual or legal acts.

However, as from July 12, 2014, the application of the general anti-evasion clause was suspended until the Executive Branch, by an Executive Order (*Decreto Supremo*) endorsed by the Minister of Economy and Finance, establishes the parameters of form and substance for application thereon.

Legislative Order (*Decreto Legislativo*) 1422 was published on September 13, 2018, to regulate the procedure for the application of the General Tax Evasion Act. In particular, this order requires the application of this act by a review committee consisting of tax administration officials. The order also expressly incorporates sanctions in application of the General Tax Evasion Act equal to those that apply to miscalculations of tax obligations. Likewise, it states that legal representatives shall be jointly and severally liable if it is found, based on the anti-evasion clause, that the taxpayer has been involved in acts of tax evasion.

Likewise, on May 6, 2019, Executive Order (*Decreto Supremo*) 145-2019-EF was published, approving the parameters of form and content for the application of the General Anti-Evasion Law and regulating the primary scope for its application to the definitive auditing procedure. The order also establishes a non-exhaustive list of situations in which the General Anti-Evasion Law could be deemed applicable.

Furthermore, Legislative Order (*Decreto Legislativo*) 1372 created a new obligation for companies, requiring them to have an internal procedure for identifying their final beneficiary, as well as to provide specific information on said beneficiary to the tax administration. The order also includes sanctions in case of failure to comply with said obligations, and the possibility of attributing joint and several liability for such failures to the company's legal representatives.

The following table shows the list of the main taxes in force according to their nature (direct, indirect, and municipal). Each one of these taxes is summarized below.

Direct Taxes	Indirect Taxes	Municipal Taxes
Income Tax (IR)	Value Added Tax (VAT)	Property Tax
Temporary Net Assets Tax (ITAN)	Selective Consumption Tax (ISC)	Property Transfer Tax
Tax on Financial Transactions (ITF)		Vehicle Property Tax

1

Direct Taxes

1. Income Tax (IR)

Income tax is levied on net income and is determined annually. The tax year begins on January 1 of each year and ends on December 31, with no exceptions. Income tax returns for corporations, branches, and individuals must generally be filed by March 31 of the following year.

Companies domiciled in Peru recognize their inflows and outflows based on the accrual criterion. Starting on January 1, 2019, the Income Tax Act includes a definition of accrual for purposes of determining income tax, which is not based on the provisions of the IFRS (except for any express remissions under the Income Tax Act).

Domiciled Legal Entities

Corporations established in Peru are subject to third income tax bracket on a worldwide income basis. Non-domiciled corporations, branches established in Peru, and permanent establishments of non-domiciled legal entities that are located in Peru are only taxed on Peruvian-source income.

The corporate income tax rate for domiciled companies is 29.5% and is applied over the net income, which is determined after the deduction of expenses incurred in the generation of income or maintenance of the source.

Dividends received from other domiciled legal entities are not taxed. Dividends received from non-domiciled legal entities are subject to a tax rate of 29.5%.

In general, subject to certain requisites and conditions, the deduction of interest, insurance, non-recurring losses, collection, depreciation, and pre-operating expenses, authorized reserves, write-offs and loan loss provision, provision for fringe benefits, retirement pensions, and employee bonuses, etc., is permitted.

On December 29, 2022, Law 31652 was published, establishing an exceptional, temporary regimen of accelerated depreciation for buildings and structures whose construction began on or after January 1, 2023, and which meet certain conditions.

Expenses incurred abroad are deductible provided they are necessary for generating income and have been accredited with the respective payment vouchers issued abroad.

Expenses that are not accepted as deductions include, among others, personal expenses, assumed income tax (except in the case of interests from loans granted by non-resident lenders), tax and administrative fines, donations and reserves, or allowances not permitted by law, etc.

It should be noted that starting in fiscal year 2019, costs or expenses for services received from non-domiciled companies (whether related or not) must be paid prior to the submission of the tax return to be considered deductible.

Domiciled companies can select between the following two systems to carry forward their losses:

a) Losses can be carried forward for four consecutive years, beginning with the first subsequent year in which the losses arise.

On an exceptional basis, those companies that have chosen this loss carryforward system may offset the net loss incurred in 2020 for up to five fiscal years.

b) Losses can be carried forward indefinitely, but with a deduction limit equivalent to 50% of the taxpayer's income for each fiscal year.

Losses may not be carried forward to years prior to the year in which they were generated, nor may net losses from abroad be calculated.

It should be noted that domiciled companies are obligated to make prepayments on income tax, for an amount determined by comparing the monthly installments resulting from the application of one of the following methods, whichever is higher:

- Percentage method: Apply 1.5% to the total net income for the month.
- Coefficient method: Divide the tax calculated for the previous fiscal year by the total net income for the same fiscal year and such result shall be named coefficient. The resulting coefficient shall be applied to the net income for the month. For the months of January and February, use the coefficient determined based on the calculated tax and net income of the fiscal year prior to the previous one.

Notwithstanding the foregoing, it is possible to request the suspension of the obligation to make the referred payments, under certain circumstances.

Should the payments exceed the annual tax, the excess may be carried forward as credit against subsequent advance and regularization tax payments, or may be refunded to the taxpayer.

Domiciled Individuals

Under the Peruvian tax system, Peruvian citizens domiciled in Peru are subject to taxation on their worldwide income, regardless of the country from which it derives, from which payments are made, or the currency in which income is received. By contrast, non-domiciled individuals are only taxed in Peru on their Peruvian-source income.

In the case of domiciled individuals, fourth and fifth income tax bracket, i.e., the tax on income received for personal work (independent and dependent, respectively), as well as foreign-source income, is determined by applying a cumulative progressive rate, as follows:

Up to the 2014 Fiscal Year	
Sum of Net Peruvian Source Income and Foreign-Source Income	Rate
Up to 27 Tax Units	15%
More than 27 up to 54 Tax Units	21%
More than 54 Tax Units	30%

From the 2015 Fiscal Year	
Sum of Net Peruvian Source Income and Foreign-Source Income	Rate
Up to 5 Tax Units	8%
More than 5 up to 20 Tax Units	14%
More than 20 up to 35 Tax Units	17%
More than 35 up to 45 Tax Units	20%
More than 45 Tax Units	30%

For salaries, wages, and any other type of remuneration received for dependent or independent work (fourth- and fifth- income tax bracket) a non-taxable minimum of 7 Tax Units (PEN36,050 or approximately USD9,500) applies. Additionally, there is:

- ▶ A deduction of an additional three Tax Units, subject to certain conditions;
- ▶ A deduction of 20% on income received for independent work; and
- ▶ A deduction of donations and Tax on Financial Transactions (ITF).

The deduction of further expenses is not permitted.

Income obtained by domiciled individuals from the lease, sublease, or assignment of assets (first income bracket) as well as all other capital incomes (second income tax bracket) are subject to an effective rate of 5% of gross income.

Dividends distributed by companies incorporated or established in Peru, received by individuals, are subject to a 5% tax rate.

It should be noted that the retained earnings obtained as of December 31, 2014, which form part of the distribution of dividends or any other form of profit sharing, shall be subject to a rate of 4.1%, while those obtained between January 1, 2015 and December 31, 2016 shall be taxed at 6.8%.

Non-Domiciled Individuals

Individuals not domiciled in Peru must pay taxes only on Peruvian-source income.

In general, Peruvian-source income is considered to include:

- ▶ Income received for properties and the rights related thereto, including that coming from their disposal, when the properties are located within Peruvian territory.
- ▶ Income received for assets or rights, including that coming from their disposal, when such assets are physically located or the rights are economically used in the country;
- ▶ Royalties when the assets or rights are economically used in the country, or when they are paid by a taxpayer domiciled in the country.
- ▶ Interest, when the capital is placed or economically used in the country; or when the payer is a taxpayer domiciled in the country.
- ▶ Dividends distributed by entities domiciled in the country.
- ▶ Civil, commercial, business, and personal work activities conducted in the country.
- ▶ The disposal or surrender of marketable/ negotiable securities (shares¹, ownership interests, bonds, etc.), when they have been issued by entities incorporated or established in Peru.
- ▶ Technical assistance and digital services economically used in Peru.
- ▶ The income obtained by non-domiciled taxpayers from derivative financial instruments entered into with domiciled taxpayers whose underlying asset involves the exchange rate of Peruvian currency compared to a foreign currency, provided that the effective term thereof is less than 60 calendar days.
- ▶ Income obtained from the indirect disposal of shares or ownership interests in the capital stock of legal entities domiciled in the country, provided that it meets certain requisites.
- ▶ Those obtained from credit transfers (factoring, etc.) in which the acquirer assumes the debtor's credit risk, when the transferor of the credit or the debt assigned is a domiciled taxpayer. However, starting on January 1, 2019, all income obtained by acquirers of collection rights transfers derived from Public-Private Partnerships (PPP) shall be tax-free.

¹ Under the provisions of Law 31662 (in force until December 31, 2023) capital gains deriving from the disposal of assets or other securities representing shares of stock through the Lima Stock Exchange (BVL) are exempted from Income Tax, provided that they meet certain requirements.

For non-domiciled individuals, the income tax on the dependent labor income is 30%, with no deductions.

Income received for independent work is subject to an effective tax rate of 24%.

Without prejudice to the foregoing, income earned in their country of origin by non-domiciled individuals entering Peru on a temporary basis in order to perform any of the activities listed below are not considered to be Peruvian-source income.

Such activities include:

- Acts executed before making any kind of foreign investments or doing business of any kind.
- Acts intended to supervise or control the investment or business (data or information collection, interviews with people from the public or private sectors, among others).
- Acts related to the hiring of local personnel.
- Acts related to the execution of similar contracts or documents.

For foreigners coming from countries with which Peru currently maintains agreements to avoid double taxation, such as Japan, Chile, Canada, Brazil, Portugal, South Korea, Mexico and Switzerland; or from countries that are part of the Andean Community of Nations (Ecuador, Colombia, Bolivia, and Peru), other tax provisions may apply.

Non-Domiciled Entities

Peruvian-source income obtained by non-domiciled entities is subject to income tax withholding or direct payment in case withholding is not applicable (e.g. when the payer is not resident in Peru), depending on the type of income, according to the table shown below:

Withholding Tax Rate on Income of Non-Domiciled Companies

Income	Rate
Dividends and other forms of profit distribution, as well as the remittance of profits from the branch	<ul style="list-style-type: none"> ► Regarding income obtained until December 31, 2014 considered part of the distribution of dividends or any other type of profit sharing, a rate of 4.1% will be applied. ► 2015-2016: 6.8% ► 2017 and beyond: 5%
Interest paid to non-domiciled companies, provided certain requirements are met	► 4.99%
Interest paid to related companies abroad	► 30%
Technical assistance services economically used in Peru	► 15%
Digital services economically used in Peru	► 30%
Royalties	► 30%
Capital gains deriving from the disposal of marketable/negotiable securities through the Lima Stock Exchange (BVL) including: <ul style="list-style-type: none"> - Disposal, redemption, or surrender of shares, bonds, or other securities issued by companies incorporated in Peru - Indirect disposal of shares in Peruvian corporations 	► 5%
Capital gains deriving from the disposal of marketable/negotiable securities outside the Lima Stock Exchange (BVL), including: <ul style="list-style-type: none"> - Disposal, redemption, or surrender of shares, bonds, or other securities issued by companies incorporated in Peru - Indirect disposal of shares in Peruvian corporations 	► 30%
Credit transfers via factoring or other transactions wherein the acquirer assumes the debtor's credit risk, when the transferor of the credit or debt assigned is a domiciled taxpayer.	► 30%
Other income deriving from business activities conducted in Peruvian territory	► 30%

Income from activities performed partially in Peru and partially abroad by non-domiciled companies, including that obtained by their branches or permanent establishments are subject to the following effective income tax rates:

Activities	Effective Income Tax Rate (%)
Air Transport	0.3%
Maritime Transport	0.6%
Vessel Lease	24.0% ¹
Aircraft Lease	18.0% ¹
Supply of Transport Containers	4.5%
Demurrage of Transport Containers	24.0%
Insurance	2.1%
International News Agencies	3.0%
Motion Picture Distribution	6.0%
Television Broadcasting Rights Assignment	6.0%
Telecommunication Services	1.5%
Sale of hydrobiological resources to companies domiciled in Peru	2.7%

¹ The withholding rate for these activities is 10%.

Thin Capitalization Rules

Starting in fiscal year 2021, only the deduction of interest on financing (whether from related or unrelated parties) shall only be allowed for an amount of up to 30% of the EBITDA for the previous fiscal year. This concept has a specific definition for the purposes of this law (net income after loss carryforwards plus net interest, depreciation, and amortization). Nondeductible interest may be carried forward for the next four taxable fiscal years with the net interests of the corresponding fiscal year.

The foregoing rules shall not apply to financial and insurance companies; taxpayers whose income does not exceed 2,500 Tax Units (approximately USD3.4 million); taxpayers developing infrastructure, public utility, and other projects through Public-Private Partnerships (PPP) or projects in assets; as well as debt from the issuing of nominative securities via initial public offering in Peru, provided they meet certain conditions (public offering, etc.).

Double-Taxation Treaties

Peru has currently signed and ratified treaties to avoid double taxation with the following countries: Brazil, Chile, Canada, Japan, Portugal, South Korea, Switzerland and Mexico.

Peru is also part of the Andean Community of Nations, along with Colombia, Ecuador, and Bolivia. As such, Decision 578 for the avoidance of double taxation between the countries referred to above applies. Unlike the OECD Model, Decision 578 prioritizes taxation at the source, using the exemption method.

Additionally, an agreement was signed with Spain and is currently pending ratification. Likewise, the negotiation with the United Kingdom have been successfully concluded, and the agreement is expected to be signed in the next months. There are also negotiations underway with Qatar, the United Arab Emirates, The Netherlands, Italy, France and Sweden.

Transfer Pricing

Transfer pricing rules are based on the arm's length principle as interpreted by the Organization for Economic Co-operation and Development (OECD) and should be considered solely for income tax purposes.

In Peru, these rules not only apply to transactions between related parties, but also to transactions with non-cooperative countries or territories or tax heavens and entities subject to a preferential tax system. Note, however, that the value agreed to by the parties must only be adjusted when a lower tax payment has been generated in the country. Adjustments shall be permitted

to reduce the taxable base of the tax in Peru solely for transactions with residents in countries with which Peru has an international double taxation avoidance treaty, provided such adjustment is permitted in accordance with said treaty and is accepted by the Peruvian Tax Administration.

The prices of the transactions subject to transfer pricing rules shall be determined in accordance with any of the internationally accepted methods, for which purpose the one found to best reflect the economic reality of the operation shall be taken into account. In the event that none of the referred methods is applicable, other methods may be used, on the condition that proper supporting information is provided.

Taxpayers subject to the scope of application of transfer pricing laws shall comply with submitting three annual informational tax returns, depending on the level of their turnover and the amount of the transactions: i) Local Report; ii) Master Report; and iii) Country-by-Country Report.

Taxpayers involved in international transactions involving two or more jurisdictions may enter into Advance Transfer Pricing Agreements (APAs) with the National Superintendence of Customs and Tax Administration (SUNAT), which may be unilateral or bilateral. Bilateral agreements may only be entered into with regard to operations with residents in countries with which Peru has entered into double taxation agreements.

APAs may also be entered into with regard to transactions carried out between related companies domiciled in Peru.

International Tax Transparency System

Starting on January 1, 2013, the "International Tax Transparency System" was incorporated, applicable to taxpayers domiciled in Peru who are owners of controlled non-domiciled entities (CNDEs) with regard to the passive income of the CNDEs, provided that they are subject to income tax in Peru for foreign-source income.

According to this system, the passive income obtained through subsidiaries incorporated in other jurisdictions must be included in the taxable income of individuals and companies domiciled in Peru, even when the effective distribution of the dividends associated with such passive income has not occurred.

The Law provides the following requisites that foreign corporations must meet in order to be considered a CNDE:

- ▶ It has a legal status apart from that of its partners, associates, shareholders or, in general, the people who integrate it.
- ▶ It is incorporated, established, domiciled in or is a resident of (i) a tax haven; or (ii) a country or territory where its passive income is not subject to income tax or such tax is at least 75% less than the income tax that would have been levied in Peru.

▶ It is the property of a taxpayer domiciled in Peru. For such purpose, this shall be understood to be the case when, at the close of the fiscal year, the domiciled taxpayer has—on its own or jointly with its related parties domiciled in the country—a direct or indirect share in over 50% of the capital stock, or the results, or voting rights of said entity.

Likewise, the presumption of a share in a CNDE is established when there is a direct or indirect call option in said entity.

For the application of the system, an exhaustive list of concepts that qualify as passive income (e.g., dividends, interest, royalties, capital gains deriving from the disposal of real property and marketable/negotiable securities, etc.) and a list of excluded concepts have been drawn up.

It has also been established that if the income qualifying as passive is equal to or greater than 80% of the total income of the CNDE, the total income thereof shall be considered passive income.

The passive income above shall be attributed to its owners domiciled in Peru who, as of the close of the fiscal year, have a direct or indirect share in over 50% of the results of the controlled entity.

Reduction in Capital Stock

Starting on June 30, 2012, the reduction of capital stock for up to the amount of profits, surplus from revaluation, adjustments due to restatement, freely-available premiums and/or reserves shall be considered a distribution of dividends if:

- ▶ The amount of the profits, revaluation surplus, adjustments due to restatement, or freely-available premiums and/or reserves (i) exist at the time the resolution is adopted for the reduction of the capital stock; (ii) have been previously capitalized, unless the reduction in capital stock is allocated to cover losses, in accordance with the Business Corporations Act (LGS).
- ▶ If, after the resolution adopted for the reduction, the profits, revaluation surplus, adjustments due to restatement, or freely-available premiums and/or reserves are:
 - i) Distributed: Such distribution shall not be considered as dividends or any other form of profit sharing.
 - ii) Capitalized: The subsequent reduction corresponding to the amount of the capitalization in question shall not be considered dividends or any other kind of profit sharing.

Corporate Reorganization System

With regard to income tax applicable to transfer of assets as a result of a corporate reorganization, there are three systems from which the taxpayer may choose:

- ▶ **Voluntary revaluation with tax effects:** The difference between the revalued value and the historical cost is subject to income tax. The tax basis of the assets transferred shall be the revalued value.

Starting on January 1, 2013, the difference subject to income tax may not be offset with the tax loss of the taxpayer performing the revaluation.

- ▶ **Voluntary revaluation without tax effects:** The difference between the revalued value and the historical cost shall not be subject to income tax provided that the earnings are not distributed. In this case, the revalued value of the assets transferred is not a tax basis.

Starting on January 1, 2013, it is presumed, without permitting evidence to the contrary, that earnings have been distributed:

- i) In the case of a spin-off, if the newly-issued shares are transferred or cancelled by a subsequent reorganization, provided that the shares represent over 50% of the capital stock or voting rights and the transfer or cancellation occurs before the close of the fiscal year following that in which the spin-off entered into force.
- ii) When the distribution of dividends is agreed to within the four fiscal years following the fiscal year in which the reorganization is performed.

- **Transfer at cost value:** The assets transferred shall have the same tax basis for the acquirer as they would have had for the transferor.

Starting on January 1, 2013, under certain circumstances, it shall be assumed, without allowing evidence to the contrary, that capital gains exist (difference between the market value and the tax basis of the assets transferred), in the case of spin-off or simple reorganization (i.e. contribution in exchange for shares), when the newly-issued shares or assets are transferred (applicable to spin-off) or cancelled (applicable to spin-off and simple reorganization) due to a subsequent reorganization, provided that the shares represent over 50% of the capital stock or voting rights and the transfer or cancellation occurs before the close of the fiscal year following that in which the spin-off or simple reorganization entered into force.

Indirect Stock Transfer

Starting on February 16, 2011, the Income Tax Act considers capital gains obtained from the indirect transfer of shares or ownership interests of capital stock in legal entities domiciled in Peru to be Peruvian-source income subject to tax.

In this regard, the indirect transfer of shares shall be considered to have taken place when shares or ownership interests in the capital stock of a company not domiciled in the country which is in turn the owner—whether directly or through another company or companies—of shares or ownership interests in the capital stock of legal entities domiciled in the country are disposed of, provided that:

- i) In any of the 12 months preceding the disposal, the market value of said shares or ownership interests is equivalent to 50% or more of the market value of the non-domiciled corporation.
- ii) In any 12-month period, the transferor and its related parties dispose by one or more simultaneous or successive operations of shares or ownership interests that represent 10% or more of the capital stock of the non-domiciled legal entity.

Likewise, regulations have been established for specific cases involving the indirect disposal of shares, such as: i) when the total amount of the shares or ownership interests in legal entities domiciled in the country is equal to or greater than forty thousand (40,000) Tax Units (UITs) (PEN206 million or USD55.5 million approximately); ii) when a non-domiciled legal entity issues new shares or units of interest as a consequence of a capital increase, as a result of new contributions, capitalization of credits or reorganization and places them for a value lower than the market value, provided that in any of the 12 months prior to the issue the market value of the domiciled legal entities that are indirectly disposed of is equivalent to 50% or more of the market value of the non-domiciled legal entity; and, iii) if the shares or ownership interests being disposed of, or the new shares or ownership interests issued as a result of a capital stock increase, correspond to a legal person who resides in a non-cooperative jurisdiction or tax haven, among other cases.

The Regulations contain specific rules for establishing the market value of the shares or ownership interests in order to determine whether this is considered an indirect disposal of shares. For such purpose, the trading price method (applicable only to shares listed in a Stock Exchange), discounted cash flow method, and the shareholder value augmented method (accounting equity value) have been taken into account.

Under certain circumstances, the Peruvian issuer shall be held jointly liable, unless the non-domiciled seller has established a branch in the country.

Non-cooperative countries or territories or tax heavens

Companies domiciled in the country cannot deduct, for effects of determining their income tax, the expenses derived from operations performed with individuals or entities residing in countries or territories with little or no taxation, nor shall they have the right to offset losses generated by these operations with foreign-source income, except in the case of operations involving (i) loans; (ii) insurance and reinsurance; (iii) assignment for use of vessels or aircraft; (iv) transport performed from Peru abroad and from abroad to Peru; (v) fee for transit through the Panama Canal.

Likewise, those operations performed from, to or through non-cooperative countries or territories or tax heavens shall comply with transfer pricing rules.

Certain measures have also been taken to counteract the use of "preferential tax systems" which grants the same tax treatment to non-cooperative countries or territories or tax heavens.

Tax Credit due to Taxes Paid Abroad

Taxes effectively paid abroad may be offset against Peruvian income tax, even if there is no double taxation treaty, provided that the amount resulting from the application of the average taxpayer rate for income obtained abroad is not exceeded.

The credit not applied in a given fiscal year cannot be offset during subsequent or prior fiscal years, nor may it be refunded.

Starting on January 1, 2019, under certain conditions, credits may be deducted not only in the case of income tax paid abroad, as levied on the distribution of dividends (direct credit), but also the tax levied on the business activities of said subsidiary (first-tier indirect credit) and even that levied on the business activities of the latter's subsidiaries (second-tier indirect credit).

The indirect credit may only be claimed if certain requirements are met, such as an ownership interest of at least 10% in the respective subsidiary over the course of at least twelve (12) months. Additionally, the second-tier subsidiary must: (i) be a resident of or domiciled in a country with which Peru has entered into an information exchange agreement; or (ii) be a resident of or domiciled in the same country as the corporation that distributes dividends to the Peruvian corporation.

The application of the indirect credit shall not include the income tax paid abroad by corporations residing in non-cooperative countries or territories or tax heavens, or rent, income, or earnings subject to a preferential income system.

Any direct or indirect credits not applied during a given fiscal year may not be offset against subsequent or previous fiscal years, nor shall they qualify for refunds.

Other specific anti-avoidance rules

- Non-deductible capital losses for the disposal of securities:

Capital losses originated from the disposal of securities shall not be deductible when:

- a) At the time of the disposal or thereafter, within a term of no more than 30 calendar days, the acquisition of marketable/negotiable securities of the same type as those disposed of or call options thereon occurs.
- b) Prior to the disposal, within a term of no more than 30 calendar days, the acquisition of marketable/negotiable securities of the same type as those disposed or of call options thereon occurs.

The tax basis of the marketable/negotiable securities whose acquisition would have given rise to the non-deductibility of the capital losses in question shall be increased by the amount of the non-deductible capital loss.

2. Temporary Net Assets Tax (ITAN)

The Temporary Net Assets Tax (ITAN) is equivalent to 0.4% of the total value of net assets in excess of PEN1 million determined as at December 31 of the previous year. Companies in the pre-operational stage are excluded. The ITAN payments can be used as an income tax credit. A refund may be requested for any balance not used in the current year.

To avoid double taxation issues, subsidiaries and branches of foreign corporations may elect to credit against the ITAN the credit for the income tax paid in Peru. As such, taxpayers might be able to claim the income tax paid in Peru as foreign tax credit in their country of origin, and not the ITAN.

3. Tax on Financial Transactions (ITF) and Means of Payment

A 0.005% tax is generally levied on deposits and withdrawals in Peruvian bank accounts.

Any payment in excess of PEN2,000 or USD500 must be made using the so-called "Means of Payment," which include bank deposits, drafts, wire transfers, transfer of funds, payment orders, credit and debit cards issued in Peru, and "non-negotiable checks."

On March 3, 2022, Legislative Order (Decreto Legislativo) 1529 was published, according to which the payment of obligations to non-domiciled the payment of obligations via payment systems can be channeled through financial system entities or non-domiciled banking or financial companies, provided they are not incorporated and do not reside in non-cooperative countries or territories or tax havens. For this purpose, non-cooperating or low or zero taxation countries or territories are considered to be those indicated in Annex 1 to the Income Tax Law Regulations, which do not have a Tax Information Exchange Agreement or a Double Taxation Avoidance Agreement in force with Peru that includes an information exchange clause.

The law additionally states that whenever payment systems must be used to pay obligations to a third party designated by the supplier, this fact must be reported to SUNAT before payment is made.

Not using these methods of payment would mean that the corresponding cost or expense of the payment cannot be recognized for income tax purposes. In addition, any Value Added Tax (VAT) in said transactions cannot be used as tax credit.

2

Indirect Taxes

1. Value Added Tax (VAT)

Taxable Base and Application

Value Added Tax (VAT) is levied on the sale of goods, the delivery and use of services and the import of goods in Peru with an 18% tax rate (includes 2% for Municipal Promotion Tax).

The Value Added Tax (VAT) Act uses the debit/credit system, under which the VAT paid on sales is offset against the VAT paid on purchases. Any VAT that is not used as credit in a particular month may be applied in the following months until it is used up. This credit is not subject to expiration or the running of statutes.

Corporate reorganizations are not subject to this tax.

Early VAT Recovery System

Individuals or legal entities making investments in any sector of the economic activity that generate a third income tax bracket and developing projects currently in a 2-year or longer pre-operational stage may resort to the Early VAT Recovery

System and request the early recovery of the VAT transferred or paid for the acquisition of new capital goods, new intermediate goods, as well as construction services and agreements, directly used in the execution of the corresponding project.

For such purpose, the publication of a Ministerial Resolution qualifying the applicant as a beneficiary of the system is required. Such resolution is approved by the Ministry of the corresponding sector and the Agency for the Promotion of Private Investment (ProInversión). The investment to be made under the project may not be less than USD2 million as of December 31, 2024; after that, the minimum investment commitment amount will be USD5 million, except for investments to be made in the agricultural sector, which is exempt from this requirement.

Finally, the new special system authorizing micro-enterprises engaged in production activities to enjoy the refund of the tax credit paid on imports and/or local purchases of new capital goods, not exhausted within the three consecutive months following the date of registration of the respective voucher in the Purchase Journal.

Final VAT Refund

A tax benefit consisting of the refund of all Value Added Taxes (VAT) and Municipal Promotion Taxes transferred or paid for having acquired certain goods and services directly tied to exploration activities during the exploration stage. Final VAT refunds apply to: (i) individuals and legal entities who are the holders of mining concessions; and (ii) investors who have entered into license agreements or service contracts according to the Organic Act on Hydrocarbons.

In both cases, the beneficiary must be in the exploration stage. In the case of holders of mining concessions, an exploration investment agreement involving a minimum investment of USD500,000 must also be adopted.

The tax refund is not conditional upon the beneficiary's commencement of production operations. This regimen is in force until December 31, 2027.

Export of Goods

The export of goods is not subject to the payment of VAT.

The Value Added Tax Act defines the export of goods as the sale of real property performed by a taxpayer domiciled in the country to a non-domiciled party, regardless of whether the transfer occurs abroad or in Peru, provided that said goods are subject to a customs process for definitive export.

If the transfer of ownership occurs in the country prior to loading, the classification as export of goods is conditional upon the goods being shipped within a term of no more than 60 calendar days after the date of issue of the respective payment voucher.

When the sale involves documents issued by a bonded warehouse referred to in the General Customs Act or a normal deposit warehouse regulated by the Superintendency of Banking, Insurance and Private Pension Fund Management Companies (SBS) that guarantee the purchaser's right to dispose of said goods, the classification shall be conditional upon the shipment being performed within a term of no more than 240 calendar days after the date on which the warehouse issues the document.

If the established terms expire without the goods having been shipped, it shall be understood that the operation has been performed in national territory, and shall be levied with or exempted from VAT, as applicable.

Export of Services

The export of services is not subject to the payment of VAT.

Operations considered to be export of services include those that meet the following requirements: (i) they are provided for valuable consideration, (ii) the exporter is domiciled, (iii) the user is non-domiciled, (iv) the use or exploitation of the services by the non-domiciled party occurs abroad; and (v) the exporter is previously registered in the Exporters' Registry kept by SUNAT.

2. Selective Consumption or Luxury Tax (ISC)

This tax applies to the consumption of specific goods, such as fuels, cigarettes, beers, liquors, soft drinks, gambles and bets, etc. It is applied under three systems:

- (i) specific, which involves a fixed amount in Soles per unit of measurement;
- (ii) at value, based on a percentage of the sale price; and
- (iii) sale price, based on a percentage of the suggested retail price.

Starting on January 1, 2019, casino games and slot machines are also subject to ISC.

3

Municipal Taxes

1. Property Tax

Property Tax is an annual municipal tax that is levied over the value of urban or rustic premises. For such purpose, premises are considered to include land, buildings, and fixed and permanent facilities.

The tax rate is a progressive cumulative scale varying between 0.2%, 0.6% and 1.0%, depending on the value of the property. This tax is charged to the individual or legal entity that, as at January 1 of every year, is the owner of the levied property.

2. Property Transfer Tax

Property Transfer Tax is levied on the transfer of urban or rural property, with or without valuable consideration, in any form or manner, including sales in which the ownership rights are not transferred to the buyer until the total price is paid.

The taxable base is the sale price of the property, which shall not be less than its self-assessed value. The tax rate is 3%, to be paid by the buyer. The first 10 Tax Units (UITs) (PEN51,500 or USD13,500) are tax-free.

3. Vehicle Property Tax

The Vehicle Property Tax is an annual tax levied on the ownership of automobiles, pickup trucks, and station wagons manufactured in the country or imported that are no more than three years old. The three years are calculated from the first filing of the automobile with the Vehicle Property Registry.

The taxable base is determined by the original value of acquisition, importation, or entry into ownership. The applicable tax rate is 1%.

4

Customs System

1. Customs Taxes

Imported goods are subject to import tariffs with currently ad valorem rates of 0%, 6% and 11%².

Likewise, the Value Added Tax (VAT) of 18% is applied to imported goods. Additionally, and depending on the type of goods and origin thereof, imports may be taxed with the Selective Consumption or Luxury Tax (ISC), Antidumping Duties, Compensation Duties, or others.

There are also specific duties to be applied as additional variable duties on imported agricultural and livestock products such as hard yellow corn, rice, milk and sugar.

Some imported goods can also be charged with anti-dumping or compensation duties. The former is applied to some imported goods when, according to the Indecopi assessment, the price discrimination could harm or threaten to harm a branch of national production. Compensation duties are applied to imported goods that are

² In addition, a tariff rate of 4% is charged in the case of Express Shipments (goods with a FOB value of USD200 or more, up to a maximum amount of USD2,000 per shipment).

subsidized in their country of origin and can harm or threaten to harm national production branch via the importation thereof, according to the Indecopi assessment.

The customs taxes and duties applied are summarized as follows:

Tax	Rate	Taxable Base
Customs Tariffs ^(a)	0%, 6% y 11%	CIF Value ^(d)
Value Added Tax (VAT) ^{(b)(c)}	18%	CIF Value + Customs Duties

- (a) The customs tariff rates depend on the type of goods being imported.
- (b) The Value Added Tax (VAT) can be used as tax credit by the importer.
- (c) Certain goods are additionally subject to the Selective Consumption or Luxury Tax (ISC).
- (d) This value shall be determined according to the WTO Customs Valuation Agreement, as well as the standards of the Andean Community and national law.

The import of goods is subject to the Prepaid VAT System, wherein the tax is determined by applying a percentage to the CIF customs value plus all taxes levied on the import and other surcharges, where applicable.

The applicable tax rate is 3.5%, 5%, or 10%, depending on the situation of the importer and/or the goods to be cleared through customs. Like VAT, the amount paid may be used by the importer as a tax credit. However, there are certain cases in which the prepaid VAT does not need to be paid; for example, when the import is performed by VAT withholding agents, or in the case of certain goods excluded from this system.

Additionally, payments related to imported goods must be made using payment methods such as account deposits, drafts, fund transfers, payment orders, among others established in Section 5 of the Consolidated Text of Law No. 28194, Act for the Fight against Tax Evasion and for the Formalization of the Economy, approved by Executive Order (Decreto Supremo) 150-2007-EF. No. 150-2007-EF. This is mandatory for payments from PEN2,000 or USD500. When importing consumer goods worth more than USD2,000, the services of a customs agent authorized by Peruvian Customs will be necessary, to undertake the documentary procedures for the imports. It is worth noting that the importer will be required to have the necessary documents that support the entry of goods, such as the commercial invoice, shipping documents, etc.

In addition to the formalities of customs clearance procedures, there are local regulations that establish additional requirements for the entry of goods that are considered restricted or prohibited. Further details are provided herein below.

2. Restricted or Prohibited Goods

Some goods that are imported into the country may be considered by legal mandate to be restricted or prohibited, for reasons of national security or public health, among other reasons.

Restricted goods are those that require special authorizations, licenses, permits, etc., from the pertinent institutions, depending on the goods to be imported, in order to be imported into the country. These goods must have the required documentation at the time of importation, prior compliance with the requirements established by the control units of the competent sector.

Some of the entities and types of restricted goods are as follows:

- ▶ Ministry of Internal Affairs (MININTER), through the National Superintendency for the Oversight of Security Services, Weapons, Munitions, and Explosives for Civilian Use (SUCAMEC) for goods such as fire arms, explosives, etc.
- ▶ Ministry of Agriculture (MINAGRI), through the National Agricultural Sanitation Service, such as the institution in charge of protecting agricultural health, etc.
- ▶ Ministry of Transportation and Communications (MTC) for goods using radio-electric transmitters in general and/or communications equipment.
- ▶ Ministry of Foreign Affairs for texts and/or publications that include geographical, cartographical and historical material.
- ▶ Ministry of Industry and Fisheries, through the National Fisheries Health Service (SANIPES) with respect to fishery, aquaculture and/or hydrobiological products.

Furthermore, the prohibited goods are not allowed to enter or leave the country.

- ▶ National Superintendency of Customs and Tax Administration (SUNAT) through the National Intendancy of Chemical Supplies and Supervised Goods for controlled chemical inputs and audited goods given its probability to be used in illegal mining and in the preparation of illegal drugs, among others.
- ▶ Ministry of Health (MINSA), through the Medicines, Supplies and Drug Administration (DIGEMID), with respect to medicines; and through the General Bureau of Environmental Health (DIGESA) with regard to food and beverages, etc.
- ▶ Ministry of Energy and Mines (MINEM) in the case of goods (products, machinery and equipment) that use radioactive sources.

3. Anti-Dumping Measures and Compensation Duties

When an import is performed, anti-dumping and/or compensation duties may be applied for the customs clearance of certain goods in order to prevent or to correct distortions in the market due to dumping or subsidies, as set forth by the Commission for Control of Dumping and Subsidies (CFD) of the National Institute for the Defense of Free Competition and the Protection of Intellectual Property (Indecopi).

Likewise, it is possible that during or after customs clearance, Indecopi may bring proceedings to establish anti-dumping or compensation duties, in those cases in which the declared prices may cause a threat or harm to a branch of national production.

It should be noted that the measures established by Indecopi Commission for Control of Dumping and Subsidies (CFD) may be temporary or permanent.

Currently, anti-dumping duties are charged on biodiesel originating from Argentina, taffeta weave fabrics from Pakistan; footwear, taffeta weave fabrics and zippers from China, as well as biodiesel from the United States of America, among others. Likewise, some final compensation duties are charged on biodiesel imports originating from Argentina and from the United States, among others.

4. Trademarks and Patents

For purposes of protecting copyrights and the like, as well as trademarks, country border measures have been established so that a request may be initiated ex parte by the interested party, or ex officio, through the Customs Administration.

This mechanism permits companies that own a protected right to register with the Customs Authority in order to request that an importation process be suspended (authorization for removal from bonded warehouses) in the case of goods that are presumed to bear fake or confusingly similar trademarks, or pirated goods that violate copyrights. Such requests are filed so that Indecopi may conduct an inspection of the goods to be imported into the country.

5. Customs Systems

The following are some of the customs systems established in the General Customs Act:

Drawback

The simplified system of returning customs duties, or "drawback," allows producer-exporters to recover all or part of the customs duties paid on importing raw materials, inputs, intermediate goods, and parts and pieces incorporated or used in the production of goods to be exported, provided the CIF import value is not more than 50% of the FOB value of the exported product, and all the requisites established in order to be eligible for this benefit are met. The drawback rate applicable is equivalent to 3% of the FOB value of the exported product.

Duty-Free Replacement of Goods

This customs system allows for importation with automatic exemption from customs duties and other taxes levied on imports, goods equivalent to those which—after having been cleared through customs—have been processed, elaborated, or materially incorporated into products that are permanently exported. The beneficiaries of this system are those individuals or legal entities that have exported, directly or through third parties, products which use imported goods.

Temporary Admission for Re-Exportation in the Same State

This customs system allows for the reception of certain goods in national territory, with the suspension of customs duties and other taxes levied on the importation thereof (for a maximum period of 18 months) duly guaranteed, destined for a specific purpose in a specific place and which will be re-exported within the established term without having undergone any modification whatsoever, with the exception of the depreciation as a consequence of normal wear and tear.

In the case of hydrocarbon contractors, they may temporarily import, for a period of 2 years (extendable for 2 additional years), goods intended for their activities with import tax relief, pursuant to the provisions of the Consolidated Text of the Organic Hydrocarbons Act, as approved by Executive order (Decreto Supremo) 042-2005-EM.

Bonded Warehouses

This system allows for goods entering national territory to be stored in a bonded warehouse for such purpose, for a given period (maximum term of 12 months) under the control of a customs agency, without paying customs duties and other taxes applicable to import for consumption, provided that no specific customs system has been requested for them and they are not in a situation of abandonment.

6. Trade Agreements

Peru's development strategy is based on an open economy with a competitive export offer. This successful strategy has allowed the country to consolidate its foreign trade as an instrument for economic development and poverty reduction.

International trade negotiations have helped the Peruvian economy address and gradually reduce its external vulnerability in times of crisis such as the present international conjuncture. In recent years, Peru has negotiated Free Trade Agreements (FTAs) with large and medium-sized markets.

This allows foreign goods to enter Peru under preferential conditions, with a customs duty reduction of up to 100%, provided they comply with the rules of origin established in each one of the 24 Free Trade Agreements and Economic Integration Agreements (FTA and EIA) signed by Peru:

- ▶ Peru-Andean Community Free Trade Agreement.
- ▶ Agreements of the World Trade Organization (WTO).
- ▶ Agreements of the Asia-Pacific Economic Cooperation Forum (APEC).
- ▶ Economic Complementation Agreement 58 signed by between the governments of the Argentine Republic, the Federative Republic of Brazil, the Republic of Paraguay, and the Oriental Republic of Uruguay, all of them states-parties of MERCOSUR; and the

government of the Republic of Peru.

- ▶ Economic Complementation Agreement 50 between the Republic of Cuba and the Republic of Peru.
- ▶ Free Trade Agreement between the Government of the Republic of Peru and the Government of the Republic of Chile, amending and substituting ACE 38, its annexes, appendixes, protocols, and other instruments entered into thereunder.
- ▶ Trade Integration Agreement between the Republic of Peru and the United Mexican States.
- ▶ Peru-United States Trade Promotion Agreement.
- ▶ Free Trade Agreement between Canada and the Republic of Peru.
- ▶ Free Trade Agreement between the Government of the Republic of Peru and the Government of the Republic of Singapore.
- ▶ Free Trade Agreement between the Government of the Republic of Peru and the Government of People's Republic of China
- ▶ Free Trade Agreement between the Republic of Peru and the EFTA States (Switzerland, Liechtenstein, Norway, and Iceland).
- ▶ Free Trade Agreement between the Republic of Peru and the Republic of Korea.
- ▶ Framework Agreement on Closer Economic Partnership between the Government of the Republic of Peru and the Government of the Kingdom of Thailand and its additional protocols.

- ▶ Economic Partnership Agreement between the Republic of Peru and Japan.
- ▶ Free Trade Agreement between the Republic of Peru and the Republic of Panama.
- ▶ Trade Agreement between Peru, Colombia and Ecuador, of the one part, and the European Union and its member states, of the other part.
- ▶ Free Trade Agreement between the Government of the Republic of Costa Rica and the Government of the Republic of Peru.
- ▶ Partial Scope Trade Agreement between the Republic of Peru and the Bolivarian Republic of Venezuela.
- ▶ Framework Agreement of the Pacific Alliance and its additional protocol (Colombia, Chile, Mexico, and Peru).
- ▶ Free Trade Agreement between the Republic of Peru and the Republic of Honduras.
- ▶ Free Trade Agreement between the Republic of Peru and Australia.
- ▶ Trade Agreement between the United Kingdom of Great Britain and Northern Ireland, of the one part, and the Republic of Colombia, the Republic of Ecuador, and the Republic of Peru, of the other part.
- ▶ Comprehensive and Progressive Agreement for Trans-Pacific Partnership (CPTPP),

signed by and between Australia, Brunei Darussalam, Canada, Chile, Japan, Malaysia, Mexico, New Zealand, Peru, Singapore and Vietnam.

7. Free Trade Zones

Tacna Free Trade Zone

The Tacna Free Trade Zone was created in 2002 in order to promote investment in the south of the country through the incorporation of companies engaged in a series of industrial activities, agribusiness, in-bond processing and assembly, and storage, distribution, unpacking, and packaging services, etc. A tax exemption system was granted, which includes Income Tax, Value Added Tax (VAT), Selective Consumption or Luxury Tax (ISC) Municipal Promotion Tax, as well as any other tax, whether existing or to be created, provided the activities are developed within that Zone.

Products shipped from abroad that enter the Zone are not subject to import duties, since the Tacna Free Trade Zone has been granted the status of a special customs treatment area. In the case of goods transferred to the Tacna Commercial Area, only a special tariff is paid. However, if those goods are destined for the rest of the country, then they are subject to payment of the duties charged on imported goods.

The benefits system of tax exemptions is in effect until 2032.

It should be noted that persons from the rest of the national territory may acquire in the commercial zone, through electronic

commerce, certain goods, in amounts, quantities or volumes determined by special regulations. These commercial operations are not taxed with the VAT until December 31, 2027.

Puno Special Economic Zone

Like the Tacna Free Trade Zone, the Puno Special Economic Zone is an area which enjoys the status of falling outside customs territory, where a special tax system is applied that not only exempts goods entering the area from import duties, but also provides an exemption to Income Tax, the Value Added Tax (VAT), Selective Consumption or Luxury Tax (ISC), Municipal Promotion Tax, as well as any other federal, regional or municipal tax currently in force or to be created, including those that require express exemption, provided that users carry out authorized activities such as industry, agribusiness, in-bond processing and assembly, and storage, distribution, unpacking, packaging services, etc., within the Zone.

The exemptions are valid through 2027, with the exception of the Income Tax, which concludes on December 31, 2028.

This zone is not yet operative.

Cajamarca Free Trade Zone

The Cajamarca Free Trade Zone was created in 2021 to foster the sustainable socioeconomic development of Peru's northeastern region by attracting companies engaged in production, commercialization, industrial, agribusiness, maquila, and service activities. For such purpose, they will be granted access to a tax exemption regime including income tax, value added tax, excise tax, municipal promotion tax, customs fees and duties, and all other taxes, whether central, regional, or municipal, currently existing or to be created in the future, including those requiring express exemption.

This zone is not yet operative.

Chimbote Free Trade Zone

The government declared its interest in creating the Chimbote Free Trade Zone in 2022 to contribute the sustainable socioeconomic development of Ancash by attracting companies engaged in industrial,

agribusiness, assembly, maquila, and service activities.

This zone is not yet operative.

8. Other Special Treatment Zones

Special Development Zones (ZED) (previously known as CETICOS)

In addition to the special customs areas mentioned above, there are also Special Development Zones (ZED) in Ilo, Matarani, Paita, Tumbes, and Loreto.

ZEDs are limited geographical areas that are considered primary customs zones subject to special treatment, where industrial, maquila, logistics (merchandise storage, transportation, distribution, and sale, etc.), repair or refurbishment, telecommunications, information technology, and scientific and technological research and development activities may be performed.

Therefore, the entry of goods to these zones is except from import taxes; however, the entry of goods from ZEDs to the rest of the national territory is subject to the payment of customs duties and other import taxes.

With regard to all other duties and taxes, the development of activities in the country's ZEDs is exempt until December 31, 2042 from Income Tax, Value Added Tax, Selective Consumption or Luxury Tax (ISC), Municipal

Promotion Tax, as well as all taxes in force or created in the future—including those that require express exemption by law—with the exception of contributions to ESSALUD and rates.

Likewise, transfers of goods and provisions of services between users established in ZEDs are exempt from the Income Tax, Value Added Tax (VAT), Selective Consumption or Luxury Tax (ISC) and any other tax in force or to be created, including those that require express exemption.

Finally, in the case of the Loreto ZED, it is important to note that the term for incorporating companies in that Zone, as well as their exemptions, is fifty (50) years, as from May 22, 1998.

At present, the Loreto and Tumbes ZEDs are not yet operative.

Amending Protocol to the Peruvian - Colombian Customs Cooperation Agreement of 1938

This Protocol grants preferential duties for the import of certain goods detailed in the Common External Duty Schedule that forms

part of the Protocol.

This preferential treatment applies solely to those goods imported to Loreto, San Martín, and Ucayali.

Act for the Promotion of Investment in the Peruvian Amazon - Law 27037

This Act enables importers to bring certain goods into Peru for consumption in the Amazon region, corresponding to Chapters 84, 85, and 87 of the Customs Tariff Schedule, exempt from value added tax payment, through December 31, 2029 (with the exception of the department of Loreto, which will enjoy this benefit until December 31, 2028).

For purposes of this benefit, among other aspects, the Amazon region is considered to consist of the departments of Amazonas, Loreto, Madre de Dios and Ucayali, as well as certain provinces of the Departments of Ayacucho, Cajamarca, Cuzco, Huanuco, Junin, Pasco, Puno, Huancavelica, La Libertad, and Piura.

5

Legal Stability Agreements

The Agency for the Promotion of Private Investment (ProInversión), as representative of the Peruvian Government, can enter into legal stability agreements guaranteeing the investors and companies receiving these investments, as applicable. For such purpose, it is necessary to make capital contributions to a company currently established or to be incorporated in Peru for an amount of no less than USD10 million in the mining and hydrocarbons sector, and USD5 million in any other economic sector. This investment may be made within a period of no more than two years. The term of the agreement is ten years, except for those investors who have entered into a concession agreement as established in Executive Order (Decreto Supremo) 059-96-PCM. In this case, stability governs for the term of the concession.

Starting on December 31, 2021, all Legal Stability Agreements entered into will stabilize the income tax rate in force at the time of signing plus two percentage points.

6

Mining Law

Law 29789 - Special Mining Tax (IEM) / Executive Order (Decreto Supremo) 181-2011-EF- IEM Regulations on the IEM

The Special Mining Tax (IEM) in force since October 1, 2011, is levied on the operating profits of holders of mining concessions and assigns that undertake the exploitation of mineral resources, applicable to the sale of metallic mineral resources as well as resources for personal use or unjustified withdrawals of such assets.

The IEM is determined and paid quarterly based on a progressive cumulative scale of operating margins, with marginal rates ranging from 2% to 8.4%. Technically the IEM is based on the sum of each increase in the operating margin, multiplied by the rate of the progressive tax as per the following table and definitions:

• Sales Revenue

Income generated by sales of metallic mineral resources, with certain adjustments such as adjustments due to final determination of amounts due, discounts, return of goods, and other concepts of a similar nature that are common practice.

Scale N°	Special Mining Tax (IEM)			
	Scale of Operating Margin	Lower limit	Upper limit	Marginal Rate
1	0%	10%		2.0%
2	10%	15%		2.4%
3	15%	20%		2.8%
4	20%	25%		3.2%
5	25%	30%		3.6%
6	30%	35%		4.0%
7	35%	40%		4.4%
8	40%	45%		4.8%
9	45%	50%		5.2%
10	50%	55%		5.6%
11	55%	60%		6.0%
12	60%	65%		6.4%
13	65%	70%		6.8%
14	70%	75%		7.2%
15	75%	80%		7.6%
16	80%	85%		8.0%
17	Over 85%			8.4%

Operating Margin = $\frac{\text{Operating Profit}}{\text{Sales Revenue}} \times 100$

• Operating Profit

Income generated through the sale of mineral resources for each quarter, less: (i) the cost of goods sold; and (ii) operating expenses, including cost of sales and administrative expenses.

Exploration expenses shall be distributed proportionally over the useful life of the mine. Costs and expenses incurred in on-site consumption or unjustified withdrawals of mineral resources are not deductible, nor are interest charges, regardless of whether they have been capitalized as part of the cost of sales or treated as operating expenses.

The amount effectively paid for IEM is considered a deductible expense for effects of determining income tax for the fiscal year in which it was paid.

Furthermore, those in the mining industry must file a statement and pay the IEM every quarter, within 12 business days of the second month after it was generated, under the terms and conditions established by the National Superintendency of Customs and Tax Administration (SUNAT).

Law 29790 - Special Mining Encumbrance (GEM) / Executive Order (Decreto Supremo) 173-2011-EF - Regulations on the GEM

The Special Mining Encumbrance (GEM), in force as of October 1, 2011, is a voluntary payment, applicable to holders of mining concessions and concessionaires engaged in the exploitation of metallic mineral resources with investment projects subject to Contracts for Guarantees and Promotional Measures for Investment established in the General Mining Act, which cannot be affected by changes in the legislation regarding the IEM and mining royalties. For such purpose, an agreement is entered into for the payment of the GEM.

Like the IEM and the Mining Royalties, the GEM is quarterly, and is established by applying a cumulative progressive rate of 4% to 13.12%, depending on the operating margin, to the quarterly operating profit.

The GEM is a deductible expense for the purposes of income tax, and is determined by deducting the amounts paid for Mining Royalties as tax credits.

Law 29788 - Mining Royalties Act / Executive Order (Decreto Supremo) 180-2022-EF

The mining royalty is applicable to holders of mining concessions and concessionaires that undertake the exploitation of metallic and non-metallic mineral resources.

Starting on October 1, 2011, Mining Royalties shall be paid quarterly, and are determined by applying a cumulative progressive rate of 1% to 12% to the operating profit, depending on the operating margin, provided the amount payable is not less than 1% of the income generated from the sales performed during the calendar quarter. If this latter condition is not met, the minimum amount payable for royalties shall be determined based on sales revenues.

Mining Royalties are deductible for the purpose of determining income tax.

Law 29741 - The Supplementary Mining, Metallurgy, and Steelworkers' Retirement Fund (FCJM) / Executive Order 006-2012-TR - FCJM Regulations

The Supplementary Mining, Metallurgy, and Steelworkers' Retirement Fund (FCJM), in force as from July 10, 2011, consists of (i) a contribution of 0.5% of the annual net revenues of mining, metallurgical, and steel companies, before taxes; and (ii) a contribution of 0.5% of the monthly gross salary of each mining, metallurgical, and steelworker.

The companies' contributions shall be paid to SUNAT within the first 12 business days of the month after the Annual Income Tax Return is filed. Withholdings of workers' contributions shall be paid to SUNAT by the deadlines established in the Tax Code for monthly obligations.

7

Agricultural Regime

On December 6, 2020, Law 31087 was published, repealing Law 27360—the Act for the Promotion of Investment in the Agricultural Sector. Subsequently, on December 31, 2020, Law 31110 was published, the Act on the Agricultural Labor Regime and Incentives for the Agriculture and Irrigation, Agro-export, and Agribusiness Sectors. The new regime has been in force since 2021. Scope of the new regime:

- ▶ Individuals or legal entities who farm crops and/or raise livestock.
- ▶ Individuals or legal entities engaged in agribusiness activities, provided they primarily use agricultural and livestock products, outside the province of Lima and the Constitutional Province of Callao. It does not include agribusiness activities related to wheat, tobacco, oil seeds, oils, and beer. The agribusiness activities included within the scope of this law has been determined by an executive order (*Decreto Supremo* No. 006-2023-MIDAGRI), approved by the favorable vote of the Cabinet of Ministers and countersigned by the Minister of Agricultural Development and Irrigation and the Minister of Economy and Finance (products prepared with meat, fruits and vegetables and related services).

- Agricultural producers, excluding those organized in producers' associations, provided each individual association does not exceed 5 hectares of production.

This regime applies provided the net income from other non-benefited activities do not exceed 20% of total annual net income.

Applicable Tax Benefits

A reduced income tax rate of 15% has been established from 2021 to 2030 for individuals and legal entities in the sector whose income does not exceed 1,700 UITs (PEN8,755,000 or USD2,303,947), with a gradual reduction in the special lower rate for those companies who exceed 1,700 UITs, as follows:

2021 -2022	15%
2023 -2024	20%
2025 -2027	25%
2028 on	General regime (29.5%)

For purposes of advance income tax payments, in the case of the "percentage system," the advance payment percentage shall be 0.8% of monthly net income when the corporate income tax rate of 15% applies; 1% for a 20% tax rate; 1.3% for a 25% tax rate; and 1.5% for the general regime rate.

Additionally, there is an accelerated depreciation benefit of 20% annually for investments in water and irrigation infrastructure, as well as a deduction of expenses for which receipts have been issued by taxpayers subject to the New Simplified Consolidated Regime, for up to 10% of the amounts proven with receipts granting the right to deduct costs or expenses (with a maximum limit of 200 UITs per fiscal year).

Finally, individuals or legal entities whose net income does not exceed 1,700 UITs in the fiscal year are entitled to a tax credit of 10% of reinvestment up to 70% of annual profits, after income tax, during the 2021-2030 period. Reinvestment must prioritize the enhancement of agriculture, to the extent possible, through the implementation of a technology-based irrigation system.

6

Labor and employment law

1

Hiring System

1. Peruvian Workers

Indefinite-term contracts are the general rule for hiring in Peru, although fixed-term and part-time contracts may also be signed as an exception. The principal features of each one of these contracts is detailed below:

- ▶ **Indefinite-term contracts:** Have no expressly defined duration. This form of employment contract grants workers all labor rights and benefits in force under Peruvian law.
- ▶ **Fixed-term contracts:** For this form of contract, the legislation requires proof of an objective cause or ground that guarantees temporary hiring (for example, the start-up of a new business, specific projects or services, substitution, etc.) and the term thereof is subject to compliance with the requirements provided by law. Likewise, they provide all the rights and benefits granted to workers hired for an indefinite term.

▶ **Part-time contracts:** These contracts govern labor relations that cover work schedules with a weekly average of less than four hours per day. Part-time workers are eligible for all benefits under the law, except for i) indemnity for wrongful dismissal; ii) severance pay (CTS); and iii) vacation time of 30 days (they only have the right to six business days' vacation per year).

All of these contracts allow for a trial period, during which the workers have no right to indemnity in the event of wrongful dismissal. The trial period is counted from the start of the labor relationship and may have a maximum term of i) 3 months for all workers in general; ii) 6 months for qualified workers or those in positions of trust; and iii) 12 months for management staff. For its effectiveness, the extension of the trial period must be recorded in writing.

2. Expatriates

The labor relations governing foreign citizens entering Peru to render services for a domiciled company are governed by the Foreign Worker Hiring Act. These workers have the right to the same benefits provided to all workers in the private business workforce and are subject to the same taxes and contributions. The difference is that the approval of the employment contract by the Ministry of Labor and Employment Promotion (MTPE) is required to begin providing the services, as well as obtaining the pertinent migratory status. In the case of the income tax, the withholding rate shall depend on whether they are domiciled or non-domiciled.

As a general rule, expatriates must not exceed 20% of all personnel. Additionally, the total remuneration received by foreign workers must not exceed 30% of the total payroll. Exceptions to these limits may be made in the case of professionals and specialized technical staff, or for management staff for a new business activity or corporate restructuring or reorganization, etc.

None of the limits on number of personnel and salary amounts are applicable to foreign workers who render services in Peru on an immigrant visa, who are married to Peruvian citizens, or who have children of Peruvian nationality, parents or siblings, and foreign investors with a permanent investment in Peru of at least five Tax Units, or foreign workers who render services in the country by virtue of bilateral or multilateral conventions entered into by Peruvian Government.

Companies must follow the procedure to obtain the approval of the MTPE, filing the employment contract in a virtual system.

It is important to note that citizens of the Andean Community of Nations, Spanish citizens, and citizens of the Mercosur nations are subject to a special contracting procedure.

The migration procedure is detailed in Point 5.

2

Current Fringe Benefits

Workers have the right to the following fringe benefits, the cost of which is borne by the employer:

• Vacation Leave

The right to 30 calendar days of paid vacation per complete year of service, provided workers meet the vacation record, which is a minimum of days effectively worked as required by law. The vacation period must be taken within the calendar year following the year of services rendered and the related record. However, advances may be granted provided there is an agreement with the employer. If the worker does not take vacation time when due, the employer shall pay one additional month of remuneration as vacation indemnity.

• Legal Bonuses

Two bonuses per year, the first in July (Independence Day holidays) and the second in December (Christmas). Workers who leave their job before the months of July or December are entitled to receive the proportional payment of this benefit for the full months completed on the job, provided they have worked at least one full month.

Benefit	Amount / Applicable Rate
Vacation Leave	Equivalent to 30 calendar days of rest, with one month of paid remuneration
Legal Bonuses	Two months' remuneration per year
Mandatory Extraordinary Bonus	Two bonuses equivalent to 9% or 6.75% of the legal bonuses
Severance Pay (CTS)	9.72% monthly remunerations per year
Profit Sharing	Between 5% and 10% of income before taxes
Family Allowance	10% of the Minimum Wage

• Mandatory Extraordinary Bonus:

This is an additional benefit whereby the worker receives two bonuses equivalent to 9% of the legal bonuses, or 6.75% if the worker is a member of a Healthcare Service Provider Company (EPS).

• **Severance Pay (CTS)**

This is a fringe benefit to cover contingencies arising from termination of employment and promotion of the workers and their families. The payment is deposited in the workers' bank account in the months of May and November, depositing said amount in the bank account chosen by the worker.

• **Profit Sharing**

Companies with more than 20 workers that engage in activities that generate business income are required to distribute a percentage of their annual income before taxes among their workers. The percentage of the share is fixed by law, and depends on the company's principal activity, as follows:

Type of Company	Percentage
Fisheries, telecommunications, and industrial companies	10%
Mining companies, wholesale and retail businesses, and restaurants	8%
Companies in the agricultural sector (As from 2024 to 2026 it will increase to 7.5%).	5%
Companies engaged in other activities	5%

• **Family Allowance**

Workers who have one or more dependent children under the age of 18, or children over 18 enrolled in vocational or university education, or that provide evidence that they have a severe disability, are entitled to this benefit. The amount is equivalent to 10% of the Minimum Wage.

• **Comprehensive Annual Remuneration**

With workers who receive a monthly salary of at least two Tax Units, the employer can negotiate a comprehensive annual remuneration (RIA) to which all the benefits detailed above are added, with the exception of profit sharing, to be paid as provided by law, and which may be paid directly to the worker in 12 monthly installments.

3

Taxes and Contributions Levied on Remunerations

The employer shall assume the payment of the following taxes and contributions:

Taxes / Contributions	Applicable rate
Public Health Insurance (EsSalud)	9%
Mandatory Life Insurance	Depends on the type of policy
Occupational Life and Disability Insurance	Depends on the type of policy
Pension System	13% for the Public System or 12.84% for the Private System (approximately)

- **Income Tax:** The employer is responsible for withholding and paying income tax on earnings. A projection of the worker's annual earnings is made, to which the rates established as follows are applied. The approximate monthly deduction shall be one-twelfth (1/12th) of the determined annual tax amount, which may be established by following the procedures provided by law, in order to establish the exact amount to be withheld. For domiciled workers, an initial deduction of seven Tax

Units (UITs) is applied and further to this, the following rates are applied:

Sum of the Net Work Income and of the Foreign Source Income	Rate
Up to 5 Tax Units (UITs)	8%
More than 5 up to 20 Tax Units (UITs)	14%
More than 20 up to 35 Tax Units (UITs)	17%
More than 35 up to 45 Tax Units (UITs)	20%
More than 45 Tax Units (UITs)	30%

For non-domiciled workers the rate is 30% without deductions.

Likewise, it is possible—in addition to the deduction of seven Tax Units applicable to tax revenues, to deduct tax units from the respective tax basis, by virtue of expenses incurred in the leasing of real properties, professional fees paid to independent contractors (such as doctors, dentists, attorneys, veterinarians, among others, provided they issue receipts for professional fees), social health insurance contributions (EsSalud) for household workers and amounts paid for consumption in restaurants, bars, and hotels, and amounts paid for tourism-related services.

- **Public Health Insurance (EsSalud):** This contribution is paid by the employer and is designed to finance the public health system (EsSalud) so that the system may provide healthcare services to workers and financial assistance in case of disability, through the payment of subsidies. The collection of this amount is undertaken by the National Superintendence of Customs and Tax Administration (SUNAT) to which employers make this payment. The amount contributed is equivalent to 9% of the worker's monthly remuneration. If the company provides health coverage to its workers using its own resources or through a Healthcare Service Provider Company (EPS) it may request a credit of up to 25% of the EsSalud contribution, provided it complies with the limits established by law.
- **Statutory Employer-Provided Life and Disability Insurance:** This is a collective insurance provided to workers from the first day of work. The premium depends on the number of insured workers, the work they carry out and, in general, the terms agreed to with the insurance company.
- **Pension System:** The workers may join the National Pension System (SNP) or the Private Pension System (SPP) which are mutually exclusive. This contribution is to be assumed fully by the worker, with the employer being responsible solely for its collection.
- **In the case of the SPP,** the contribution consists of the amount paid to the individual capitalization account (10%), plus a premium for disability, survival, and burial insurance, plus the commission paid to the AFP. This commission is calculated based on the salary received and the balance of the pension fund. The commission and premium amounts are determined by each AFP. New affiliates to the SPP system are required to register with the AFP that won the most recent tender process (AFP Prima) through May 31, 2021.
- **Other Contributions:** Other contributions depend on the activity performed by the companies, for example:
 - a) **Occupational Life and Disability Insurance:** A mandatory insurance to be paid by companies whose activities involve a high level of risk, and which grants additional coverage for health and pensions. The contract for health services may be entered into with EsSalud or with a Healthcare Service Provider Company (EPS); while pension-related services may be contracted with the Government Agency for Pension Fund Management (ONP) or with a private insurance company. The rates depend on the type of activity and/or the terms agreed on with the insurance company.
 - b) **Supplementary Retirement Fund for Miners:** Mining, metallurgical, and iron and steel companies must contribute 0.5% of their annual net earnings before taxes to this fund, as well as withholding 0.5% of the gross monthly remuneration of each mining, metallurgical, and iron and steel worker.

c) Contribution to the National Industrial Vocational Training Service (SENATI): Training Service (SENATI): Companies engaged in industrial activities included in Category D of the Uniform International Industrial Classification (UIIC) are under the obligation to make a contribution to the National Service for Training in Industrial Work (SENATI). The contribution amounts to 0.75% of the worker's remuneration, according to the conditions provided by law.

d) Contribution to the Administrative Committee of the Fund for the Construction of Housing and Recreational Centers (CONAFOVICER): This is a contribution to be assumed in full by those workers who perform civil construction activities for a company engaged in construction. The amount of the contribution is equivalent to 2% of the worker's basic daily remuneration.

e) Contribution to the National Training Service for the Construction Industry (SENCICO): This is a contribution to be paid by companies engaged in construction activities. The contribution amounts to 0.2% of the total company income for labor, general expenses, technical direction, profits, and any other concept billed to the client, regardless of the construction contract executed.

4

Termination of the Employment Contract

The employment contract is terminated under the following circumstances:

- ▶ Compliance with the condition subsequent or the termination of the period of fixed term contracts.
- ▶ By agreement between the worker and the employer, which should be put into writing.
- ▶ Resignation of the workers, who must provide 30 days' prior notice.
- ▶ Due to permanent absolute disability or death of the worker.
- ▶ Retirement of the worker.
- ▶ Justified dismissal, in which the cause must be related to the skill or conduct of the worker, according to conditions established under national legislation.
- ▶ In cases established for collective dismissal, pursuant to Peruvian law.

The dismissal shall be subject to the verification of an objective cause that justifies the action, pursuant to law. If the cause is found not to exist, the employer shall be penalized via the payment of an indemnity.

However, the Constitutional Court has established certain cases in which the workers may also request their reincorporation into their job position, as per the following chart:

• **Unfounded dismissal**

When the employer does not give a legal cause or ground

- ▶ Consequences: Reincorporation / indemnity at the discretion of the worker

• **Fraudulent dismissal**

When the employer falsely charges the worker of committing gross negligence.

- ▶ Consequences: Reincorporation / indemnity at the discretion of the worker.

• **Void dismissal**

When the measure violates the fundamental rights of the worker.

- ▶ Consequences: Reincorporation

• **Dismissal with reasonable charge of gross negligence**

When the gross negligence is not proven during the process, although due process was followed as required by law.

- ▶ Consequences: Indemnity

• **Indirect dismissal**

When the worker is subject to acts of hostility comparable to dismissal.

- ▶ Consequences: Indemnity

Indemnity shall only be granted once the trial period has been completed (first 3 months of a contract) and is limited to 12 monthly remunerations.

In the case of workers who are hired for an indefinite term, the amount to be paid is one and a half months' remuneration for each year of completed service. On the other hand, in the case of workers hired on a fixed-term contract, indemnity is one and a half months' remuneration for each month not worked up until the termination of the contract.

In both cases, indemnity is paid in fractions of 12ths and 30ths per year and is limited to 12 monthly remunerations.

Management staff or workers in positions of trust who are hired as such may not request reincorporation and are only entitled to receive an indemnity for dismissal, unless they have previously held an ordinary position, in which case they may also be entitled to reincorporation into such ordinary position.

5

Immigration

Foreigners may apply for one of the visas listed below, depending on the activity they wish to undertake in Peru:

• Tourist Visa

- ▶ **Type:** Temporary
- ▶ **Activities Permitted:** Limited to tourist visits, recreation, or similar activities. Paid or lucrative activities are not permitted.

• Business Visa

- ▶ **Type:** Temporary
- ▶ **Activities Permitted:** Allows those foreigners who do not intend to establish residence in Peru to perform business, legal, contractual specialized technical assistance, or similar activities. Granted by the Ministry of Foreign Affairs (MRE). In the case of countries with which Peru has an agreement, this visa may be granted by the customs officer at the airport. Permits multiple entries, with a cumulative stay time of up to 183 days within a 365-day period.

• Work Visa

- ▶ **Type:** Temporary / Resident
- ▶ **Activities Permitted:** This visa allows them to work in Peru on a contract previously approved by the Ministry of Labor.

• Investor Visa

- ▶ **Type:** Temporary / Resident
- ▶ **Activities Permitted:** They must provide proof of an investment equivalent to PEN500,000. Foreigner individuals may only hold the position of director or manager of their company, for which purpose they shall comply with the applicable labor and tax laws. Proof of this investment cannot consist of the transfer of shares.

• Designated Work Visa

- ▶ **Type:** Temporary
- ▶ **Activities Permitted:** Foreigners may perform labor activities when they are sent by their foreign employer for a limited and definite term to engage in a specific task or duty or a work that requires professional, commercial, technical, or highly-skilled knowledge of another kind. They may also execute contracts and perform transactions.

• Freelance Work Visa

- ▶ **Type:** Temporary / Resident
- ▶ **Activities Permitted:** They may exercise their profession independently. It requires the execution of a service agreement and the obtainment of a tax ID number (RUC).

• Permanent Resident Visa

- ▶ **Type:** Resident
- ▶ **Activities Permitted:** Provided they enter the country to take up residence, they can develop their activities on a permanent basis.

• Student Visa

- ▶ **Type:** Temporary / Resident
- ▶ **Activities Permitted:** Those entering the country for the purpose of studying at educational centers accredited by the State cannot receive Peruvian-source income, with the exception of that received for professional internships or work during vacations, prior authorization from the competent authority.

It should be noted that there are visas that are issued at the Peruvian consulates of the country of residence and others in Peru, granted by the National Superintendency of Immigration.

Foreigners coming from Mercosur countries (Brazil, Argentina, Chile, Uruguay, Colombia, Bolivia, Paraguay, and Ecuador); or from countries with specific migration agreements may be subject to other immigration provisions and/or facilities.

Supervisory Body

The National Superintendency for Labor Audits (SUNAFIL) is a specialized technical entity attached to the Ministry of Labor and Employment Promotion (MTPE). The SUNAFIL is responsible for promoting, supervising, and auditing the compliance with labor laws and laws on occupational health and safety. It designs and conducts nationwide all duties and competencies established in Law 28806—the General Labor Inspection Act and acts as the central authority and guiding entity of the Labor Inspection System, in accordance with national and sector policies and plans, as well as the institutional policies and technical guidelines of the Ministry of Labor and Employment Promotion (MTPE).

The Labor Inspection Court is a decision-making resolatory body that forms part of the National Superintendency for Labor Audits (SUNAFIL). The Court has the technical independence to decide, as final administrative instance, all cases submitted through an appeal for review when labor law provisions have not been applied or have been incorrectly applied and interpreted.

In addition to the Labor Inspection Court, there is a Labor Inspection System tasked with ensuring legal certainty and guaranteeing that rulings on similar situations are consistent with one another.

7

New rules and preventions about COVID-19 at work

On January 15, 2024, Administrative Directive 349-MINSA/DGIESP-2024 was approved, which establishes guidelines for the Prevention, Monitoring and Control of the health of workers at risk of exposure to SARS-CoV-2. Below we detail the key aspects of this regulation:

- ▶ Companies have the obligation to prepare the Covid-19 Prevention, Monitoring and Control Plan, which must be approved by the Occupational Health and Safety Committee or the supervisor, as appropriate.
- ▶ The use of a mask is not mandatory, except for health personnel and workers who present flu symptoms. Likewise, the use of a mask is suggested for workers with risk factors.
- ▶ Medical rest days for suspected, probable or confirmed cases of Covid-19 will be determined by the treating doctor.
- ▶ The obligation to provide trainings on Covid-19 and have a health professional is maintained depending on the number of workers.
- ▶ It is important to promote vaccination, have hand washing points and alcohol for disinfection and maintain ventilated environments.

8

Prohibition of outsourcing of activities that are related to the employer's "core business"

Executive Order (*Decreto Supremo*) 001-2022-TR, published on February 23, 2022, amended the regulations on the labor outsourcing law for personnel continuously assigned to the main company (company hiring the service).

The main change involves the restricted use of outsourcing for specialized activities or works where personnel are continuously assigned to the main companies' work or operating centers.

Activities forming part of the core business—understood as those forming part of the company's corporate purpose—cannot be outsourced.

The performance of labor inspections to ensure compliance with this amendment has currently been suspended due to lawsuits and administrative complaints, which have yet to exhaust all available legal channels.

7

Accounting standards

Photograph by Renzo Tasso / © PROMPERÚ

1

Accounting Standards

The Peruvian Business Corporations Act (LGS) establishes that the financial statements of companies incorporated in Peru must follow the general accounting principles accepted in Peru and other applicable legal provisions.

The Peruvian Accounting Standards Board (CNC) has established that the general accounting principles are basically the standards issued by the International Financial Reporting Standards Board (IFRSB) including the International Financial Reporting Standards (IFRS), the IFRS Interpretation Committee (IFRIC), and the Standing Interpretations Committee (SIC), and the specific provisions approved for particular businesses (banks, insurance companies, etc.). Likewise, on a supplementary basis, the U.S. Generally Accepted Accounting Principles (GAAPs) are applied.

The Peruvian Accounting Standards Board (CNC) is responsible for issuing the General Chart of Accounts for companies and methodologies that apply to both private business and government entities.

The CNC adheres to the standards approved by the International Financial Reporting Standards Board (IFRSB), which are explicitly approved by the CNC and published in "El Peruano" Official Gazette, indicating their date of approval, which may differ from the internationally approved date.

Companies that issue debt or shares in the capital market are subject to the regulations of the Peruvian Securities and Exchange Superintendency (SMV). Companies supervised by the SMV are obliged to issue their financial statements in accordance with IFRS, as issued in accordance with the International Financial Reporting Standards Board.

According to the most recent regulations in force, companies that obtained an income in excess of 2,300 UITs (PEN11,845,000) are required to submit financial statements in accordance with the IFRS. Small and medium-sized enterprises that obtained an income higher than 150 UITs (PEN772,500) and lower than 2,300 UITs (PEN11,845,000) are required to issue their financial statements in accordance with the IFRS for SMEs. The IFRS for SMEs is a simplified set of rules designed specifically for small and medium-sized non-financial enterprises.

The annual financial information of companies supervised by the Peruvian Securities and Exchange Superintendency (SMV) must be audited and include the previous year for comparative purposes. Quarterly information does not need to be audited. This audit must be performed in accordance with the International Standards on Auditing issued by the International Federation of Accountants (IFAC).

Since 2016, companies not listed in the Public Stock Exchange Registry are not required to submit audited financial statements.

In June 2023, the International Sustainability Standards Board (ISSB) presented its first IFRS (ESG) standards, IFRS S1 and IFRS S2, marking a major milestone for the Peruvian capital market and opening doors to a new era of sustainability disclosure. These standards will help boost trust in companies when disclosing sustainability information, providing a solid foundation on which to base investment decisions.

Both IFRS S1 and IFRS S2 entered into force for annual periods starting on January 1, 2024. The compulsory application of the IFRS sustainability disclosure standards will depend on the regulatory or approval processes of each local jurisdiction. The application of the IFRS sustainability disclosure standards is not tied to the application of IFRS accounting standards. Thus, an entity that applies the IFRS accounting standards for financial reporting purposes is not currently also required to apply the IFRS sustainability disclosure standards, and vice versa.

8

Intellectual property regulations

1

Supervisory Body

According to the World Intellectual Property Organization (WIPO) intellectual property is divided into two major categories: copyright and industrial property.

Copyright protects works of human ingenuity, such as literary, audiovisual, and artistic works, software, artistic interpretations, etc. Industrial property, on the other hand, grants exclusive rights over an invention, a new technology, or distinctive trademarks, such as brands, invention patents, or industrial designs.

Regulations on industrial property are contained in different local and international bodies of law, most notably:

- i. The Berne Convention for the Protection of Literary and Artistic Works, to which Peru has been a signatory since 1988.
- ii. The Paris Convention for the Protection of Industrial Property, to which Peru is a party since 1994.
- iii. Decision 486 of the Andean Community Commission, which establishes the Common Industrial Property System.

- iv. Legislative Decree (*Decreto Legislativo*) 1075, which approves supplementary provisions to Decision 486 of the Andean Community Commission, which establishes the Common Industrial Property System.
- v. Decision 351 of the Cartagena Agreement Commission, approving the Common Regime on Copyright and Related Rights; and
- vi. Legislative Decree 822—Copyright Act.

In Peru, the National Institute for the Defense of Free Competition and the Protection of Intellectual Property (Indecopi) is the public entity responsible for promoting and regulating the exercise of these rights.

Currently, these duties are performed by the intellectual property bodies (Office of Distinctive Signs, Office of Inventions and New Technologies, and Copyright Office), as well as the Intellectual Property Division of the Indecopi Court.

2

Copyright

For purposes of comparison, laws do not typically contain an exhaustive list of works protected by copyright. However, Peruvian law, consisting mainly of Decision 351 and Legislative Decree 822, refers to works typically protected by copyright, including the following:

- ▶ Literary works such as novels, poems, stage performances, reference works, journalistic articles
- ▶ Software and databases
- ▶ Movies, musical compositions, and choreographies
- ▶ Works of art such as paintings, drawings, photographs, and sculptures
- ▶ Architecture; and
- ▶ Advertisements, maps, and technical drawings.

Copyright protection is aimed at expressions of the human intellect, in any genre, form of expression, merit, or purpose they may have. Accordingly, copyright encompasses two types of rights:

- ▶ Economic rights, which permit the rightsholder to obtain financial compensation for the use of their works by third parties; and
- ▶ Moral rights, which protect the author's non-economic interests.

Copyrights do not include ideas, procedures, operating methods, or mathematical concepts *per se*. However, the way in which said concepts are expressed in reality may be subject to copyright.

In terms of economic rights, Peruvian law states that copyright holders have the power to authorize or prohibit certain uses of the work, or, in some cases, to receive compensation for the use thereof (e.g., through collective management). Thus, the holder of economic rights of a work may prohibit or authorize:

- ▶ The reproduction of their work in various forms, such as in print publications or sound recordings.

3

Industrial Property

- ▶ The public interpretation or performance, e.g., a dramatic or musical work
- ▶ The recording of the work, e.g., in the form of compact discs or DVD
- ▶ The broadcasting of the work over radio, cable, or satellite
- ▶ The translation of the work into other languages; and
- ▶ The adaptation of the work, as in the case of a novel adapted to a screenplay.

For example, prior authorization is required even to reproduce computer programs for personal purposes, except in the case of backup copies. Another typical case in which the author's authorization is required is in the reproduction, whether physically or digitally (in the form of an NFT, for example) of a work. If this provision is violated in any way, the aggrieved party may report the infringement of their rights as part of a sanctioning administrative proceeding.

The applicable national law is based primarily on Decision 486 and Legislative Decree 1075, which do not require the creators of distinctive signs or inventors to register them with the Indecopi.

Said registration is essential, however, in order to hold exclusive ownership of these rights. Such registration also grants the owners other important advantages:

- i. It provides publicity, which means that the right can be enforced against third persons.
- ii. It prevents others from taking advantage of the prestige or reputation of a creation through imitations or falsifications.
- iii. It makes it possible to bring civil and even criminal actions to protect the right against third persons.
- iv. It grants Indecopi the power to impose sanctions, final orders, and penalty payments against those who make inappropriate use of registered industrial property; and,
- v. It makes it possible to sell or assign the use of the right in exchange for a consideration.

Registrable Elements of Industrial Property

Under Peruvian law, distinctive marks, inventions, and new technologies are registrable.

Below is a list of the principal elements of industrial property.

► Distinctive marks

(i) Trademarks or service marks

A trademark is a graphic representation used to indicate that certain goods or services have been developed or provided by a given market agent. This sign allows consumers to distinguish between different competitors, since it represents a market agent, the quality of a good or service, and its market value.

It is fundamental to keep the registered mark in use, given that, after three years of inactivity, any interested persons may request the cancellation of the registration of said mark and proceed to register it themselves.

(ii) Commercial slogan

Refers to the word or phrase used together with a trademark. As such, in order to be registered, it is necessary to indicate the trademark with which the slogan will be associated. The slogan's validity will be conditional upon that of the distinctive mark. Similarly, the transfer of the slogan also involves the transfer of the trademark.

(iii) Trade name

This is the sign used to identify a company, economic activity, or establishment. Unlike the other classes of industrial property, the exclusive rights over a trade name are automatically acquired through its first use in commerce. As such, the registration of a trade name is merely declarative in nature. Nevertheless, it is an effective measure of proof with regard to its ownership.

► Effectiveness of registrations

Ten years, as from the date on which the registration is obtained. This term may be renewed for an identical period.

Priority Right

The territorial space in which the industrial property right may be exclusively exercised corresponds to the country in which it has been registered. In other words, market agents must register their right in each one of the countries in which they wish to make use thereof, given that their registration will only be valid in the country in which it was granted.

Notwithstanding the foregoing, under the provisions of the Paris Convention, market agents who have registered (a) an invention patent; (b) a utility model patent; (c) an industrial design; or (d) a trademark in any member country of said Convention may use the submission date of their application in any other country to which said international law applies.

The term for exercising the priority right in another country depends on the type of industrial property to be registered, and the statute begins to run on the submission date of the first application for registration.

(i) For invention patents and utility models: 12 months.

(ii) For industrial designs and trademarks: 6 months.

Consequently, those who intend to register their right in another country cannot be prevented from doing so based on a registration obtained during said period.

Non-Registrable Elements

It should be noted that, despite the importance of registering industrial property, not all human creations can be registered.

In Peru, know-how does not constitute a registrable element, for example. This term refers to the set of business knowledge, whether technical, administrative, or commercial that is acquired through experience and building of skills when carrying out a business activity or process.

As such, while the knowledge of "knowing how" to run a company may be considered of economic value to said company, such knowledge in and of itself is not eligible for registration.

This does not mean that such experience or a particular way of making a product or performing a given service is not eligible for protection. It simply means that our law has established a sphere other than that of intellectual property to protect such concepts, under the Act for the Elimination of Unfair Competition, approved by Legislative Decree 1044.

This law prohibits the dissemination or acquisition of information considered a trade secret, insofar as such conducts distort the market and constitute a clear disincentive to innovation. In order for information to be considered a business secret, it must have a market value and be confidential and private. Additionally, reasonable protective measures must have been implemented to keep it private.

It's worth stating that, to this date, there has not been a decision of the Indecopi Court which assess the nature of the intervention of Artificial Intelligence (AI) in the granting and/or recognition of copyright and other industrial property rights.

4

Member Countries of the Paris Convention

The Paris Convention, adopted in 1883, applies to industrial property in the broadest sense of the term, including patents, trademarks, industrial drawings and models, utility models, services marks, trade names, geographic indications, and the prevention of unfair competition. This international agreement was the first major step in helping creators to protect their intellectual works in other countries.

Currently, the Paris Convention has 178 contracting parties, including Peru.

To consult the list of the other member countries, please check here:
https://www.wipo.int/wipolex/en/treaties>ShowResults?start_year=ANY&end_year=ANY&search_what=C&code=ALL&treaty_id=2

The following figures are taken from the most recent Indecopi Report for 2022:

40,875

new trademark registrations were entered for goods and services, and 36,188 trademark registration certificates were issued.

Virtual platforms were supervised and monitored, carrying out 591 inspections in virtual stores and/or businesses. Also,

869 proceedings

related to the protection of trademark right were attended; and 327 interim measures were issued.

A comparative advantage of Peru's industrial property regime is the

"Search Your Trademark"

online tool, which makes it possible to perform free registration history searches.

9

Environmental and climate change regulations

Peru possesses a significant natural and cultural heritage that offers a range of development opportunities through the sustainable exploitation of natural resources, integrated environmental quality management, and the implementation of economic activities based on criteria of competitiveness and regional and worldwide visibility.

The Ministry of the Environment (MINAM) was created in 2008 as the entity in charge of leading and coordinating the National Environmental Policy (PNA) to ensure sustainable development, biodiversity conservation, and environmental protection for present and future generations. For this purpose, MINAM works in close collaboration with the different levels of government, civil society, the private sector and other relevant parties in environmental decision-making.

In Peru, the regulatory framework on the environment establishes limits on those elements that pose a certain degree of danger to humans and the environment. The purpose of this framework is to protect or remediate the environment; combat the effects of air, water, and soil pollution; ensure the rational use of resources; and urban, industrial, and technological growth in harmony with the environment.

1

General regulatory framework

1. General Environmental Act - Law 28611

The General Environmental Act, passed in 2005, organizes the regulatory legal framework for environmental management in Peru. It establishes the basic principles and regulations to guarantee the effective exercise of the right to a healthy, balanced environment that is adequate for the full development of life, as well as compliance with the duty to contribute to an effective environmental management and protect the environment, with a view to improving the public's quality of life and achieving the country's sustainable development.

Under this law, the National Environmental Management System (SNGA) has been put together, in accordance with Law 28245 and its regulations, approved by Executive Order 008-2005-PCM. The purpose of the SNGA is to guide, integrate, coordinate, supervise, evaluate, and guarantee the application of policies, plans, programs, and actions for environmental protection and contribute to the conservation and sustainable use of natural resources, on a decentralized, cross-cutting, and participatory basis. The SNGA consists of:

- The National Environmental Impact Assessment System (SEIA) - MINAM
- The National Environmental Evaluation and Supervision System (SINEFA) - Environmental Assessment and Supervisory Board (OEFA)
- The National Environmental Information System (SINIA) - MINAM
- The National Water Resource Management System (SNGRH) - ANA
- The National State-Protected Natural Areas System (SINANPE) - SERNANP
- The National Forest and Wildlife Management

2. National Environmental Policy through 2030

The National Environmental Policy (PNA) is a set of public guidelines, objectives, strategies, targets, programs, and instruments aimed at defining and guiding the environmental actions of national, regional, and local government entities, as well as those of the private sector and civil society.

The first PNA was approved by virtue of Executive Order 012-2009-MINAM. More than ten years later, Executive Order (Decreto Supremo) 023- 2021-MINAM approved the National Environmental Policy through 2030 as the basis for environmental conservation, seeking to guarantee the sustainable, responsible, rational, and ethical use of natural resources and the environment that supports them, in an effort to contribute to the public's comprehensive, social, economic, and cultural development.

The National Environmental Policy was drafted via a participatory, decentralized process with the involvement of different publics at the national, regional, and local levels, coming from the public and private sectors, academia, nongovernmental organizations, and representatives of indigenous peoples.

The National Environmental Policy through 2030 features the following structure:

- Legal grounds
- Diagnosis
- Desired future situation
- Possible solutions
- Objectives (9 in all)
- Indicators (23 in all)
- Guidelines and strategies (47 in all)
- Services (64 in all)
- Follow-up and evaluation

The objectives of the PNA include the need to reduce biodiversity loss and deforestation levels, reduce air, water, and soil pollution, and improve solid waste management. The goal is also to reduce vulnerability to climate change and greenhouse gas emissions, and to improve ecoefficiency in the production of public and private goods and services by 2030, achieving a circular economy that makes the most of resources. These efforts will be boosted by improved governance, research, and environmental education.

Primary expected results of the PNA through 2030:

In biodiversity and forests:

- Reduce the number of threatened species in Peru by 29%.
- Reduce the annual percent change of forest loss by 6%.

In environmental quality:

- Achieve a "Good" rating (according to the National Air Quality Index (INCA)) for the air quality in 50% of all prioritized zones (ZAPs).
- Achieve closure plans or remediation underway for 36% of all mining-related environmental liabilities.
- Situate 63% of solid waste in appropriate final disposal infrastructure.

In climate change:

- Reduce the country's losses due to the direct effect of climate change vulnerability by 20%.
- Comply with 100% of Nationally Determined Contributions (NDCs), which are aimed at meeting the emissions reduction target of 30% compared to the Business as Usual (BaU) scenario by 2030, plus an additional 10% conditional upon international cooperation.

In efficient and sustainable production:

- Obtain 64% of energy in the national electricity network from renewable sources.
- Increase ecoefficiency levels in 20% of all public entities.
- Help 200 Peruvian companies meet biologically and ecologically friendly business criteria.

In environmental institutional strength:

- Adequately handle 99% of environmental conflicts.
- Increase scientific output on environmental topics by 137%.

Companies and the Environment

According to the General Environmental Act, organizations are responsible for emissions, effluents, dumping, and any other negative impacts that may be caused to the environment, human health, and natural resources as a result of their activities. This responsibility includes environmental risks and damages caused by action or omission.

The owner of the operations must adopt prioritized measures to prevent environmental risks and damages at the potential source thereof, as well as all environmental conservation and protection measures applicable in each one of its operations.

Studies for prefeasibility, feasibility, and definitive investment projects under the responsibility of public or private entities whose implementation may have an impact on the environment shall include the necessary costs to preserve the environment at the location where the project will be performed, as well as any other locations that may be affected thereby.

The government requires the owners of operations to adopt environmental management systems that are suitable for the nature and size of their operations, in order to promote the continuous improvement of their environmental performance levels.

► Environmental Quality Standards (EQS):

These indicators measure the concentration of elements, substances, or other components in the air, water, or soil. Their purpose is to establish targets beyond which significant effects may be caused to the environment and human health.

► Maximum Permissible Limits (MPLs):

Established for sectors such as hydrocarbons, fishing, cement, metallurgy and mining, and vehicular transportation. MPLs measure the concentration or degree of elements, substances, or physical, chemical, and biological parameters that characterize an effluent or emission. If such parameters are exceeded, harm may be caused to human health and wellbeing or the environment. Compliance with MPLs is legally enforceable by the MINAM and the entities that form part of the National Environmental Management System. Criteria for the determination of supervision and sanctions shall be established by said ministry.

The MINAM recently approved the Environmental Quality Standards (EQS) and Maximum Permissible Limits (MPL) Plan for 2021-2023, by virtue of Executive Order (*Decreto Supremo*) 020- 2021-MINAM, which aims to plan and prioritize the preparation and approval of EQSs and MPLs as useful and necessary tools for environmental quality management.

3. Environmental Certification

All investment projects must draft an environmental certification instrument prior to their implementation, anticipating any significant negative environmental impacts that may be caused. This is equivalent to the project's roadmap, which contains the owner's requirements and obligations, as well as the activities to be carried out to remediate any negative impacts.

The SEIA Act (Law 27446, as amended) and its Regulations (Executive Order (*Decreto Supremo*) 019-2009- MINAM, as amended) establishes that all public- or private-law individuals or legal entities, whether Peruvian or foreign, who seek to carry out an investment project in Peru that may cause significant negative environmental impacts must obtain environmental certification from the corresponding authorities.

The performance of projects or service and trade activities may not be initiated, and no national, sectoral, regional, or local authority may approve, authorize, permit, grant, or enable them if they do not previously obtain environmental certification. The environmental certification expires if the holder fails to begin performing the investment project with a term of no more than five (5) years.

The National Environmental Certification Service for Sustainable Investments (SENACE) conducts the environmental certificate procedure for investment projects.

Project Categorization by Environmental Risk

► **Category I: Environmental Impact Statement** - Includes those projects

whose performance does not give rise to significant negative environmental impacts.

► **Category II: Semi-Detailed Environmental Impact Study** - Includes projects whose

performance may cause moderate environmental impacts that may be eliminated or minimized by adopting easily applicable measures. Projects classified in this category shall require a Semi-Detailed Environment Impact Study (EIA-sd).

► **Category III: Detailed Environmental Impact Study** - Includes those projects

whose characteristics, size, and/or location may cause quantitatively or qualitatively significant negative environmental impacts, requiring an in-depth analysis to review their impacts and propose the corresponding environmental management strategy. Projects in this category shall require a Detailed.

Act on the Promotion of Investments for Economic Growth and Sustainable Development

Passed in 2015, Law 30237 seeks to promote investments for economic growth and sustainable development by streamlining and integrating permits and procedures, as well as measures for the promotion of public, private, public-private, or mixed capital investment.

These measures include the optimization and strengthening of the SEIA through the centralization, free access, and shared use of the baseline and improvements to Comprehensive Environmental Certification as a permit integration instrument.

The law also establishes the adaptation of regulations and administrative procedures by the SERFOR, ANA, and DIGESA to ensure the law's correct implementation.

National Competitiveness and Productivity Policy

In 2019, within the framework of the National Competitiveness and Productivity Policy—which seeks to foster wellbeing for all Peruvians on the basis of sustainable economic growth with a territorial approach—the National Competitiveness and Productivity Plan and the National Infrastructure Plan for Competitiveness were approved.

These plans include measures to promote environmental sustainability in the operation of economic activities, such as strategies to finance the fight against climate change; comprehensive solid waste management; a circular economy and clean production agreements in the industrial, fisheries, and agriculture sectors; a renewable energy, electromobility, and clean fuel strategy; vehicle junking bonuses; sustainable infrastructure, and more.

These plans will help transition from economic growth to sustainable or green growth, with an emphasis on promoting projects that not only include improvements in their processes, but also contribute protecting the environment and combating climate change.

2

Regulatory Framework for Climate Change and Energy

1. Paris Agreement: Nationally Determined Contributions (NDC) Peru

Peru has been a party to the United Nations Framework Convention on Climate Change (UNFCCC) since 1993. As such, it shares the Convention's ultimate objective to "achieve the stabilization of greenhouse gas concentrations in the atmosphere at a level that would prevent dangerous interference with the climate system." Peru also ratified the Kyoto Protocol in 2002, and promptly submitted its overall mitigation offer via its intended nationally determined contributions (NDC) in September 2015 and took part in the efforts to achieve the Paris Agreement.

The Paris Agreement is a historic international agreement that was signed in December 2015 during the United Nations Framework Convention on Climate Change's (UNFCCC) 21st Conference of Parties (COP21) in Paris. Its central aim is to strengthen the global response to the threat of climate change, in an effort to ensure sustainable development and efforts to eradicate poverty, by keeping a global temperature rise this century well below 2 °C above preindustrial levels and pursuing efforts to limit the temperature increase even further to 1.5 °C. The Agreement also aims to increase countries'

capacities for adaptation and resilience and guarantee finance flows consistent with low greenhouse gas emissions and climate-resilient pathway.

In July 2016, Peru became the first country in Hispanic America to ratify the Paris Agreement. To date, 189 of 197 States-Parties that belong to the Convention have ratified the Agreement.

Peru had the chance to contribute to this multilateral agreement and global policy decision-making during the negotiation process, as a developing country and president of the COP20 held in Lima. It made three significant contributions to reaching the Paris Agreement:

I. During the COP20, it resolved the issue of differentiating between developed and developing countries through equity and the principle of shared but differentiated responsibilities and respective capabilities, in light of the Parties' different national circumstances (made explicit in Article 2 and throughout the Agreement).

II. It explicitly articulated the balance between adaptation, as consequences of climate change, and mitigation of GHGs, as causes of climate change.

III. The Lima – Paris Action Agenda, which allowed for the participation of key non-state stakeholders in 2015, such the private sector, civil society, academia, indigenous peoples, collectives, and the general public for rapport-building and dialogue. As a result, the different stakeholders assumed responsibility for solving the problem of climate change on the part of society as a whole, and not just governments.

Peru's Nationally Determined Contribution (NDC)

Nationally determined contributions (NDCs) are at the heart of the Paris Agreement and the achievement of its long-term goals. NDCs embody efforts by each country to reduce national anthropogenic emissions and adapt to the impacts of climate change.

According to Article 4 of the Paris Agreement, each Party must prepare, communicate, and maintain successive NDCs that it adopts, reflecting the greatest possible ambition and taking into account its domestic circumstances and capabilities.

By virtue of this agreement, the Peruvian government published the "2021-2030 Updated Report" on NDCs in 2020, committing to guaranteeing that its net greenhouse gas emissions do not exceed 208.8 MtCO₂eq by 2030 (unconditional target). Depending on the availability of international foreign financing and the existence of favorable conditions, the Peruvian government believes greenhouse gas emissions may reach a maximum level of 179.0 MtCO₂eq (conditional target).

Regarding climate change adaptation, the Peruvian government commits to contributing to the global adaptation target by reducing damages, possible alterations, and consequent actual and future losses due to the risks posed by climate change to populations and their livelihoods; basins, ecosystems, and territories; and the country's infrastructure, assets, and services. It also plans to make use of the opportunities offered by climate change for environmentally sustainable and responsible development.

In January 2022, the government announced the approval of Executive Order (Decreto Supremo) 003-2022-MINAM, declaring the climate emergency of national interest. The purpose of this order is to urgently take steps to implement climate action in accordance with the Nationally Determined Contribution for 2030.

According to this climate emergency declaration, the government's prioritized lines of action are as follows:

- 1. Climate governance:** It proposes the involvement of regional and local governments, as well as non-state actors, academia, professional guilds, women, indigenous and native peoples, the Afro-Peruvian community, other collectives and the private sector, with the strengthening of existing mechanisms for participation provided by the Ministry of the Environment (MINAM).
- 2. Education on climate change:** Promotion in the educational system at every stage, level, educational model, cycles and programs, of the development of competencies with emphasis on the environment, human rights and other cross-sectional perspectives.
- 3. Monitoring and follow-up:** It proposes to encourage investment and operation of hydrometeorological services, health monitoring systems, satellite monitoring mechanisms (SEFOR) for statistical compilation of data, as well as the implementation of Early Warning Systems.

4. Climate financing: The Ministry of Economy and Finance (MEF) promotes the incorporation of concerns over the expected impact of climate change into the processes of evaluation of investments in the financial system, assesses budgetary programs to strengthen the mechanisms that contribute to emission reductions and the inclusion of carbon pricing in the framework of economic policies.

5. Human Rights and Climate Justice: It seeks to mitigate the social impact of climate change on populations that are vulnerable as a consequence of the loss of ecosystems that are a source of subsistence and development. Likewise, to promote actions and accompany the Committees of Community Watch and Control of Forests and Wildlife in strategic locations with greater illegal activity.

This government action seeks to generate a change in energy production, in investments, in forestry conservation, as well as in transport, agriculture and health.

2. Framework Act on Climate Change

A turning point in climate change management in Peru came with the passage of the Framework Act on Climate Change 30754, on April 17, 2018, with the goal of establishing the principles, approaches, and general provisions for the comprehensive, participatory, transparent management of the climate change adaptation and mitigation measures, so as to reduce the country's vulnerability to climate change, take advantage of low-carbon growth opportunities, and comply with the international commitments assumed by the State with the UNFCCC. On December 31, 2019, the Regulations on the Framework Act on Climate Change were approved. The application of these regulations seeks to guarantee sustainable low-carbon growth and reduce economic losses through the adequate management of climate risks.

This law ensures that the country will be better prepared to tackle climate events and create the conditions for the growth of clean and sustainable industries. It is aligned with the country's commitment to the United Nations Sustainable Development Goals (SDGs) and the recommendations that must be addressed for the country's admission into the Organization for Economic Cooperation and Development (OECD).

The Framework Act on Climate Change allows the government to increase public spending efficiency, representing savings for the country and a key investment for avoiding costs and taking advantage of opportunities for all of the country's stakeholders: the public and private sectors, civil society organizations, academia, indigenous peoples, and others.

The principal components included in this Law are as follows:

- I. Articulation with the international context:** The purpose of this Law is to comply with the international commitments assumed by the Peruvian state with the UNFCCC, which will enable it to support worldwide efforts to prevent the global temperature from rising more than 1.5° C above preindustrial levels.
- II. Inclusion of climate change into national development planning:** All sector authorities, regional governments, and local governments must include climate risk and vulnerability, as well as the identification of mitigation and adaptation measures, when formulating and updating their development, budget, and spending planning policies, strategies, and instruments.
- III. Increase in institutional strength for addressing climate change:** With the goal of complying with the periodic updating of our NDCs, the Law mandates the establishment of a High-Level Climate Change Commission for the purpose of proposing the adaptation and mitigation measures that will form part of the NDCs. This multisectoral space, chaired by the Prime Minister, allows for ongoing articulation and coordination among state actors with the objective of defining and updating the NDCs to be submitted to the UNFCCC.

IV. Increase in the competitiveness of investment and the national public budget: The goal is to ensure the sustainability of government investment and budgeting. For such purpose, the MEF must incorporate climate risk and vulnerability analysis, as well as the identification of climate change mitigation and adaptation measures, when preparing and implementing public investment projects, as well as economic instruments that channel the public budget. This will help obtain positive returns by reducing costs for restoration, reconstruction, and repair.

V. Support for science and technology:

According to the Law, all public institutions with the mission of scientific research and technological development must prepare research and technology transfer studies, projects, and programs with the purpose of improving and increasing the adaptive capabilities of the population, ecosystems, infrastructure, and production systems; and contributing to the reduction of GHG emissions and the increase and conservation of carbon reserves.

3. National Climate Change Strategy (ENCC)

According to the ENCC, the main challenge associated with climate change in Peru is to reduce risks and foreseeable impacts, building capacities to address them based on an integrated management among the three levels of government to reduce vulnerabilities and take advantage of opportunities.

The First ENCC was approved by Executive Order 086-2003-PCM. It included 108 targets, of which only 12% were achieved in the first six years, with progress made on 49% of all targets, including initiatives, programs, and projects underway. This Plan was then updated by Executive Order 011-2015-MINAM, including the 2021 vision. This version, which is currently in force, identified two strategic objectives that clearly link climate change response actions to the national development process.

Currently, a new update process is currently underway to draft the National Climate Change Strategy through 2050 (ENCC 2050), which will be the primary instrument for the comprehensive management of climate change, guiding and facilitating the State's long-term actions on climate change at the national, regional, and local levels.

The ENCC will include a vision through 2050 to achieve carbon neutrality and ensure the resilience of our population, ecosystems, livelihoods, and production and infrastructure systems, complying with the commitments we have assumed under the United Nations Framework Convention on Climate Change and the Paris Agreement, specifically the establishment of a long-term strategy. The ENCC through 2050 will include a long-term vision.

4. National Climate Change Adaptation Plan

Peru's National Climate Change Adaptation Plan (NAP), approved on June 7, 2021 by Ministerial Resolution No. 096 -2021-MINAM, has the main purpose of guiding climate change adaptation planning at the national level, focusing on reducing exposure and vulnerability to climate change, as well as increasing the capacity to adapt to the associated risks. It also aims to take advantage of opportunities for improvement. This plan is aligned with Peru's regulatory framework and international commitments on climate change.

The NAP includes thirteen strategic actions for its implementation, such as the development of climate prediction capacities, the promotion of the sustainable use of forest resources with training for indigenous, Afro-Peruvian and other communities, the adoption of good agricultural practices, and the sustainable management of hydrobiological resources and forest ecosystems. Among other measures, the National Adaptation Plan strengthens coordination between institutions and will improve water supply by promoting sustainable agricultural and energy practices. In addition, it represents a guide for updating the National Climate Change Strategy (ENCC) in its adaptation component by providing guidelines for reducing exposure and vulnerability, as well as for taking advantage of opportunities for improvement in the face of climate change risks.

5. National Greenhouse Gas Inventory

National Greenhouse Gas Inventories (INGEIs) are prepared in accordance with the Framework Act on Climate Change and the INFOCARBONO (Executive Order 013-2014-MINAM), based on which the MINAM is responsible for periodically preparing inventories through joint work with other government institutions.

The INGEI is the result of implementing the provisions of the INFOCARBONO. It is part of Peru's Adaptation and Mitigation Measure Monitoring System, which represents our enhanced transparency framework under the Paris Agreement.

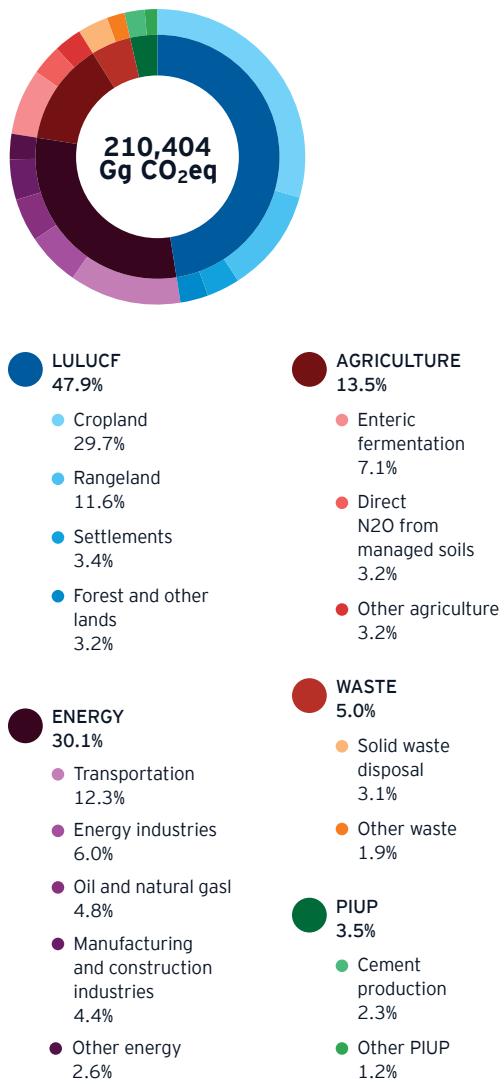

The inventory is prepared based on the guidelines of the Intergovernmental Panel on Climate Change (IPCC), the leading international body on the matter, which develops and updates the methodologies. The inventory thus helps decision-making on how to move forward with the implementation of our climate challenges. The information generated allows different governmental bodies to develop policies, plans, projects, and programs to reduce our emissions and put us on the path to a carbon-neutral future.

In 2023, MINAM presented the National Greenhouse Gas Inventory (INGEI) for 2019, which shows that the country's net emissions were 210,404 Gg CO₂eq. Regarding the distribution of net emissions by sector, it is found that the main emitter is the LULUCF sector with 100,794 Gg CO₂eq, which accounts for 47.9% of the total GHG generated in the country. Within this sector, the source of emissions that contributes the most corresponds to subcategory 3B2. Cropland with 62,542 CO₂eq of which 62,556 are emissions due to the conversion of forest and pastureland into crops and -13.7 Gg CO₂eq correspond to removals due to changes in carbon stocks in the living biomass reservoir.

The second sector that contributes the most GHG emissions is energy with 63,238 Gg CO₂eq, which accounts for 30.1% of the country's net emissions; within this sector, the transportation subcategory stands out as the main source of emissions, with 25,646 Gg CO₂eq. Together, the LULUCF and energy sectors account for 78.0% of total GHG emissions in Peru in 2019.

The remaining emissions are contributed by the agriculture sector with 28,478 Gg CO₂eq (13.5% of total emissions), waste with 10,418 Gg CO₂eq (5.0%) and PIUP with 7,476 Gg CO₂eq (3.6%).

INFOCARBONO.

Peru Carbon Footprint Platform

Mitigation measures for the achievement of Peru's NDCs seek to monitor and reduce GHG emissions. As part of these efforts, the public and private sectors have been involved, and in November 2019 MINAM, as the National Authority on Climate Change, presented the digital platform "Carbon Footprint Peru" (HC-Peru). This innovative tool is the first of its kind available free of charge nationwide for public and private organizations to manage their GHG emissions through six components:

- 1. Emissions calculator:** Free calculator to measure GHG emissions based on international standard ISO 14064-1.
- 2. Recognition system:** Incremental system for recognizing organizations through four levels of stars:
 - 1 star: Measurement of emissions.
 - 2 stars: Verification of footprint calculation results by an accredited third party.
 - 3 stars: Emissions reduction.
 - 4 stars: Recently updated to Reduction+, this final level is associated with the reduction of said emissions, sustained over time; the strengthening of GHG management in the organization's supply chain; or emissions neutralization.
- 3. Registry:** Public registry of participating organizations indicating the degree of ambition of their GHG emissions management.
- 4. Neutralization information:** List of national projects that offer emissions reductions to neutralize carbon footprints through the purchase of carbon credits.

- 5. List of verifiers:** To verify the carbon footprint, the organization shall hire accredited management system certification firms.
- 6. Statistics:** According to MINAM statistics, as of June 2023, 644 organizations have participated in the HC-Peru digital platform since 2014.

6. Peruvian Energy Policy 2010-2040

Peru's National Energy Policy 2010-2040 was approved in 2010 by Executive Order (Decreto Supremo) 064-2010-EM and has as its vision an energy system that meets the national demand in a reliable, regular, continuous and efficient manner. Likewise, it promotes sustainable development and is based on planning, research and continuous technological innovation. The objectives of the energy policy are:

- Having a diversified energy matrix, with emphasis on renewable sources and energy efficiency.
- Having a competitive energy supply.
- Universal access to energy supply.
- Having greater efficiency in the production chain and energy use.
- Achieving self-sufficiency in energy production.
- Developing an energy sector with minimal environmental impact and low carbon emissions within a framework of Sustainable Development.
- Developing the natural gas industry and its use in domestic activities, transportation, commerce and industry, as well as efficient electricity generation.

- Strengthening the institutional framework of the energy sector.
- Integrating with the region's energy markets to achieve the long-term vision.

7. Promotion of investment for the generation of electricity with the use of renewable energies.

On May 1, 2018, Legislative Order (Decreto Legislativo) 1002 was approved, which aims to promote the use of Renewable Energy Resources (RER) for electricity generation in Peru, and thus be able to reduce dependence on fossil fuels and promote the diversification of the country's energy matrix.

Such Legislative Order establishes measures to promote investment in RER-based electricity generation projects, such as priority in the daily distribution of energy in the National Interconnected Electricity System (SEIN), reduced rates for the use of energy distribution networks, priority access to transmission and distribution networks, among others.

In addition, measures are established to promote research and development of renewable energy technologies in universities, technical institutions and development organizations specialized in the field.

3

Roadmap to a Circular Economy

The current linear economy is based on a "take-make-waste" production and consumption model, in which goods are manufactured using raw materials that are then sold, used, and ultimately discarded as waste. While it is true that important steps have been taken toward efficiency, the linear system is based on consumption instead of the restorative use of resources, which involves significant losses throughout the value chain.

A circular economy, on the other hand, is internationally restorative and regenerative, so that goods, components, and materials conserve their usefulness and maximum value at all times, distinguishing between technical and biological cycles. This continuous positive development cycle preserves and improves natural capital (worldwide stocks of assets that include natural resources, ecosystems, and living beings), optimizes resource yield, and minimizes system risks by managing finite reserves and renewable flows.

In February 2020, Executive Order (Decreto Supremo) 003-2020-PRODUCE approved the Roadmap to a Circular Economy in the Industrial Sector, an initiative jointly prepared by MINAM and PRODUCE with the goal of promoting inclusive and sustainable economic growth and industrial development.

This law is based on four approaches, six lines of action, and sub-actions with short-term (one year), medium-term (three years), and long-term (five years) goals with the participation of the public sector, the private sector (in the form of industry trade groups), academia, research and innovation centers, among others, to identify and develop actions to promote and facilitate competitiveness and productivity, with a circular economy approach.

• Approach 1: Sustainable Industrial Production

- a. Line of action: Incentivize industrial production through a circular economy approach.
- b. Line of action: Manage information tied to circular production.

• Approach 2: Sustainable Consumption

- c. Line of action: Foster sustainable consumption habits in the public and private sectors and among the general public.

• Approach 3: Use of Discarded Materials and Industrial Waste Management

- d. Line of action: Promote the use of discarded materials and the valorization of industrial waste.

• Approach 4: Innovation and Financing

- e. Line of action: Incentivize innovation and the use of clean and sustainable technologies.
- f. Line of action: Design mechanisms and incentives to promote innovative initiatives and clean technologies.

4

Green Finance Roadmap (GFR)

The Green Finance Roadmap (GFR) is an initiative led by MINAM approved by Executive Decree No. 007-2023-MINAM. It aims to coordinate actions with both public and private actors relevant to the Peruvian financial sector and integrate environmental considerations in the strategic, operational and disclosure management of financial institutions, insurance companies and securities market.

The GFR will establish actions and roles for the actors involved, as well as the deadlines and means necessary to implement environmentally friendly investments. It also includes intermediary financial institutions, insurance companies and pension funds regulated by the Superintendence of Securities Market (SMV), as well as national development banks and non-supervised financial entities that seek to improve their social, environmental, and economic impact.

The GFR has two main thematic components. One focuses on integrating the environmental aspect within the financial system, addressing the generation and access to technical information, strengthening capabilities, financial environmental education, green finance governance and regulatory adaptation. The second component focuses on financing activities and designing eco-friendly products to mobilize investments in environmentally sustainable activities and products, especially those highly affected by nature.

Annexes

Principal Regulatory and Investment Promotion Entities in Peru

Photograph by Alfonso Zavala / © PROMPERU

1

Central Reserve Bank of Peru - BCRP

(Banco Central de Reserva del Perú - BCRP)

Tel: +51 1 613 2000

www.bcrp.gob.pe 

The Central Reserve Bank of Peru (BCRP) is an autonomous constitutional institution of the Peruvian State. According to the Constitution, the faculties of the BCRP are to regulate the currency and the credit in the financial system, manage international reserves under its care, and other functions indicated in the law that created the institution. Likewise, the Constitution orders the BCRP to issue coins and paper money and to accurately inform the country from time to time on the state of national finances. It also has the responsibility of maintaining monetary stability, avoiding the pressures of inflation and depreciation on the economy.

2

Office of the Prime Minister - PCM

(Presidencia del Consejo de Ministros - PCM)

Tel: +51 1 219 7000

www.gob.pe/pcm 

The Office of the Prime Minister is the technical-administrative institution of the Executive Branch, whose maximum authority is the President of the Republic of Peru. It coordinates and follows up on multi-sector policies and programs of the Executive Branch. It also carries out coordinated actions with the Congress and different constitutional entities.

3

Ministry of Economy and Finance - MEF

(Ministerio de Economía y Finanzas -MEF)

Tel: +51 1 311 5930

www.gob.pe/mef 

The Ministry of Economy and Finance (MEF) is an entity of the Executive Branch responsible for planning, directing, and controlling matters related to the budget, treasury, debt, accounting, fiscal policy, public spending, and economic and social policies. It also designs, establishes, performs, and supervises national and sector policies under its jurisdiction, assuming a guiding role therein.

5

National Institute for the Defense of Free Competition and the Protection of Intellectual Property - INDECOPI

(Instituto Nacional de Defensa de la Competencia y de la Protección de la Propiedad Intelectual - Indecopi)

Tel: +51 1 224 7777

www.indecopi.gob.pe/indecopi 

Indecopi promotes a culture of fair competition and protects all forms of intellectual property (trademarks, copyrights, patents, and biotechnology).

4

Ministry of Labor and Employment Promotion - MTPE

(Ministerio de Trabajo y Promoción del Empleo - MTPE)

Tel: +51 1 630 6000

www.gob.pe/mtpe 

The Ministry of Labor and Employment Promotion (MTPE) is the State institution responsible for designing, coordinating, and executing the policies and programs aimed at creating and improving dignified and productive work through the promotion of job market insertion opportunities and skills, as well as fostering a democratic system of labor relations through labor coordination, surveillance of compliance with laws, conflict prevention and resolution, and the improvement of working conditions.

6

Supervisory Board for Investment in Energy and Mining - OSINERGMIN

(Organismo Supervisor de la Inversión en Energía y Minería - OSINERGMIN)

Tel: +51 1 219 3400

+51 1 219 3410

+51 1 427 4935

www.osinergmin.gob.pe 

OSINERGMIN is responsible for supervising and controlling compliance with legal and technical provisions of activities developed by companies in the electricity and hydrocarbons subsectors, as well as compliance with legal and technical regulations related to the conservation and environmental protection. It is also in charge of quality and quantity control of fuels and higher prerogatives as part of its power to impose sanctions.

7

Supervisory Board for Private Investment in Telecommunications - OSIPTEL

(Organismo Supervisor de Inversión Privada en Telecomunicaciones - OSIPTEL)

Tel: +51 1 225 1313

www.osiptel.gob.pe 

OSIPTEL is in charge of regulating and supervising the public telecommunication services market, independently of the operating companies.

8

Supervisory Board for Investment in Public Transportation Infrastructure - OSITRAN

(Organismo Supervisor de la Inversión en Infraestructura de Transporte de Uso Público - OSITRAN)

Tel: +51 1 500 9330

www.ositran.gob.pe 

The general purpose of OSITRAN is to regulate, govern, supervise, and audit the behavior of the markets under its jurisdiction, with regard to the actions of service providers, as well as the compliance with concession agreements, impartially and objectively holding harmless the interests of the State, investors, and users.

9

Private Investment Promotion Agency - PROINVERSIÓN

(Agencia de Promoción de la Inversión Privada - Perú - ProInversión)

Tel: +51 1 200 1200

www.proinversion.gob.pe 

ProInversión promotes investment that does not depend on the Peruvian State, in charge of agents under the private system in order to improve the country's competitiveness and sustainable development and thus improve the population's welfare.

10

National Superintendence of Labor Audits - SUNAFIL

(Superintendencia Nacional de Fiscalización Laboral - SUNAFIL)

Tel: +51 1 390 2800

www.sunafil.gob.pe 

SUNAFIL is a specialized technical entity that forms part of the Ministry of Labor and Employment Promotion (MTPE), and is responsible for promoting, supervising, and auditing the compliance with labor laws and those related to occupational health and safety.

11

Superintendency of Banking and Insurance and Private Pension Fund Management Companies - SBS

(Superintendencia de Banca, Seguros y Administradoras de Fondos de Pensiones SBS)

Tel: +51 1 630 9000

www.sbs.gob.pe 

SBS is in charge of regulating and supervising the financial, insurance, and private pension fund systems. Its main objective is to protect the interests of depositors, the insured, and pension fund affiliates.

12

National Superintendency of Public Records Offices - SUNARP

(Superintendencia Nacional de los Registros Públicos - SUNARP)

Tel: +51 1 208 3100

www.sunarp.gob.pe 

The mission of the SUNARP is to provide legal security and certainty on ownership of different rights registered with it, backed by modernization, simplification, integration and the specialization of registration nationwide.

Photograph by Juan Muñoz / © PROMPERÚ

Photograph by Walter Silvera / © PROMPERÚ

13

National Superintendency of Sanitation Services - SUNASS

(Superintendencia Nacional de Servicios de Saneamiento - SUNASS)

Tel: +51 1 614 3200

www.sunass.gob.pe

The SUNASS is a decentralized public institution that rules, regulates, supervises and controls water and sewage services provided, impartially and objectively protecting the interests of the State, investors, and users.

14

Peruvian Securities and Exchange Superintendency - SMV

(Superintendencia del Mercado de Valores - SMV)

Tel: +51 1 610 6300

www.smv.gob.pe

The SMV is a specialized technical institution attached to the Ministry of Economy and Finance (MEF) designed to oversee the protection of investors, the efficiency and transparency of the markets under its supervision, the correct setting of prices, and the dissemination of all information necessary to achieve these goals. It has legal status of domestic public law and has complete functional, administrative, economic, technical, and budgetary autonomy.

15

National Superintendency of Customs and Tax Administration - SUNAT

(Superintendencia Nacional de Administración Tributaria - SUNAT)

Tel: +51 1 315 0730

www.sunat.gob.pe 

SUNAT also includes the National Customs Superintendency. It is in charge of managing, supervising, and collecting domestic taxes, with the exception of municipal taxes. It also manages and controls the international trafficking in goods within customs territory and collects the duties applicable by law, facilitates foreign trade economic activities, and inspects the international traffic in persons and the means of transportation. It also conducts the actions necessary to prevent and punish customs crimes.

16

General Bureau of Environmental Health - DIGESA

(Dirección General de Salud Ambiental - DIGESA)

Tel: +51 1 631 4430

www.digesa.minsa.gob.pe 

DIGESA is the technical regulator on issues related to basic health, occupational health, food hygiene, zoonosis, and protection of the environment.

17

Environmental Assessment and Supervisory Board - OEFA

(Organismo de Evaluación y Fiscalización Ambiental - OEFA)

Tel: +51 1 204 9900

www.oefa.gob.pe 

The OEFA is the guiding entity of the National Environmental Assessment and Supervisory System (SINEFA) and is responsible as such for the evaluation, supervision, and auditing of the compliance with environmental laws nationwide, integrating the efforts of the State and society in a coordinated and transparent manner to ensure the effective management and protection of the environment.

18

Ministry of Energy and Mines - MINEM

(Ministerio de Energía y Minas - MINEM)

Tel: +51 1 411 1100

www.minem.gob.pe 

The Ministry of Energy and Mines (MINEM) is the entity responsible for promoting the development and use of energy resources on a rational, efficient, and competitive basis in a scenario of decentralization and regional development, prioritizing private investment, satisfaction of demand, and the use of renewable energies. It also promotes the development of the mining industry, safeguarding legal stability, rational exploitation, and the introduction of new technologies.

19

Ministry of Transportation and Communications - MTC

(Ministerio de Transportes y Comunicaciones - MTC)

Tel: +51 1 615 7800

www.gob.pe/mtc

The Ministry of Transportation and Communications (MTC) is the Peruvian Government entity that seeks to ensure rational territorial order with respect to resources, production, markets, and population, through the regulation, promotion, implementation, and supervision of transportation and communications infrastructure.

20

Ministry of Foreign Trade and Tourism - MINCETUR

(Ministerio de Comercio Exterior y Turismo - MINCETUR)

Tel: +51 1 513 6100

www.gob.pe/mincetur

The Ministry of Foreign Trade and Tourism (MINCETUR) is the Peruvian Government entity responsible for formulating, directing, coordinating, implementing, and supervising foreign trade policy, with the exception of tariff regulations; and tourism policy, in accordance with general government policy and in coordination with the sectors and institutions within its jurisdiction.

21

Ministry of Industry and Fisheries - PRODUCE

(Ministerio de la Producción - PRODUCE)

Tel: +51 1 616 2222

www.gob.pe/produce

The Ministry of Industry and Fisheries is responsible for drafting, approving, implementing, and supervising national policies applicable to extractive, productive, and transformation activities in the industry and fishing sector, promoting their competitiveness and increasing their production, while guaranteeing the sustainable use of natural resources and environmental protection.

22

Ministry of Environment - MINAM

(Ministerio del Ambiente - MINAM)

Tel: +51 1 611 6000

www.gob.pe/minam

The Ministry of Environment promotes the conservation and sustainable use of natural resources, the enhancement of biological diversity and environmental quality for the benefit of people and the environment in a decentralized and coordinated manner with public and private organizations and civil society, within the framework of green growth and environmental governance.

It also drafts, plans, conducts, executes, supervises and evaluates the National Environmental Policy, applicable to all levels of government, and is in charge of the National Environmental Management System and the National Environmental Impact Assessment System, assuming a guiding role in the Environmental Sector.

23

Ministry of Agricultural Development and Irrigation - MIDAGRI

(Ministerio de Desarrollo Agrario y Riego - MIDAGRI)

Tel: +51 1 478 002

www.gob.pe/midagri

MIDAGRI is the governing public agency in agrarian matters. It works in accordance with the National Agrarian Policy that defines the medium and long term guidelines for the sustainable development of agriculture, with the purpose of activating development and social inclusion for the benefit of the rural population. We also promote the sustainable use of water, forest and wildlife resources.

1

Ministry of Foreign Affairs: Executive Office for Economic Promotion - DPE

(Ministerio de Relaciones Exteriores: Dirección General de Promoción Económica - DPE)

The Executive Office for Economic Promotion (DPE) is the institution of the Ministry of Foreign Affairs (MRE) responsible for coordinating with Peruvian missions abroad in an effort to promote Peru as a country capable of providing goods and services in international markets, as well as positioning it as a world-renowned tourist destination, and a country with interesting business and investment opportunities in different economic sectors.

It should be noted that the DPE has a Quality Management System certified with ISO 9001:2008 International Standard, governed under the values of equality, social commitment, honesty, transparency, and teamwork, thus ensuring that the needs of its national and international users are met.

The DPE reaffirms its commitment to provide services with high standards of quality, excellence, and continuous improvement in the development of the certified processes, such as:

- Support for exporters, investors, and travel agents
- Support for trade, investment, and tourism missions
- Response to requests
- Training
- Dissemination of opportunities
- Organization of events
- Resolution of trade problems and impasses

Services Offered by the DPE Through its Three Departments

Trade Promotion Bureau - PCO

(Dirección de Promoción del Comercio - PCO)

- Dissemination of business opportunities
- Dissemination of the export offer
- Support in the solution of trade problems between companies
- Identification of business opportunities
- Support to trade missions and their participation in fairs abroad
- Support to exporters in the resolution of trade impasses
- Organization of trade events

Investment Promotion Bureau - PIN

(Dirección de Promoción de las Inversiones - PIN)

- Participation in the negotiation of Foreign Investment Promotion Agreements
- Dissemination of investment opportunities (federal, regional, and municipal governments)
- Coordination of international events for investment promotion (road shows, videoconferences, fairs, and seminars)
- Preparation and coordination of an agenda for foreign business missions
- Dissemination of specialized information on foreign investment
- Support in the identification of investment possibilities and strategic alliances
- Dissemination of tenders and international bidding processes called by public and private Peruvian entities

Tourism Promotion Bureau - PTU

(Dirección de Promoción del Turismo - PTU)

- Dissemination of tourism offer
- Support for culinary events
- Dissemination of tourism materials
- Support for tourism promotion fairs abroad
- Support for agendas involved in the promotion of tourism
- Promotion and negotiation of tourism agreements
- Dissemination of tourism information obtained by our missions abroad

Private Investment Promotion Agency – ProInversión

(Agencia de Promoción de la Inversión Privada – ProInversión)

ProInversión is a public entity attached to the Ministry of Economy and Finance (MEF) and is in charge of executing the national policy for promoting private investment.

Its mission is to promote investment via agents in the private sector, in order to boost Peru's competitiveness and sustainable development and thus improve the wellbeing of the population.

ProInversión offers its services for investments in Peru free of charge, in three stages:

Pre-Incorporation

- ▶ General information service: macroeconomic data, legal framework, tax system, etc.
- ▶ Specific information service, at the request of the potential investor.
- ▶ Preparation of agendas with: potential partners, suppliers, clients, authorities, associations, unions, etc.

Incorporation

- ▶ Guidance on obtaining municipal permits and licenses for the establishment of an industrial or commercial business.
- ▶ Contact and accompaniment to the regions and potential production zones.
- ▶ Advice on migratory processes for entry and residence of business people.

Post-Incorporation

- ▶ Establishment of a network of contacts with public and private companies.
- ▶ Guidance for the expansion of the business.
- ▶ Identification of administrative barriers.

ProInversión provides information to potential investors regarding the incorporation of a business in Peru, identifying investment opportunities by sectors, learning about the processes of Public-Private Partnerships (PPP), among others.

Association of Capital Markets

Business Promoters - Procapitales

(Asociación de Empresas Promotoras del Mercado de Capitales - Procapitales)

The Association of Capital Markets Business Promoters (Procapitales) brings together the principal actors in the market, channeling their concerns and proposals. It acts as a business guild to focus fundamentally on promoting investment and capital markets. It speaks on behalf of its associates to the public sectors with proposals to reduce legal costs and bureaucratic barriers that hinder easy market access. The institution's principal objective is to encourage an efficient legal framework and appropriate corporate governance practices.

► Objectives and Guidelines

- Promote the development of new investment instruments
- Encourage access by new issuers of fixed-income and equity securities
- Promote the mobilization of institutional investor resources through new intermediary vehicles
- Actively promote improvements in legislation and the regulation of the capital market
- Disseminate and encourage the implementation of good corporate governance practices
- Create a permanent, proactive, and organized space for dialogue and interaction between agents in the market, including the regulatory and supervisory institutions
- Contribute to the institutional strengthening of agents participating in the capital market

Lima Chamber of Commerce - CCL

(Cámara de Comercio de Lima - CCL)

For the last 128 years, the Lima Chamber of Commerce (CCL) has represented and defended the interests of the business class before the country's authorities, as well as national and foreign entities. As part of its activities, it promotes free market policies and free competition with a sense of social responsibility, as well as fair and honest competition within a framework of values and ethical principles, fostering domestic and foreign trade and promoting good commercial practices.

The Lima Chamber of Commerce (CCL) is a strategic partner of the State, cooperating to ensure that the laws and other provisions foster national social and economic prosperity, taking the initiative in offering proposals and assuming responsibility in the activities entrusted to it by the State. It attempts to maintain close relations among all organizations representing business activities and cooperation for development, both Peruvian and international, especially supporting the decentralization of production. As a complementary activity, it conciliates interests and manages arbitration proceedings in an affordable and democratic manner between companies or business people, trying to ensure quick and friendly agreements.

The vision of the Lima Chamber of Commerce (CCL) is to be the country's leading business association, respected by society and a reference point for the opinion of the business class.

The Lima Chamber of Commerce (CCL) groups together over 14,000 member companies, including the Chamber of Commerce, Production, and Services (Perucamaras) which, in turn, groups together the country's 63 chambers and associations.

EY Services for Business and Investment in Peru

Photograph by Heinz Plenge Pardo / © PROMPERU

EY is the leading business consulting firm in Peru, assisting companies through its consulting, auditing, tax, strategy and transaction services.

At EY, we focus on helping our clients' full business potential, aiding them in improving their management. Our global network of professionals will help investors find financial, strategic, and operational alternatives to improve their liquidity, financial standing and performance, thus helping them to develop sustainable business in both the short and long terms.

Our approach is based on combining leading practices and methodologies with innovative thinking, adapting and renewing our services based on each client. Not all organizations are the same, and changes have a different impact on each one of them. High-performance companies know that confidence attracts success, and that is the reason why more and more companies in Peru decide to work with EY.

- Tax, customs, labor, and transfer pricing due diligence
- Tax advice aimed at generating higher post-acquisition or sale value

Executive Training Program

- Training on technical issues (tax, customs, legal, labor and financial accounting), specialized programs and soft skills: open and in-house courses

4

Strategy and Transactions

Enrique Oliveros
Strategy and Transactions Leader
enrique.oliveros@pe.ey.com

Managing Corporate Transactions and Finances means making the right decisions about the way to strategically manage capital in a changing world, with limited time and resources. At EY, we have a specialized team that helps organizations evaluate investment opportunities based on the Capital Agenda, in order to carry out efficient transactions and achieve their strategic goals.

We are able to advise you on the search for the right strategy for your company in merger and acquisition processes, the identification of synergies, support in financial modeling, project funding, and the measurement of the transaction implications, so that your business is more competitive, profitable, and faster growing.

Likewise, our EY Parthenon team has extensive experience in consulting for corporate clients and investment funds on market studies, value creation strategies, strategic planning, and commercial due diligence processes.

Strategy & Transactions Services

Mergers and Acquisitions

- ▶ Valuation of the target company (buy side or sell side)
- ▶ Advice on the identification of targets and buyers, with a special emphasis on the identification of synergies that make it possible to create greater added value for the transaction
- ▶ Preparation of information teasers and memorandums
- ▶ Management of proposal outlines and binding proposals
- ▶ Accompaniment in negotiation with possible buyers and/or sellers
- ▶ Advice on sale agreements and the negotiation of terms and conditions to close the transaction

Reorganizations

- ▶ Liquidity and working capital optimization.
- ▶ Independent assessment of business plans and strategic alternatives for debtors.
- ▶ Identification and structuring of debt/capital financing alternatives

Structuring of Debt and Equity Instruments

- ▶ Consulting on fixed- and variable-income issues
- ▶ Financial modeling of the optimal instrument structure for financing
- ▶ Consulting on capital raising processes
- ▶ Design of structured financing alternatives (securitization of product flows)
- ▶ Review of legal features of the transaction
- ▶ IPO readiness accompaniment

Financial Valuation and Modeling

- ▶ Valuation of companies, business units, intangible assets for transactional, tax or financial processes
- ▶ Fairness opinion: independent opinion on the market value of companies and assets and/or reasonability of a proposed transaction
- ▶ Financial modeling: Preparation and review of financial models for management, financing, and transactional purposes
- ▶ Purchase price allocation: valuation of individual net assets and assignment of purchase prices as part of business combination transactions under IFRS 3
- ▶ Impairment test: Valuation of investments and cash generating units for IAS 36 compliance

Project Finance, Concessions and Public-Private Partnerships (PPP)

- ▶ Development of feasibility studies
- ▶ Preparation of financial modeling
- ▶ Risk analysis and mitigation
- ▶ Advice on the definition of the optimal financial structure
- ▶ Support in negotiation with possible financiers and contractual closure
- ▶ Design of optimal (tax and financial) structuring models
- ▶ Review and analysis of public and private projects
- ▶ Comprehensive advice on tender processes and PPPs (buy side or sell side)
- ▶ Advice on renegotiation of concessions agreements and PPPs

Financial, Accounting, Tax, Labor, and Legal Due Diligence

- ▶ Development of comprehensive due diligence: financial, accounting, tax, labor, and legal
- ▶ Evaluation of financial statements and application of good financial, accounting, tax, labor, and legal practices
- ▶ EBITDA normalization analysis
- ▶ Identification of key financial factors that could impact the transaction pricing
- ▶ Quantification of contingencies identified
- ▶ Analysis of the calculation of price adjustments for the closure of transactions and advice on the negotiation of the Share Purchase Agreement (SPA)
- ▶ Review of the financial model

Working Capital Management

- ▶ Diagnosis, design, and implementation of an integrated strategy
- ▶ Quantification of opportunities for improvement in the three main components of working capital
- ▶ Quantification of the release of cash and increased profitability of the business
- ▶ Determination of policies for suppliers and implementation of best practices for working

Commercial Due Diligence

- ▶ Performance of a pre-sale diagnostic for the competitive sustainability of the target's goods and services
- ▶ Evaluation of the stability and growth of the customer base
- ▶ Assistance in the evaluation of the competitive environment, supply and demand of the company's goods and services
- ▶ Evaluation of key suppliers and distributors as part of the target's business
- ▶ Assistance in takeovers for integration and carve-out processes

Operational Transaction Services (OTS)

- ▶ Preparation and support in carve-out and integration processes
- ▶ Identification and realization of synergies identified
- ▶ "Day One" diagnostic and "First 100 Days" plan in integration processes
- ▶ Support in business continuity management

Operational Due Diligence

- ▶ Determination of operational and IT deficiencies in the target
- ▶ Understanding the risks and costs of integration
- ▶ Identification of priority areas for an adequate planning of the integration
- ▶ Identification of synergies
- ▶ Understanding operational systems, including base software and hardware as well as applications developed by in-house staff
- ▶ Understanding processes for risk management and information security

Strategy

- ▶ Commercial due diligence
- ▶ Growth strategies
- ▶ Value creation strategies
- ▶ Route to market
- ▶ Digital transformation strategy
- ▶ Strategic planning
- ▶ Strategic reflection

Tax Structure

- ▶ Advice on pre-transaction structuring to identify options that increase the transaction's value: reduction of tax costs and design of future exit strategies
- ▶ Advice on the optimization of tax benefits in the financing of the transaction
- ▶ Structuring of transactions for the optimization of tax benefits
- ▶ Evaluation of tax modeling in the projected cash flows of the transaction

Consumer Understanding and New Business Models

- ▶ Value proposition ("playbook to win")
- ▶ Customer experience
- ▶ Ecosystem strategy and design
- ▶ New business model strategy and design
- ▶ Market studies

5

Statement

This publication contains summarized information and is therefore intended solely as a general reference guide for facilitating access to information related to potential business. It is not intended, under any circumstances, to be used as a substitute for detailed research or the exercise of professional criteria and judgment. Additionally, the constant changes in the markets and their resulting information may result in the need to update the information included in this document. EY accepts no responsibility for the economic results that any person, company, or business may attempt to attribute to any material in this publication. For all specific business or investment matters, advice should always be sought from a qualified advisor.

EY

EY exists to build a better working world, helping to create long-term value for clients, people and society and build trust in the capital markets. Enabled by data and technology, diverse EY teams in over 150 countries provide trust through assurance and help clients grow, transform and operate.

Working across assurance, consulting, law, strategy, tax and transactions, EY teams ask better questions to find new answers for the complex issues facing our world today.

EY refers to the global organization, and may refer to one or more, of the member firms of Ernst & Young Global Limited, each of which is a separate legal entity. Ernst & Young Global Limited, a UK company limited by guarantee, does not provide services to clients. Information about how EY collects and uses personal data and a description of the rights individuals have under data protection legislation are available via ey.com/privacy. EY member firms do not practice law where prohibited by local laws. For more information about our organization, please visit ey.com.
